**Bringing New Law to Ocean Waters** David D. Caron,Harry N. Scheiber,2004-09-01 In this volume leading scholars and jurists in ocean law provide perspectives on the past record of legal change together with analyses of a wide range of institutional and legal innovation that are needed to meet current challenges The topics that are addressed here include policy process and legal innovation in marine fisheries management institutional capacity and jurisdictional conflict in ocean law adjudication regionalism and multilateralism in their various aspects the challenges posed by the sudden recent availability of technological access to underwater cultural heritage compensation for war related environmental damage and the problems associated with access to marine genetic materials Bringing new law to ocean waters the quest to adjust the legal order of the oceans to changing realities a quest that has produced both great achievements and grievous failures has constituted one of the major developments in international law in the last half century

**Sustainable Construction** Sandy Halliday,2008-01-14 It has taken a very long time for sustainable development to be recognised as a justified restraint on inappropriate development and a primary driver of improving quality of life for all For designers clients and project managers this means we have to create healthy buildings and places which support communities enhance biodiversity and contribute to reversing unsustainable trends in pollution and resource consumption It is a very positive agenda This groundbreaking book will help all building design management and cost professionals to understand sustainable design and provide the technical skills needed to implement the most up to date concepts Based on a hugely successful series of workshops for professionals in construction the book covers the history of ideas materials

measurement both cost and benchmarking performance environmental services and the building design and delivery process through to post occupancy evaluation It covers individual buildings and the urban scale Sustainable Construction is a master class in how to achieve practical affordable replicable sustainable design It has something new and often surprising in it for everybody in the construction industry For the Architect and Engineer it gives chapter and verse to the basic design issues at all scales and through the whole of the plan of work For Quantity Surveyors and cost professionals it challenges current conventions with researched case study evidence For clients and project managers it outlines the drivers and the justification for a sustainable approach and outlines the legislative framework and it gives guidance on procurement and project and site management issues For contractors and developers it contains a wealth of case study material rooted in practical experience and economic reality For teachers and students it will bust myths liberate thinking and inform design **Urban**

**Environmentalism** Peter Brand, Michael Thomas, 2013-02-01 A critical examination of urban policies and management practices used to make cities sustainable With an international perspective the book describes urban environmental agendas and how they arose in the context of globalization urban economic restructuring and the need to make cities competitive It argues that the environment became an integral part of city development policy turning attention not only to physical and ecological issues but also to improving the economic performance of cities and the lives of citizens The authors also go beyond the technical issues to explore the political importance of urban environmentalism using case studies to illustrate both its international scope and place specific characteristics which are inexorably influencing city development throughout the world In connecting the concept to its political effects the book raises issues such as local democracy equality and social regulation all of which are increasingly concerning academics professionals environmentalists and city authorities alike

The Fragility of the 'Failed State' Paradigm Neyire Akpinarli, 2010 The absence of effective government one of the most important issues in current international law became prominent with the failed state concept at the beginning of the 1990s Public international law however lacked sufficient legal means to deal with the phenomenon Neither attempts at state reconstruction in countries such as Afghanistan and Somalia on the legal basis of Chapter VII of the UN Charter nor economic liberalisation have addressed fundamental social and economic problems This work investigates the weaknesses of the failed state paradigm as a long term solution for international peace and security arguing that the solution to the absence of effective government can be found only in an economic and social approach and a true universalisation of international law

The Precautionary Principle in Biodiversity Conservation and Natural Resource Management Rosie Cooney, 2004 The precautionary principle or precautionary approach is now widely accepted in environmental law and policy at international and increasingly national level However the principle remains highly controversial its meaning contested its acceptance and implementation inconsistent across sectors and contexts and its impacts unclear This paper aims to inform and assist IUCN and its members in developing greater shared understanding of the meaning and implementation of the principle in the

context of biodiversity conservation and natural resource management respecting priorities of both conservation and sustainable development It examines the meaning of the precautionary principle and its incorporation into biodiversity and resource management law and policy and discusses a series of issues raised by its implementation in this sector for biodiversity conservation and for livelihoods and poverty alleviation

**Ecotourism, NGOs and Development** Jim Butcher, 2007-03-12 Ecotourism has emerged over the last twenty years not just as a market niche but also as a strategy for combining development with conservation in the developing world Ecotourism NGOs and Development considers the basis for advocacy and argues that it is premised upon a very limited and limiting view of the potential for development Jim Butcher examines the advocacy of tourism as sustainable development in a range of NGOs and within the general literature The research reveals that in spite of the plethora of critical commentaries on the operation of ecotourism projects there is generally an uncritical take on the ideological basis of the projects This book offers a timely critique of key assumptions underlying ecotourism s status as sustainable development arguing that ecotourism as development strategy ties the fate of some of the poorest people on the planet to localized environmental imperatives

