Accelerating Japan's Economic Growth F. Gerard Adams, Lawrence R.

Klein, Kumasaka Yuzo, Shinozaki Akihiko, 2007-09-12 The Japanese economy is beginning to show signs of recovery after years of stagnation deflation but many Japanese policymakers warn that this economic growth may be sluggish slower than in the United States and certainly slower than in other East Asian countries Japan faces significant economic problems including an aging population a large fiscal deficit and the need to adjust to the IT economy and to competition with the rest of East Asia A slow growth scenario would greatly reduce opportunities for new productive investment and would make it increasingly difficult to provide for Japan's growing social needs The authors of this book argue that Japan can and should grow more rapidly and examine the reasons for the sluggish performance of the Japanese economy For example some Japanese economic sectors particularly in distribution and finance have failed to take advantage of new information and communications technology to accelerate the growth of productivity as has happened in other countries such as the US Production function studies and econometric model simulations suggest that with appropriate policies the Japanese economy can grow more rapidly and deal with its future problems The book posits a number of policy proposals which would help to accelerate Japan's economic growth This book will be of interest to students of the Japanese economy macroeconomics and international economies and also to policymakers and professionals interested in Japan's economy China's State Owned

Enterprise Reforms Leila Fernandez-Stembridge, Juan Antonio Fernandez, 2007-01-24 Using case studies and interviews this book gives an in depth analysis of eleven industries outlining their transformation process including the influence of WTO membership the state of competition and the challenges ahead **Economic Development and Inequality in China** Hong

Yu, 2017-09-29 The conventional belief that all regions have equally benefited from China's remarkable development over the last three decades is subjected to criticism in this book as Hong Yu systematically analyses the issue of regional inequality during the post 1978 period using the case of Guangdong Guangdong is one of the key industrial centres and economic powerhouses in China and as a pioneer province instigating economic reform as China opened up to the world it offers an ideal focus upon which to question and enrich the Western theories of economic geography and regional disparity Based on field research analysis of geographic characteristics and regression models this book illustrates how Guangdong's impressive development record has been marred by its rising regional disparity investigates the main causes of this disparity and draws conclusions regarding the lessons China can learn from it Economic Development and Inequality in China will be of interest to students and scholars of Chinese economics Chinese regional studies economic geography and China Studies Hong Yu is a Visiting Research Fellow at the National University of Singapore His research interests lie in the field of regional economy He is the author of a chapter on China's two delta regions in the book China and The Global Economic Crisis **Workforce**

Development and Skill Formation in Asia John Benson, Howard Gospel, Ying Zhu, 2013-05-29 Asia has undergone rapid transformation over the past several decades as many countries have embraced new technologies and the processes of

globalisation Over this period the inflow of foreign capital into the region the level of trade amongst these countries and trade with other parts of the world has increased substantially The ensuing economic growth has led to some significant changes in labour markets and the demand for skilled employees and their deployment within organisations Focusing on a number of developed and developing Asian economies this book explores the dynamics of workforce development and skill formation and considers questions of both skills shortages and skills gaps The book assesses the current state of training in the selected Asian economies the weaknesses and strengths of their various training approaches and what the present state of training means for the future economic development of these economies State Structure, Policy Formation, and Economic Development in Southeast Asia Antoinette R. Raquiza, 2013-06-17 Why do some small developing countries industrialize and others don't? What factors account for different economic performance among states that are vulnerable to external shocks crony capitalism and political instability This book argues that the answer lies in the structuring of state power specifically the way different sets of governing elites political leaders and economic technocrats are embedded in political organisations and state institutions and the way these elites relate to each other in the economic development policy process Conducting a comparative historical analysis of Thailand and the Philippines the book argues that the institutional settings of governing elites influence economic outcomes In Thailand political power traditionally connects to state institutions in ways that has limited the impact of political turnovers and global downturns conducive to long term industrial activities In contrast Philippine state power derives from family networks that merge social and political power suited to fast moving short term commercial interests In focusing on this political and institutional story the author analyses the current development dilemmas of countries weighed down by historical legacies of unstable regimes dependency and social conflict and how they are likely to develop in the future *The Little Big Number* Dirk Philipsen, 2015-05-26 The story of GDP and why we need a better measurement of growth In one lifetime GDP or Gross Domestic Product has ballooned from a narrow economic tool into a global article of faith As *The Little Big Number* demonstrates this spells trouble While economies and cultures measure their performance by it GDP only measures output It ignores central facts such as quality costs or purpose Sustainability and quality of life are overlooked Losses don't count The world can no longer afford GDP rule GDP ignores real development Dirk Philipsen demonstrates how the history of GDP reveals unique opportunities to fashion smarter goals and measures *The Little Big Number* explores a possible roadmap for a future that advances quality of life rather than indiscriminate growth *Financial Development and Economic Growth in Malaysia* James B. Ang, 2008-11-25 This book is concerned with the role of financial intermediation in economic development and growth in the context of Malaysia Using an analytical framework the author investigates the Malaysian economy from 1960 onwards to examine how far financial development has progressed in the course of economic development and whether it has been instrumental in promoting economic growth A significant improvement in the Malaysian financial system coupled with rapid economic growth and a rich

history of financial sector reforms makes Malaysia an interesting case study for this subject The author shows that some government interventions seem to have impacted negatively on economic growth whereas repressionist financial policies such as interest rate controls high reserve requirements and directed credit programmes seem to have contributed positively to financial development The analysis concludes that financial development leads to higher output growth via promoting private saving and private investment Shedding light on the evolutionary role of financial system and the interacting mechanisms between financial development and economic growth this book will be of interest to those interested in economic and financial development financial liberalization saving behaviour and investment analysis and Asian Studies

