### Abstract

The lands surrounding and contained by the Irish Sea comprise a unique combination of interlinked communities and cultures. Some of Europe's most beautiful environments are located in these Countries and Regions. The Republic of Ireland, The Isle of Man, Northern Ireland, Wales, North West England and South West Scotland.

Irish Sea Rim has been initiated to explore the potential for growth, innovation & collaboration around the Irish Sea, encompassing 2 nation states, 6 countries, and a wealth of public and private sector linkages. The Irish Sea Rim can drive socio-economic growth across national boundaries and develop regional excellence through increased collaboration and an integrated network that cross-cuts sectors. The Irish Sea Rim will operate as an umbrella organisation and portal for regional programmes, investment and projects to over 15m people. The Irish Sea Rim has the ability to develop as a regional economic counterbalance to London (centric) & the South East that is often quoted as dominating UK politics and its economy. This rationale also spills over in the Republic of Ireland and this makes Ireland (south and north) as ideal partners within this network and framework.

how this process contributed to the formation of social identities Art and Identity at the Water's Edge focuses upon national coastlines and maritime heritage on rivers and seashore as regions of liminality and sites of conflicting identities and on the edge as a tourist setting Such themes are related to diverse forms of art including painting architecture maps photography and film Topics range from the South African seaside resort of Durban to the French Riviera The essays explore successive ideological mappings of the Jordan River and how Czech cubist architecture and painting shaped a new nationalist reading of the Vltava riverbanks They examine post Hurricane Katrina New Orleans as a filmic spectacle that questions assumptions about American identity and the coast depicted as a site of patriotism in nineteenth century British painting The collection demonstrates how waterside structures such as maritime museums and lighthouses and visual images of the water's edge have contributed to the construction of cultural and national identities
