Natural History Of An English Forest:

The Natural History of an English Forest Norman E. Hickin, 1971 English Forests and Forest Trees Historical, Legendary and Descriptive, 1853 *English Forests and Forest Trees, Historical, Legendary, and Descriptive. With ... Illustrations* English Forests, 1853 **Report of the Marlborough College Natural History Society (founded April 9th, 1864), for the Year Ending ...** Marlborough College (Marlborough, England). Natural History Society, 1865 The Oxford Handbook of Environmental History Andrew C. Isenberg, 2014-09-18 The field of environmental history emerged just decades ago but has established itself as one of the most innovative and important new approaches to history one that bridges the human and natural world the humanities and the sciences With the current trend towards internationalizing history environmental history is perhaps the quintessential approach to studying subjects outside the nation state model with pollution global warming and other issues affecting the earth not stopping at national borders With 25 essays this Handbook is global in scope and innovative in organization looking at the field thematically through such categories as climate disease oceans the body energy consumerism and international relations *The Royal Forests of England* John Charles Cox, 1905

Empire Forestry and the Origins of Environmentalism Gregory Allen Barton, 2002-10-17 What we now know of as environmentalism began with the establishment of the first empire forest in 1855 in British India and during the second half of the nineteenth century over ten per cent of the land surface of the earth became protected as a public trust Sprawling forest reservations many of them larger than modern nations became revenue producing forests that protected the whole household of nature and Rudyard Kipling and Theodore Roosevelt were among those who celebrated a new class of government foresters as public heroes Imperial foresters warned of impending catastrophe desertification and global climate change if the reverse process of deforestation continued The empire forestry movement spread through India Africa Australia New Zealand Canada and then the United States to other parts of the globe and Gregory Barton's study looks at the origins of environmentalism in a global perspective The natural history and scientific book circular Wesley William and son, 1891

English Local Government: The manor and the borough, part 1 Sidney Webb, Beatrice Webb, 1908 **The Estates of the English Crown, 1558-1640** R. W. Hoyle, 2002-08-08 This collection of essays is the first full account of the largest estate in early modern England against which the fortunes of all other estates may be judged Previous accounts have tended to regard the Crown lands as a resource to be plundered by successive monarchs in times of need much of the monastic land confiscated by Henry VIII had been sold by the time of his death and the estates had mostly been liquidated to meet the demands of expenditure by 1640 It is not denied in these essays that the estates suffered from the attrition of periodic sale but the estates are also seen as a continuing enterprise of complexity and sophistication Each essay is concerned with the dialogue between the Exchequer and its local administrators and tenants The success and failure of initiatives launched by the Exchequer is illustrated by examples drawn from many communities throughout England
