Felix Kloman, 2008. *The Fantods of Risk* is a collection of essays from the pages of Risk Management Reports which the author edited, wrote and published from 1974 through 2007 plus several other published articles. The subject is risk management, a discipline for dealing with uncertainty in our personal and organizational lives. *The Closing of the Auditor's Mind?* David J. O'Regan, 2024-12-10. In *The Closing of the Auditor's Mind*, author David J. O'Regan describes internal auditing as an important binding agent of social cohesion for the accountability of individuals and organizations and also at aggregated levels of social trust. However, O'Regan also reveals that internal auditing faces two severe challenges: an external challenge of adaptation and an internal challenge of fundamental reform. The adaptation challenge arises from ongoing paradigmatic shifts in accountability and social trust. The command and control vertical hierarchies of traditional bureaucracies are being replaced in importance by networked, flattened patterns of accountability. The most challenging assurance demands of the modern era are increasingly located in three institutional domains: in the inner workings of organizations, in intermediary spaces at organizational boundaries, and in extra-mural locations. Internal auditing continues to cling barnacle-like to the inner workings of traditional bureaucratic structures and it has little to offer the emerging assurance demands on or beyond institutional boundaries. The reform challenge arises from internal auditing's prevailing tendency toward a rigid, algorithmic checklist mindset that suppresses practitioners' creativity and critical thinking. This trend is increasingly narrowing internal auditing's intellectual and moral horizons. Under the pressures of these challenges, internal auditing is struggling to fulfil its primary purpose of serving the public interest. O'Regan's powerful book focuses on the redistribution of social trust from traditional hierarchical institutions to diffuse, horizontally distributed networks. The perennial validity of the classical virtues as the humane foundation of professional activity. The role of creative expertise in promoting professional wisdom. *The Closing of the Auditor's Mind* is a philosophical audit of a profession on the threshold of crisis. The book presupposes no prior knowledge of philosophy nor indeed of auditing. Philosophical technicalities are contained in an Appendix, leaving the main text jargon-free. O'Regan provides original and striking perspectives on the malaise of modern internal auditing and he proposes radical remedies. This captivating and well-informed book is a must-read for all who are concerned with our

collective socio economic and political well being
