The Foundations of Ethology K. Lorenz,2013-04-17 This book is a contribution to the history of ethology not a definitive history but the personal view of a major figure in that story It is all the more welcome because such a grand theme as ethology calls for a range of perspectives One reason is the overarching scope of the subject Two great questions about life that constitute much of biology are How does it work structure and function and How did it get that way evolution and ontogeny Ethology addresses the antecedent of it Of what are we trying to explain the mechanism and development Surely behavior in all its wealth of detail variation causation and control is the main achievement of animal evolution the essential consequence of animal structure and function the *raison d'être* of all the rest Ethology thus spans between and overlaps with the ever widening circles of ecology over the eons and the ever narrowing focus of physiology of the neurons Another reason why the history of ethology needs perspectives is the recency of its acceptance For such an obviously major aspect of animal biology it is curious how short a time less than three decades has seen the excitement of an active field and a substantial fraternity of workers the addition of professors and courses to departments and curricula in biology still far from universal and the normal complement of special journals symposia and sessions at congresses From Islam To Islamism, From Islamic Fundamentalism To Jihadism Christoph S.,2024-09-20 The aim of this work is to warn of worse things to come by means of an ideology critical analysis of Islamic fundamentalism The argument Nobody could have known that which in reality should read Nobody wanted to know that is today once again beginning to promote the wishful thinking of an inherently tolerant and peaceful Islam If no balance can be achieved between Western and Quranic thinking the worst must be expected The supra naturalistic value system of Islam is to be critically reflected upon from the philosophical position of realism understood as a value neutral collective term for many philosophical currents which assumes the existence and at least partial recognizability of an extra subjectively existing external world The Natural Science of the Human Species Konrad Lorenz,1997-08 This translation contains a synopsis of all the ideas that made Lorenz famous as the founder of ethology the study of comparative animal behavior edited from the author's posthumous works by Agnes von CranachHere

Am I Where Are You The Behavior of the Greylag Goose was thought to be Konrad Lorenz's last book However in 1991 the Russian Manuscript was discovered in an attic and its subsequent publication in German has become a scientific sensation Written under the most extreme conditions in Soviet prison camps the Russian Manuscript was the first outline of a large scale work on behavioral science This translation contains a synopsis of all the ideas that made Lorenz famous as the founder of ethology the study of comparative animal behavior **Homo Sapiens** Antonio Véllez Montoya, 2013-08-20 The themes discussed in this book translated to English by Australian Kieran Tapsell form part of a revolutionary discipline known under the name of evolutionary psychology a discipline that has become the most powerful tool discovered to date for man to understand himself Much of the knowledge revealed by human science is explained as a result of the evolutionary process using as a premise the theory that the majority of modern man's desires impulses interests and inclinations and mental faculties were designed by the evolutionary process of the species This new focus allows us to synthesize a group of already established findings coming from such diverse disciplines as genetics evolution ethology anthropology psychology neurology and epistemology In this way it is possible to explain an important part of complex human behavior under one sole unifying principle the direct or indirect search for a greater reproductive efficacy With this work easily readable by the general public the author completes a cycle of subjects that he had begun with From the Big Bang to Homo Sapiens 2004 a book published in Spanish by Villegas Editores *The Year of the Greylag Goose* Konrad Lorenz, 1979 Commentary and photographs of the Greylag goose tell the story of their family life structures which is similar to human family life *National Library of Medicine Audiovisuals Catalog* National Library of Medicine (U.S.), 1991
