[A Tokyo Romance](#) Ian Buruma, 2018 A classic memoir of self invention in a strange land Ian Buruma s unflinching account of his amazing journey into the heart of Tokyo s underground culture as a young man in the 1970 s When Ian Buruma arrived in Tokyo in 1975 Japan was little more than an idea in his mind a fantasy of a distant land A sensitive misfit in the world of his upper middleclass youth what he longed for

wasn't so much the exotic as the raw unfiltered humanity he had experienced in Japanese theater performances and films witnessed in Amsterdam and Paris. One particular theater troupe directed by a poet of runaways, outsiders and eccentrics was especially alluring, more than a little frightening and completely unforgettable. If Tokyo was anything like his plays, Buruma knew that he had to join the circus as soon as possible. Tokyo was an astonishment. Buruma found a feverish and surreal metropolis where nothing was understated: neon lights, crimson lanterns, Japanese pop advertising jingles and cabarets. He encountered a city in the midst of an economic boom where everything seemed new, aside from the isolated temple or shrine that had survived the firestorms and earthquakes that had levelled the city during the past century. History remained in fragments, the shapes of wounded World War II veterans in white kimonos, murky old bars that Mishima had cruised in and the narrow alleys where street girls had once flitted. Buruma's Tokyo, though, was a city engaged in a radical transformation. And through his adventures in the world of avant-garde theater, his encounters with carnival acts, fashion photographers and moments on set with Akira Kurosawa, Buruma underwent a radical transformation of his own. For an outsider unattached to the cultural burdens placed on the Japanese, this was a place to be truly free. *A Tokyo Romance* is a portrait of a young artist and the fantastical city that shaped him. With his signature acuity, Ian Buruma brilliantly captures the historical tensions between east and west, the cultural excitement of 1970s Tokyo and the dilemma of the *gaijin* in Japanese society, free yet always on the outside. The result is a timeless story about the desire to transgress boundaries, cultural, artistic and sexual.

*Festivalising!*, 2007-01-01 Throughout the world, festivals are growing in numbers, in size, in significance and serve as spaces where aesthetic encounters, religious and political celebrations, economic investments and public entertainment can take place. In this sense, festivals are theatrical events. This volume contains discussions of 14 diverse festival events from five continents across the globe, written by members of the IFTR/FIRT Working Group on the Theatrical Event, the same group that has produced the ground-breaking study *Theatrical Events: Borders, Dynamics, Frames* in 2004, also published by Rodopi. The events discussed here range from traditional carnivals and festivals to more controversial theatre, dance and opera festivals, children's festivals and community events as well as saints' and workers' festivities. All of these constitute part of the local playing cultures and take on significant political roles nationally and regionally. The authors explore and extend the theoretical frames of reference for any contemporary discussion of theatrical events and festivals in order to provide a new and fresh perspective on past and present festival culture across the globe.

**In the Bubble** John Thackara, 2006-02-17 How to design a world in which we rely less on stuff and more on people. We're filling up the world with technology and devices, but we've lost sight of an important question: What is this stuff for? What value does it add to our lives? So asks author John Thackara in his new book *In the Bubble: Designing for a Complex World*. These are tough questions for the pushers of technology to answer. Our economic system is centered on technology, so it would be no small matter if tech ceased to be an end in itself in our daily lives. Technology is not going to go away, but the time to discuss the end it will serve is before we

deploy it not after We need to ask what purpose will be served by the broadband communications smart materials wearable computing and connected appliances that we re unleashing upon the world We need to ask what impact all this stuff will have on our daily lives Who will look after it and how In the Bubble is about a world based less on stuff and more on people Thackara describes a transformation that is taking place now not in a remote science fiction future it s not about as he puts it the schlock of the new but about radical innovation already emerging in daily life We are regaining respect for what people can do that technology can t In the Bubble describes services designed to help people carry out daily activities in new ways Many of these services involve technology ranging from body implants to wide bodied jets But objects and systems play a supporting role in a people centered world The design focus is on services not things And new principles above all lightness inform the way these services are designed and used At the heart of In the Bubble is a belief informed by a wealth of real world examples that ethics and responsibility can inform design decisions without impeding social and technical innovation
