Elman,2009-07-01 In *A Cultural History of Modern Science in China* Elman has retold the story of the Jesuit impact on late imperial China circa 1600 1800 and the Protestant era in early modern China from the 1840s to 1900 in a concise and accessible form ideal for the classroom     **Science, Technology, and Society** Sal Restivo,2005-05-19 Emphasizing an interdisciplinary and international coverage of the functions and effects of science and technology in society and culture *Science Technology and Society* contains over 130 A to Z signed articles written by major scholars and experts from academic and scientific institutions and institutes worldwide Each article is accompanied by a selected bibliography Other features include extensive cross referencing throughout a directory of contributors and an extensive topical index     *Science and Religion in Mamluk Egypt* Nahyan Fancy,2013-06-03 The discovery of the pulmonary transit of blood was a ground breaking discovery in the history of the life sciences and a prerequisite for William Harvey s fully developed theory of blood circulation three centuries later This book is the first attempt at understanding Ibn al Naf s s anatomical discovery from within the medical and theological works of this thirteenth century physician jurist and his broader social religious and intellectual contexts Although Ibn al Naf s did not posit a theory of blood circulation he nevertheless challenged the reigning Galenic and Avicennian physiological theories and the then prevailing anatomical understandings of the heart Far from being a happy guess Ibn al Naf s s anatomical result is rooted in an extensive re evaluation of the reigning medical theories Moreover this book shows that Ibn al Naf s s re evaluation is itself a result of his engagement with post Avicennian debates on the relationship between reason and revelation and the rationality of traditionalist beliefs such as bodily resurrection Breaking new ground by showing how medicine philosophy and theology were intertwined in the intellectual fabric of pre modern Islamic societies *Science and Religion in Mamluk Egypt* will be of interest to students and scholars of the History of Science the History of Medicine and Islamic Studies     **Islam Between Culture and Politics** Bassam Tibi,2005-08-31 Bassam Tibi offers a radical solution to the problems faced by Islam in a rapidly changing and globalizing world He proposes a depoliticization of the faith and the introduction of reforms to embrace secular democracy pluralism civil society and individual human rights The alternative to this is the impasse of fundamentalism The pivotal argument is that Islam is being torn between the pressure for cultural innovation and a defensive move towards the politicization of its symbols for non religious ends     **Islam Between Culture and Politics** B. Tibi,2001-11-07 Bassam Tibi offers a radical solution to the problems faced by Islam in a rapidly changing and globalizing world He proposes a depoliticization of the faith and the introduction of reforms to embrace secular democracy pluralism civil society and individual human rights The alternative to this is the impasse of fundamentalism The pivotal argument is that Islam is being torn between the pressure for cultural innovation and a defensive move towards the politicization of its symbols for non religious ends     *The World at First Light* Bernd Roeck,2025-06-03 A new and ambitious history of the Renaissance as a global event which the author argues was

much more revolutionary and profoundly influential than we currently appreciate This is nothing less than a new history of the origins development and legacy of the Renaissance in a global and comparative context Presented as a panorama of what the author characterises as a restless and dramatic epoch the book is an exploration of how a distinct concentration of ideas discoveries and tumultuous political circumstance should have coalesced in Europe in such a way and at a particular time as to bring about the modern world as we know it Drawing on a multidisciplinary awareness of history art philology literature philosophy science and medicine and exploiting both traditional accounts and post colonial approaches the author seeks to explain how the Renaissance came about and how it was for better or worse both the dawn of the modern world and the dawning of modern worldliness After highlighting the distinctive and advantageous geographical position of Europe and establishing the absolutely crucial heritage of dialogue criticism and communication from the classical world the author recounts the various cultural rebirths throughout the first millennium from the Islamic empire to the Carolingians and late Byzantium as well as the ongoing struggles for order which marked much of the uneven development of the medieval period By the very late Middle Ages then Europe was a propitious collection advanced states engaged in acrimonious but productive rivalry wherein populated urban areas offered ideal venues for the exploitation of two phenomena the importation of moveable type and a widespread adoption of the classical discourse of criticism and exchange In situating Europe in the context of political and cultural conditions in central and south Asia as well as the Far East Roeck argues that the explosion in learning and expression which we associate with the Renaissance was a combination of new ideas and material conditions and of innovations as well as serendipitous political realities it was also as much the culmination of a long and slow evolution of ancient tendencies as any sudden rediscovery The consequences in any case have been profound much that we take for granted in politics scientific enquiry and intellectual life is a consequence of the Renaissance

**A History of Orthodox, Islamic, and Western Christian Political Values** Dennis J. Dunn,2016-09-13 The book reveals the nexus between religion and politics today and shows that we live in an interdependent world where one global

civilization is emerging and where the world's peoples are continuing to coalesce around a series of values that contain potent Western overtones Both Putin's Orthodox Russia and regions under the control of such Islamist groups like ISIS and Al Qaeda resent and attempt in a largely languishing effort to frustrate this series of values The book explains the current tension between the West and Russia and parts of the Muslim world and sheds light on the causes of such crises as the Syrian Civil War Russia's aggression against Ukraine and acts of terrorism such as 9/11 and the ISIS inspired massacres in Paris It shows that religion continues to affect global order and that knowledge of its effect on political identity and global governance should guide both government policy and scholarly analysis of contemporary history **A Hand Book on**
