## **Rise Of The Dragon Readings From Nature On The Chinese Fossil Record:**

*Rise of the Dragon* Henry Gee, 2001-11 Over the past decade fossil finds from China have stunned the world grabbing headlines and changing perceptions with a wealth of new discoveries Many of these finds were first announced to English speakers in the journal *Nature* *Rise of the Dragon* gathers together sixteen of these original reports some augmented with commentaries originally published in *Nature's* News and Views section Perhaps the best known of these new Chinese fossils are the famous feathered dinosaurs from Liaoning Province which may help end one of the most intense debates in paleontology whether birds evolved from dinosaurs But other finds have been just as spectacular such as the minutely preserved to the cellular level animal embryos of the 670 million year old Duoshantuo phosphorites or the world's oldest known fish from the Chengjiang formation in southwestern Yunnan Province *Rise of the Dragon* makes descriptions and detailed discussions of these important finds available in one convenient volume for paleontologists and serious fossil fans

**The Decline and Fall of the Human Empire** Henry Gee, 2025-03-18 By the award winning author of *A Very Short History of Life on Earth* a history of humanity on the brink of decline A Next Big Idea Club Must Read Selection We are living through a period that is unique in human history For the first time in more than ten thousand years the rate of human population growth is slowing down In the middle of this century population growth will stop and the number of people on Earth will start to decline fast In this provocative book award winning science writer Henry Gee offers a concise brilliantly told history of our species and argues that we are on a rapid one way trip to extinction *The Decline and Fall of the Human Empire* narrates the dramatic rise of humanity how a scattered range of small groups across several continents eventually inbred interacted fought established stable communities and food supplies and began the process of dominating the planet The human story is relatively brief the oldest fossils of *H Sapiens* date to approximately 300 000 years ago yet the spread of our species has been unstoppable until recently As Gee demonstrates our population has peaked and is declining our environment is becoming inimical to human life in many locations our core resources of water arable land and air are diminishing and new diseases simmering conflicts and ambiguous technologies threaten our collective health Can we still change our course Or is our own extinction inevitable There could be a way out but the launch window is narrow Unless *Homo sapiens* establishes successful colonies in space within the next two centuries our species is likely to stay earthbound and will have vanished entirely within another ten thousand years bringing the seven million year story of the human lineage to an end With assured narration dramatic stories and his signature sprightly humor Henry Gee envisions new opportunities for the future of humanity a future that will reward facing challenges with ingenuity foresight and cooperation **Evolution and Belief** Robert J. Asher, 2012-02-23 Asher draws on his experiences as a paleontologist and a religious believer arguing that science does not contradict religious belief *Strickberger's Evolution* Brian K. Hall, Benedikt Hallgrímsson, 2007-12-06 Thoroughly updated and reorganized Strickberger's *Evolution* Fourth Edition presents biology students with a basic

introduction to prevailing knowledge and ideas about evolution discussing how why and where the world and its organisms changed throughout history Keeping consistent with Strickberger s engaging writing style the authors carefully unfold a broad range of philosophical and historical topics that frame the theories of today including cosmological and geological evolution and its impact on life the origins of life on earth the development of molecular pathways from genetic systems to organismic morphology and function the evolutionary history of organisms from microbes to animals and the numerous molecular and populational concepts that explain the earth s dynamic evolution Important Notice The digital edition of this book is missing some of the images or content found in the physical edition

**Earth Sciences History** ,2004    **Journal of Vertebrate Paleontology** ,2002    **American Paleontologist** ,2001    *The British National Bibliography* Arthur James Wells,2002    Forthcoming Books Rose Arny,2001    **Discover** ,2005    The Zoological Record ,2003    **Subject Guide to Books in Print** ,1971    International Books in Print ,1990    *Originations and radiations and biodiversity changes evidences from chinese fossil record* ,2006
