**Perspectives on Ignorance from Moral and Social Philosophy** Rik Peels, 2016-06-23 This edited collection focuses on the moral and social dimensions of ignorance an undertheorized category in analytic philosophy Contributors address such issues as the relation between ignorance and deception ignorance as a moral excuse ignorance as a legal excuse and the relation between ignorance and moral character In the moral realm ignorance is sometimes considered as an excuse some specific kind of ignorance seems to be implied by a moral character and ignorance is closely related to moral risk Ignorance has certain social dimensions as well it has been claimed to be the engine of science it seems to be entailed by privacy and secrecy and it is widely thought to constitute a legal excuse in certain circumstances Together these contributions provide a sustained inquiry into the nature of ignorance and the pivotal role it plays in the moral and social domains

**Handbook of Risk Theory** Sabine Roeser, 2012 Risk has become one of the main topics in fields as diverse as engineering, medicine, and economics, and it is also studied by social scientists, psychologists, and legal scholars. But the topic of risk also leads to more fundamental questions such as: What is risk? What can decision theory contribute to the analysis of risk? What does the human perception of risk mean for society? How should we judge whether a risk is morally acceptable or not? Over the last couple of decades, questions like these have attracted interest from philosophers and other scholars into risk theory. This handbook provides for an overview into key topics in a major new field of research. It addresses a wide range of topics ranging from decision theory, risk perception, to ethics and social implications of risk, and it also addresses specific case studies. It aims to promote communication and information among all those who are interested in theoretical issues concerning risk and uncertainty. This handbook brings together internationally leading philosophers and scholars from other disciplines who work on risk theory. The contributions are accessibly written and highly relevant to issues that are studied by risk scholars. We hope that the Handbook of Risk Theory will be a helpful starting point for all risk scholars who are interested in broadening and deepening their current perspectives.

**The Political Theories of Risk Analysis** Nicholas P. Guehlstorf, 2012-11-03 The purpose of this study is to question whether liberal political theories ought to inform the way policymakers and administrators analyze risk in proposed courses of environmental practice. In order to explore the relationship of liberal theory to rational practice in environmental policy, this project examines the risk analysis used to approve the genetically engineered bovine growth hormone in American agricultural policy. The Political Theories of Risk Analysis suggests that American environmental public policy is attempting to assess danger with an incomplete notion of utility to eliminate the hazards of society with an

inadequate contractual justification of political authority and to publicly debate accepted levels of risk with an unfulfilled critical social theory Because environmental risk analyses are incorrectly perceived as technically rational and socially apolitical they result in practices that are muddled and misdirected Making theoretical foundations explicit however could lead to improved practice Public policy and administrative decisions regarding agricultural biotechnologies should and can function with more concern for democratic values The Political Theories of Risk Analysis is for environmental scientists philosophers public policy planners applied ethicists political scientists and environmentalists *Risk and Responsibility in Context* Adriana Placani, Stearns Broadhead, 2023-08-31 This volume bridges contemporary philosophical conceptions of risk and responsibility and offers an extensive examination of the topic It shows that risk and responsibility combine in ways that give rise to new philosophical questions and problems Philosophical interest in the relationship between risk and responsibility continues to rise due in no small part to environmental crises emerging technologies legal developments and new medical advances Despite such interest scholars are still working out how to conceive of the links between risk and responsibility the implications that risks may have to conceptions of responsibility and vice versa as well as how such theorizing might play out in applied cases With contributions from leading scholars this volume brings together new work examining the interplay between risk and responsibility exploring its varied philosophical aspects and applications to contemporary issues in law bioethics technology and environmental ethics Risk and Responsibility in Context will be of interest to philosophers working in ethics bioethics philosophy of law and philosophy of technology as well as scholars and practitioners in law health and science management public policy and environmental studies The Open Access version of this book is available at [www.taylorfrancis.com](http://www.taylorfrancis.com) This publication is licensed unless otherwise indicated under the terms of the Creative Commons Attribution Non Commercial 4 0 International CC BY NC 4 0 license <https://creativecommons.org/licenses/by-nc/4.0/> which permits use sharing adaptation distribution and reproduction in any medium or format provided you give appropriate credit to the original author s and source provide a link to the Creative Commons license and indicate any modifications Use for commercial purposes is not permitted *The Philosophy of Money and Finance* Joakim Sandberg, Lisa Warenski, 2024 The Philosophy of Money and Finance presents sixteen original essays providing a comprehensive introduction to questions concerning the nature of money and monetary value the epistemology of markets and the ethics of financial systems *The Philosophy of Fire Insurance* Albert Flandreau Dean, 1925 **Global Catastrophic Risks** Nick Bostrom, Milan M. *Flood Risk and Social Justice* Zoran Vojinovic, Michael B. Abbott, 2012-03-05 Flood Risk and Social Justice is a response to the rising significance of floods and flood related disasters worldwide as an initiative to promote a socially just approach to the problems of flood risk It integrates the human social and the technological components to provide a holistic view This book treats flooding as a multi dimensional human and natural world tragedy that must be accommodated using all the social and technological means that can be mobilised before during and after the flooding event It covers socially just flood risk mitigation practices which necessitate a wide range of multidisciplinary approaches starting from social and wider environmental needs including feedback cycles between human needs and technological means Flood Risk and Social Justice looks at how to judge whether a risk is acceptable or not by addressing an understanding of social and phenomenological considerations rather than simple calculations of probabilities multiplied by unwanted outcomes and their balancing between costs and benefits It is argued that the present flood management practice should be largely replaced by the social justice approach where particular attention is given to deciding what is the right thing to do within a much wider context Thus it insists upon the validity of modes of human understanding which cannot be addressed within the limited context of modern science Flood Risk and Social Justice is written to support a wide range of audiences and seeks to improve the dialogue between researchers and practitioners from different disciplines including post graduate engineering environmental and social science students industry practitioners academics planners environmental advocacy groups and environmental law professionals who have a strong interest in a new kind of social justice work that can act as a continuous counter balance to the various mechanisms that unceasingly give rise to profound injustices More information about this book can be found in this article written for the WaterWiki by the author <http://www.iwaterwiki.org/xwiki/bin/view/Articles/FloodRiskandSocialJustice> Authors Zoran Vojinovic is Associate Professor at the UNESCO IHE Institute for Water Education Delft the Netherlands with almost 20 years of consulting and research experience in various aspects of water industry in New Zealand Australia Asia Europe Central South America and the Caribbean Michael B Abbott is Emeritus Professor at the UNESCO IHE Institute for Water Education Delft the Netherlands and a Director of the European Institute for Industrial Leadership in Brussels He founded and developed the disciplines of Computational Hydraulics and Hydroinformatics and co founded the Journal of Hydroinformatics with Professor Roger Falconer
