Stevenson,2000-06-29 This volume documents metropolitan Boston s metamorphosis from a casualty of manufacturing decline in the 1970s to a paragon of the high tech and service industries in the 1990s The city s rebound has been part of a wider regional renaissance as new commercial centers have sprung up outside the city limits A stream of immigrants have flowed into the area redrawing the map of ethnic relations in the city While Boston s vaunted mind based economy rewards the highly educated many unskilled workers have also found opportunities servicing the city s growing health and education industries Boston s renaissance remains uneven and the authors identify a variety of handicaps low education unstable employment single parenthood that still hold minorities back Nonetheless this book presents Boston as a hopeful example of how America s older cities can reinvent themselves in the wake of suburbanization and deindustrialization A Volume in the Multi City Study of Urban Inequality **Boston Against Busing** Ronald P.
