Natural History Of Singapore:

200 Martyn E. Y. Low, Kate Pocklington, Peter K. L. Ng, 2019 **Of Whales and Dinosaurs** Kevin Y.L. Tan, 2015-04-18

Singapore's collection of Southeast Asian animals one of the world's largest dates back to the old Raffles Museum officially established in 1878. With the opening of the Lee Kong Chian Natural History Museum in 2015 the original Raffles Museum has reincarnated and the loop on its remarkable 127 year history has closed. Beneath the sleek exterior of today's modern museum building lies a saga of titanic struggles and changes. That the collections survived at all through the multiple challenges of the nineteenth century the disruption of World War Two and its potential disintegration in the face of Singapore's modernization is nothing short of miraculous. This book is not only an institutional history of the museum but also tells the story of frustrations commitment and courage of the numerous individuals who battled officialdom innovated endlessly and overcame the odds to protect Singapore's natural history heritage. The book features 108 historical photographs and natural history illustrations printed in full colour throughout.

The Singapore Naturalist, Etc. No. 1-5. July 1922-Jan. 1925 Singapore Natural History Society (Singapore), 1922 **Singapore: A Biography** Mark Ravinder Frost, Yu-Mei Balasingamchow, 2013-02-26

From the Publisher Singapore A Biography takes you there to those critical moments in the island's past as captured through the personal accounts of people who actually lived through them. Encounter violent unrest on the city's streets the jostling down its corridors of power the high life of its up and coming elites and the daily struggles of existence that lay beyond its five foot ways in an epic drama that stretches back over seven centuries. Grounded in scholarship yet fired by the imagination this book tells a new Singapore story one more dramatic complex and engrossing than you might expect. Singapore was not always the orderly and successful city state that it appears to be now. Over the last seven centuries the island has undergone several changes of identity. In this entertaining and wide ranging account drawn from research undertaken in collaboration with the National Museum of Singapore Mark Ravinder Frost and Yu Mei Balasingamchow present Singapore's mercurial life story as experienced by the people who participated in it. Singapore A Biography brings together a Ming dynasty travelogue 19th century memoirs and correspondence modern oral histories and even radio and television broadcasts to reconnect a contemporary audience with the Singapore story. While famous names from Singapore's past take their place this new story also introduces a cast of lesser known though no less compelling historical personalities from dissenting poets and radical ideologues to patriotic factory workers and early feminists. The portrait of Singapore that emerges is dashing lively and multi layered and it offers fresh insight into the ruptures and continuities that have made Singaporeans and their nation what they are today.

Coral Reefs of Singapore's Urbanised Sea Loke Ming Chou, Danwei Huang, 2025-10-23

This book highlights how Singapore's coral reef system is responding to changing environmental conditions caused by urbanization and climate change. It provides a fundamental understanding of how reefs respond to decades of chronic urbanization impacts and episodic marine heatwave

events with studies revealing responses at molecular cellular organismal and community levels Knowing what drives the persistence of coral dominated reefs through urbanization and global warming impacts will contribute to the formulation of effective conservation strategies The chapters cover topics such as the impacts of sedimentation on coral communities the energetic needs of corals in extreme environments and the diversity of Symbiodiniaceae dinoflagellates Readers will discover insights into the resilience of coral reefs the role of microbiomes and the thriving coral reef fishes in Singapore s urban reef system This literature invites readers to think through critical questions about conservation status and biological connectivity in urbanized seascapes Contributions from distinguished scholars and practitioners provide expert insights into theoretical frameworks and practical case studies addressing topics such as the impacts of climate change the persistence of coral dominated reefs in the face of substantial losses and bleaching events and strategies for management and reef restoration initiatives Researchers ecologists and reef managers will find this book invaluable It offers a comprehensive analysis of Singapore s coral reefs making it essential for anyone interested in marine conservation urban ecology and sustainable development This volume is a crucial resource for understanding and managing coral reef resilience in the face of urbanization and climate change Scholars students and practitioners in marine biology environmental science and urban planning will benefit from the insights and strategies presented As governments seek to fulfil obligations to COP and UN Sustainable Development Goal 14 this book provides the scientific foundation needed to guide effective conservation measures in tropical coastal cities
