Insurance, Risk Management, and Public Policy Sandra G. Gustavson, Scott E. Harrington, 1993-10-31 Five years ago the world lost one of its most prolific insurance scholars, Dr. Robert I. Mehr. His death in 1988 signalled the passing of not only a gifted writer and researcher but also a pioneering teacher, mentor, and friend. The essays compiled within this volume are intended as an appropriate tribute to this occasionally outrageous individual who touched the lives of so many within the insurance community. Bob Mehr was a teacher who expected and demanded nothing less than perfect scholarship and flawless, efficient writing. Among alumni of the University of Illinois insurance doctoral program, stories still abound of late night and early morning sessions in which students and professor painstakingly debated precise words and phrases for dissertations, journal articles, and textbooks. Bob's respect for language was both immense and contagious; if at times more than a little compulsive. He joked that he could not read letters or novels without pencil in hand for editing. Bob's respect for his doctoral students was equally evident. The confidence he displayed in his students' abilities was sometimes startling but competence assumed often begot competence in fact. The accomplishments and records amassed by the many who studied with Bob Mehr are impressive and ongoing. On the dedication page in his final textbook, *Fundamentals of Insurance*, Bob

spoke of his affection for those he called his academic progeny and wished them happiness as they build their own academic families

Uncertain Business Richard Victor Ericson, Aaron Doyle, 2004-01-01 We live in an age of increasing doubt about whether our institutions and technologies can provide security against risks many of which they themselves have created Uncertain Business is an unprecedented inquiry into insurance industry practices and what they tell us about risks and uncertainties in contemporary society The core of the book is ethnographic studies in distinct fields of insurance premature death disability earthquake and terrorism These studies reveal that uncertainty pervades different fields of insurance the very industry that is charged with transforming uncertainty into manageable risk Scientific data on risk are variously absent inadequate controversial contradictory and

ignored Insurers impose meaning on uncertainty through non scientific forms of knowledge that are intuitive emotional aesthetic moral and speculative Nevertheless the nature of uncertainty and the response to it varies substantially across the fields studied showing how contemporary society is characterized by competing risk logics Insurers perceptions and decisions about uncertainty with potential for windfall profits as well as catastrophic losses create crises in insurance availability and provoke new forms of inequality and exclusion Hence while the insurance industry is a central bulwark against uncertainty insurers also play a key role in fostering it Marine War-risk Insurance United States.