Business Leadership Development in China Shuang Ren,Robert Wood,Ying Zhu,2015-03-24 This book argues that China s businesses and hence China s future economic development face a huge crisis in that there is a considerable leadership gap in China with a shortage of competent business leaders at a time when new leadership skills are required urgently as China s businesses evolve rapidly and engage ever more with the global economy Moreover the book argues training is an undervalued and often marginalised activity in Chinese companies The book outlines the nature of this problem and goes on to demonstrate that there is a new breed of manager emerging in China aware of the need to upgrade management skills moving away from skills appropriate in traditional industrial firms and emphasising more flexibility positive engagement with workers and competence in the market economy The book includes an evaluation of different management approaches in China reports on extensive original research including interviews with practising managers and sets out how self development in widespread deep and important

East Asia, Globalization and the New Economy F. Gerard Adams,2006-10-03 We are witnessing a transformation in the world economy as a result of the IT e business revolution Modern logistics based on cheap communication and transportation are shifting the locus of production and the international division of labour between the West and the lower wage countries of East Asia and similar changes are occurring within East Asia itself Looming over the entire picture is the colossus that is China and this transformation is making East Asia the

manufacturing centre of the world economy Written by a recognized expert in the area of business economics this book analyzes these developments and evaluates their future impact on the development of East Asia and its role in the world economy The book examines the effect of the IT revolution globalization and the new economy on the development of East Asia The first book length treatment of IT e business in the region it questions whether the e business revolution will renew and sustain the rapid economic development of East Asia *The Institutional Dynamics of China's Great Transformation* Xiaoming Huang,2010-11-30 This book examines the role of institutions in China s recent large scale economic social and political transformation Unlike existing literature it offers perspectives from a variety of disciplines including law economics politics international relations and communication studies to consider whether institutions form evolve and change differently according to their historical or cultural environments and if their utilitarian functions can and should be observed identified and measured in different ways Taxation in ASEAN and China Nolan Sharkey,2012-05-31 China and the ASEAN region have risen rapidly to a position of immense economic significance in the global economy Academics policy makers and businesses are all keen to understand more about taxation in China and ASEAN and this work seeks to address this key issue by providing a comprehensive overview of the many often mentioned but little understood challenges of doing business in the region Traversing a wide range of regional issues and jurisdictions topics covered include the role of DTAs in regional integration the impact of social institutions on tax corruption and its causes economic development and taxation and the use of education in developing systems Case studies are taken from countries such as China Vietnam Hong Kong Singapore the Philippines Malaysia and Indonesia Drawing on the results of these discussions the book also sheds light on the question of whether different taxing institutions are needed in the region Gathering together a cross disciplinary group of eminent scholars this work will be of great interest to all students and scholars of Asian economics Asian finance and taxation in general **In the Jaws of the Dragon** Eamonn Fingleton,2008-03-04 In recent years popular wisdom has held that opening American markets to Chinese goods was the best way to promote democracy in Beijing that the Communist Party s grip would quickly weaken as increasingly affluent Chinese citizens embraced American values That popular wisdom was wrong As Eamonn Fingleton shows in this devastating book instead of America changing China China is changing America Although this process of reverse convergence has been swept largely under the carpet by knee jerk globalists in the American press Americans will soon be hearing much more about it Nowhere is the pattern more obvious than in business Many top American corporations Boeing AT T the Detroit automobile companies among them openly collaborate with the Chinese Communist Party In a stunning rejection of Western values Yahoo even provided the Chinese secret police with vital evidence that resulted in a ten year jail sentence for one of its Chinese subscribers a brave young dissident under draconian censorship laws Selling the American national interest short countless other corporations abjectly do Beijing s lobbying in Congress This book the culmination of twenty years of study also breaks new ground by revealing the secret behind China s

phenomenal savings rate Top leaders literally force the Chinese people to save through a highly counterintuitive and to ordinary citizens virtually invisible policy called suppressed consumption This practice which is to economics roughly what steroids are to sport is fundamentally incompatible with Western ideas of fair global competition It is reinforced by an Orwellian system of political control that as Fingleton reveals utilizes an ancient bureaucratic tool called selective enforcement a form of blackmail that instills a silent reign of terror throughout Chinese society Most worryingly selective enforcement can readily be unleashed on any American corporation with interests in China which is to say just about every member of the Fortune 500 While the Chinese people s rising affluence is of course an occasion for wholehearted rejoicing Uncle Sam should give the Chinese power system a wide berth lest he catch his coattails in the jaws of a dragon