The Environmentalism of the Poor Joan Martínez-Alier, 2003-01-01 This is a wonderful book rich in empirical detail full of theoretical insights offering hope in a bleak world altogether inspiring a tremendous achievement of having helped to create the disciplines of ecological economics and political ecology bringing them alive in this book and making their insights available to the developing worldwide movement for environmental justice Pat Devine Environmental Values Any book by the ecological economist Joan Martinez Alier is a Big Publishing Event this is a book by a writer who loves his subject knows it well respects its history and is driven by the desire to do justice These are qualities enough to send you to the bookshop or the library in search of The Environmentalism of the Poor Andrew Dobson Environment Politics The book is a worthy and in depth contribution to debates about political ecology and ecological economics It should be read by all environmental and ecological economists who wish to make their analysis more relevant Tim Forsyth Progress in Development Studies A marvellous combination of insight research and activism A must read for policymakers practitioners and academics alike and for anyone concerned with sustainable development environmentalism or poverty alleviation Human Ecology Journal one of the most important environmental books to have been published recently Martinez Alier integrates two of the most significant areas of environmental theory political ecology and ecological economics Eurig Scandrett Friends of the Earth Scotland The book has three main strengths its bibliography which is extensive the global perspective on the environmental movement and the relationship with poverty and the general theme of this interdisciplinary work which is not so much to provide new information but to consider the existing information in a new light Martinez Alier is to be commended for taking such a step in the literature the writing style is extremely approachable Recommended B J Peterson Choice Joan Martinez Alier combines the honest discipline of a scholar with the passionate energy of an activist The result The Environmentalism of the Poor is highly recommended Herman E Daly

University of Maryland College Park US The Environmentalism of the Poor has the explicit intention of helping to establish two emerging fields of study political ecology and ecological economics whilst also investigating the relations between them The book analyses several manifestations of the growing environmental justice movement and also of popular environmentalism and the environmentalism of the poor which will be seen in the coming decades as driving forces in the process to achieve an ecologically sustainable society The author studies in detail many ecological distribution conflicts in history and at present in urban and rural settings showing how poor people often favour resource conservation The environment is thus not so much a luxury of the rich as a necessity of the poor It concludes with the fundamental questions who has the right to impose a language of valuation and who has the power to simplify complexity Joan Martinez Alier combines the study of ecological conflicts and the study of environmental valuation in a totally original approach that will appeal to a wide cross section of academics ecologists and environmentalists

**Handbook of Research on Sustainable Development and Economics** Thomas, Ken D., 2015-04-30 With a current world population that exceeds seven billion resource consumption awareness is more important than ever Investing in sustainable technologies and renewable resources is a necessary step to ensure the future quality of life of all human beings The Handbook of Research on Sustainable Development and Economics explores topics such as poverty gender equality health security and the environment through global empirical studies and fundamental frameworks With the goal of promoting sustainable techniques for the global future this handbook is a critical reference for business leaders educators policymakers environmental specialists and the public at large

**Institutions and Environmental Change** Oran R. Young, Leslie A. King, Heike Schroeder, 2008-08-22 This overview of recent research on how institutions matter in tackling environmental problems reports the findings and policy implications of a decade long international research project Studies show that institutions play a role both in causing and in addressing problems arising from human environment interactions But the nature of this role is complex and not easily described This book presents an overview of recent research on how institutions matter in efforts to tackle such environmental problems as the loss of biological diversity the degradation of forests and the overarching issue of climate change Using the tools of the new institutionalism in the social sciences the book treats institutions as sets of rights rules and decision making procedures Individual chapters present research findings and examine policy implications regarding questions of causality performance and institutional design as well as the themes of institutional fit or misfit interplay and scale Institutions and Environmental Change is the product of a decade long international research project on the Institutional Dimensions of Global Environmental Change IDGEC carried out under the auspices of the International Human Dimensions Programme The book's policy insights demonstrate that research on institutions can provide the basis for practical advice on effective ways to deal with the most pressing environmental problems of our times Contributors Frank Biermann Carl Folke Victor Galaz Thomas Gehring Joyeeta Gupta Thomas Hahn Leslie A King Ronald B Mitchell Sebastian
