Quasi-Frobenius Rings W. K. Nicholson,M. F. Yousif,2003-09-08 A ring is called quasi Frobenius if it is right or left selfinjective and right or left artinian all four combinations are equivalent The study of these rings grew out of the theory of representations of a finite group as a group of matrices over a field and the subject is intimately related to duality the duality from right to left modules induced by the hom functor and the duality related to annihilators The present extent of the theory is vast and this book makes no attempt to be encyclopedic instead it provides an elementary self contained account of the basic facts about these rings at a level allowing researchers and graduate students to gain entry to the field
