Lost Volume A Catalogue Of Disasters:

Lost Volume Cornelia Parker, Edward Woodman, 1993 Tir du site Internet de Book Works *Lost volume* a catalogue of disasters continues Cornelia Parker's preoccupation with destruction Following on from *Cold Dark Matter* where with the help of the British Army Parker exploded a garden shed crammed with objects *Lost volume* a catalogue of disasters uses the intimate form of the book to present several flattened objects that through the use of trompe l'oeil appear to have been squashed between the pages of the book Parker crushes these selected objects in a press between sheets of heavy paper creating embossed indentations and reducing the objects to two dimensional representations of their former three dimensional selves The selected objects are seemingly unconnected a contents page that includes objects not flattened in the book confuses matters further The book is perhaps best read as a way of seeing objects and the world in a new light *Art and Destruction* Jennifer Walden, 2014-01-14 Most talk of and writing on art is about its relationship to creation and creativity This of course takes various forms but ultimately the creative act in the making of art works is a key issue What happens when we put together art and destruction This has been referenced in some major areas such as that of art and iconoclasm and auto destructive art movements Less evident are accounts of more intimate smaller scale destructive interventions into the world of the made or exhibited art object or more singular and particularised approaches to the representation of mass destruction This volume addresses these lacunae by bringing together some distinct and very different areas for enquiry which nevertheless share a theme of destruction and share an emphasis upon the history of twentieth and twenty first century art making Scholars and makers have come together to produce accounts of artists whose making is driven by the breaking of or breaking down of matter and medium as part of the creative materialisation of the idea such as Richard Wentworth Bouke de Vries Cornelia Parker to name some of those artists represented here and indeed in one case how our very attempts to write about such practices are challenged by this making process Other perspectives have engaged in critical study of various destructive interventions in galleries Some of these whether as actual staged actions in real time or filmic representations of precarious objects are understood as artistic acts in and of themselves At the same time an account included in this volume of certain contemporary iconoclasts defacing or otherwise effecting destructive attempts upon canonised exhibited artworks reflects upon these destructive interventionists as self styled artists claiming to add to the significance of works via acts of destruction Yet other chapters provide a fresh outlook upon distinctive and unusual approaches to the representation of destruction in terms of the larger scale and landscape of artistic responses to mass destruction in times of war This book will be of interest to readers keen to encounter the range of nuance complexity and ambiguity applicable to the bringing together of art and destruction **Umbrella** ,1994 **Printmaking Today** ,1993

The North African campaign had captured the public imagination in Britain and the victors of Alamein joined those of Agincourt and Waterloo in the ranks of British heroes. This book looks at the background to the battle, the preparations and the battle itself. Doherty uses personal accounts, war diaries, official regimental and divisional histories and material from numerous archives to tell the story of this timely British victory.

Disaster Management for Libraries and Archives John Feather, 2017-03-02. Disaster planning might not seem a pressing concern until disaster strikes. Recent events have reminded us that any collection or service may be at risk and libraries and archives must have prevention and recovery measures in place. Written by academics and practitioners drawing on firsthand experience and research worldwide including Australia, Scandinavia and the USA, *Disaster Management for Libraries and Archives* reviews and explains the importance and scope of disaster management planning and what can be done before, during and after incidents. The book begins by explaining how to develop a disaster control plan, outlining the different phases from prevention to recovery and goes on to provide guidance on risk assessment and management methods which should underpin disaster planning. Individual chapters then focus on fire and flooding, bringing together lessons learned from recent disasters in the UK with case study material including information on prevention systems and reaction and recovery measures. A chapter on cooperative projects in the USA follows, providing examples of how collaborative partnerships and networks can be organized so that help, expertise and resources can be shared to facilitate management of disasters. The effect on people, both employees and users, must never be overlooked; this is the emphasis of the second half of the book. Research on the impact of a major library fire in Sweden forms the basis of the next chapter, which explains how the psychological impact of disasters on both staff and the local community can be managed. The following chapter describes the devastating effects on cultural institutions and their staff of war in Croatia in the early 1990s and extraordinary achievements against the odds. Ways of maintaining immediate temporary service continuity along with planning for long-term restoration of services are exemplified by a case study of the fire at the Central Library of Norwich. *Disaster Management for Libraries and Archives* offers advice and insight for managers beginning to work on or reviewing disaster management within their organizations. The accounts of actual events highlight the real-life challenges faced and the effectiveness of appropriate solutions, while the guide to information sources at the end of the book signposts readers to a wealth of other useful material.

Artbibliographies Modern, 1993. Abstracts of journal articles, books, essays, exhibition catalogs, dissertations and exhibition reviews. Photography is covered from its invention in 1839 to the present. A particular emphasis is placed upon adding new and lesser-known artists and on the coverage of foreign language literature. Approximately 13,000 new entries are added each year. Published with title LOMA from 1969-1971.

,1994-08 Alastair Campbell Diaries: Volume 7 Alastair Campbell,2018-09-20 Caught in the no man s land between being a
key figure in Downing Street and the relative anonymity of the world outside politics Alastair Campbell finds himself being
torn in several directions Having succeeded Tony Blair as Prime Minister Gordon Brown wants Campbell at his side Campbell
resists flooding his reservoir of guilt as a general election looms and Brown s indecision and fluctuating moods suggest the
Labour administration is seriously threatened by the Tory posh boy David Cameron Soon Campbell is earning not only praise
but big money from motivational speaking and writing novels which darkly reflect the personal mood swings that continue to
concern to both him and his family Serious journalism across platforms old and new puts him back in the public eye and
together with live appearances and a love of sport his enduring love affair with Burnley Football Club still smoulders sees
him board a celebrity merry go round that often leaves him far from his comfort zone With politics constantly tugging his
sleeve he eventually returns to the front line to marshal a party in disarray The intensity of the months leading up to 6 May
2010 is as dramatic as any screenplay with Campbell chronicling Brown s struggle to win over a disillusioned nation and then
his dignified departure from the main stage For Campbell another chapter closes So what next The Shakespeare First
Folio: A new worldwide census of first folios Anthony James West,2001 Existing copies of the Shakespeare First Folio 1623
were surveyed and counted a hundred years ago in Sidney Lee s Census of 1902 Since then some seventy copies have come
to light some of which are only now identified as First Folios This new Census lists 229 copies giving concise descriptions of
each The entries cover condition including the number of original leaves items of special interest provenance and binding A
concordance of Lee and West numbers is also provided To set the stage the volume tells the story of the search for copies
and the detective work involved in dealing with doubtful identifications Because Folios survive in such a wide variety of
condition the tests for defining what to count as a copy are described then demonstrated with three unnumbered
unrecognized copies at the Folger Shakespeare Library Finally details of missing copies are given to increase the likelihood
of their rediscovery
