Methodology Of The Social Sciences:

Methodology of Social Sciences Henry A. Finch, 2011-12-31 Max Weber wrote these methodological essays in the closest intimacy with actual research and against a background of constant and intensive meditation on substantive problems in the theory and strategy of the social sciences They were written between 1903 and 1917 the most productive of Max Weber's life when he was working on his studies in the sociology of religion and *Wirtschaft und Gesellschaft* Weber had done important work in economic and legal history and had taught economic theory On the basis of original investigations he had acquired a specialist's knowledge of the details of German economic and social structure His always vital concern for the political prosperity of Germany among the nations thrust him deeply into discussion of political ideals and programs Weber's methodology still holds interest for us Some of its shortcomings from the contemporary viewpoint may be attributed to the fact that some of the methodological problems that he treated could not be satisfactorily resolved prior to certain actual developments in research technique These few qualifications aside the work remains a pioneering work in large scale social research from one of the field's masters

Basic Concepts in the Methodology of the Social Sciences Johann Mouton, H. C. Marais, 1988 This book consists of three major sections In the first which includes chapters 1 to 7 the basic concepts of the methodology of the social sciences are discussed In the second chapters 8 and 9 the most important concepts of part one are integrated in discussions on the writing of research proposals and research reports The third section appendices consists of three case studies in which the most important methodological principles which were discussed in the preceding sections are illustrated

the Social Sciences Max Weber, 1949 Three essays two of which were first published in *Archiv für Sozialwissenschaft und Sozialpolitik* in 1904 and 1905 and the third in *Logos* in 1917 The meaning of ethical neutrality in sociology and economics Objectivity in social science and social policy Critical studies in the logic of the cultural sciences *Qualitative Research Methods for the Social Sciences* Bruce Lawrence Berg, 2007 This volume offers a comprehensive and straightforward coverage of doing qualitative research The central purpose of this book is to instruct inexperienced researchers in ways of collecting organizing and making sense of qualitative data Max Weber's Methodology Fritz Ringer, 1997 At a time when historical and cultural analyses are being subjected to all manner of ideological and disciplinary prodding and poking the work of Max Weber the brilliant social theorist and one of the most creative intellectual forces in the twentieth century is especially relevant In this significant study Fritz Ringer offers a new approach to the work of Weber interpreting his methodological writings in the context of the lively German intellectual debates of his day According to Ringer Weber was able to bridge the intellectual divide between humanistic interpretation and causal explanation in historical and cultural studies in a way that speaks directly to our own time when methodological differences continue to impede fruitful cooperation between humanists and social scientists In the place of the humanists subjectivism and the social scientists naturalism Weber developed the flexible and realistic concepts of objective probability and adequate causation Grounding technical theories in specific examples Ringer has written an essential text for all students of Weber and of social theory in the humanities and social sciences Fully reconstructed Max Weber's methodological position in fact anticipated the most fruitful directions in our own contemporary philosophies of the cultural and social sciences Ringer's conceptualization of Weber's approach and achievement elucidates Weber's reconciliation of interpretive understanding and causal explanation and shows its relevance to intellectual life and culture in Weber's own time and in ours as well **Max Weber on the Methodology of the Social Sciences (Classic Reprint)** Max Weber, 2017-07-18 Excerpt from Max Weber on the Methodology of the Social Sciences It was a time when patriotic professors were invoking the authority of their academic disciplines for the legitimation of their political arguments when Weber himself was engaged in a series of titanic polemics against the prevailing political system and while he was still working on the sociology of religion perhaps he had already begun by this time to work on the more rigorously systematic First Part of *Wirtschaft und Gesellschaft* The essay itself was a revision of a memorandum written about four years earlier to serve as the basis of a private discussion in the *Verein für Sozialpolitik* and never made publicly accessible A mass of particular concrete interests underlie this essay his recurrent effort to penetrate to the postulates of economic theory his ethical passion for academic freedom his fervent nationalist political convictions and his own perpetual demand for intellectual integrity Max Weber's pressing need to know the grounds for his own actions and his strong belief that man's dignity consists in his capacity for rational self-determination are evident throughout this essay as well as his contempt for those whose confidence in the rightness of their moral judgment is so weak

that they feel the urge to support it by some authority such as the trend of history or its conformity with scientific doctrine in a sphere in which the powers of science are definitely limited On this occasion too Weber worked his way through to the most fundamental and most widely ramified methodological problems in the attempt to reach clarity about the bases of his own practical judgment Here of course he was not dealing primarily with the methodology of research but his procedure and his success illustrate the fruitfulness of methodological analysis when it has actual judgments and observations to analyze rather than merely a body of rules from which it makes deductions About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
