Natural Obsessions The Search For The Oncogene:

Natural Obsessions Natalie Angier, 1999 Describes the search for the genes that control cancer **Natural Obsessions** Natalie Angier, 1999-04-01 As dramatic as *The Double Hex* and as absorbing as *The Soul of a New Machine* *Natural Obsessions* explores the advanced reaches of molecular biology the nature of the human cell and the genes that control cancer It unforgettably portrays some of the best young scientists in the world the rewards and discouragements of scientific research and the very process of scientific inquiry **Cancer-gate** Samuel Epstein, 2019-08-22 Award winning author Samuel S Epstein M D whose 1978 book *The Politics of Cancer* shook the political establishment by showing how the federal government had been corrupted by industrial polluters has written a book that is sure to be of equal consequence *Cancer Gate How to Win the Losing Cancer War* is a groundbreaking new book It warns that contrary to three decades of promises we are losing the winnable war against cancer and that the hand in glove generals of the federal National Cancer Institute NCI and the private nonprofit American Cancer Society ACS have betrayed us These institutions Epstein alleges have spent tens of billions of taxpayer and charity dollars primarily targeting silver bullet cures strategies that have largely failed while virtually ignoring strategies for preventing cancer in the first place As a result cancer rates have escalated to epidemic proportions now striking nearly one in every two men and more than one in every three women This translates into approximately 50 percent more cancer in men and 20 percent more cancer in women over the course of just one generation

Against the Tide Martín López Corredoira, Carlos Castro Perelman, 2008 Nobody should have a monopoly of the truth in this universe The censorship and suppression of challenging ideas against the tide of mainstream research the blacklisting of scientists for instance is neither the best way to do and filter science nor to promote progress in the human knowledge The removal of good and novel ideas from the scientific stage is very detrimental to the pursuit of the truth There are instances in which a mere unqualified belief can occasionally be converted into a generally accepted scientific theory through the screening action of refereed literature and meetings planned by the scientific organizing committees and through the distribution of funds controlled by club opinions It leads to unitary paradigms and unitary thinking not necessarily associated to the unique truth This is the topic of this book to critically analyze the problems of the official and sometimes illicit mechanisms under which current science physics and astronomy in particular is being administered and filtered today along with the onerous consequences these mechanisms have on all of us Apart from the editors Juan Miguel Campanario Brian Martin Wolfgang Kundt J Marvin Herndon Marian Apostol Halton C Arp Tom Van Flandern Andrei P Kirilyuk Dmitri Rabounski and Henry H Bauer all of them professional researchers reveal a pessimistic view of the miseries of the actual system while a glimmer of hope remains in the leitmotiv claim towards the freedom in doing research and attaining an acceptable level of ethics in science *American Women of Science since 1900* Tiffany K. Wayne, 2010-10-11 A comprehensive examination of American women scientists across the sciences throughout the 20th century providing a rich

historical context for understanding their achievements and the way they changed the practice of science Much more than a Who's Who this exhaustive two volume encyclopedia examines the significant achievements of 20th century American women across the sciences in light of the historical and cultural factors that affected their education employment and research opportunities With coverage that includes a number of scientists working today the encyclopedia shows just how much the sciences have evolved as a professional option for women from the dawn of the 20th century to the present American Women of Science since 1900 focuses on 500 of the 20th century's most notable American women scientists many overlooked undervalued or simply not well known In addition it offers individual features on 50 different scientific disciplines Women in Astronomy etc as well as essays on balancing career and family girls and science education and other sociocultural topics Readers will encounter some extraordinary scientific minds at work getting a sense of the obstacles they faced as the scientific community faced the questions of feminism and gender confronting the nation as a whole *A Dictionary of Genetics* Robert C. King, William D. Stansfield, 1997 This edition has been organised to provide a quick understanding to students and non geneticists including over 6 500 definitions of terms and species names relevant to the study of genetics

The Link Between Cancer and Environmental Contaminants and Industrial Carcinogens United States.

Congress. House. Committee on Government Operations. Human Resources and Intergovernmental Relations Subcommittee, 1994 *A Guide to the Human Genome Project* Susan L. Speaker, M. Susan Lindee, Elizabeth Hanson, 1993 This simple concise introduction to the HGP for the general reader explores the origins of the genome project and reactions in the scientific community important technologies and techniques institutions connected with the HGP including designated genome centers important suppliers of resources and corporations systems of communication and ethical legal and social issues A publication of the Biomolecular Sciences Initiative of CHF's Beckman Center for the History of Chemistry
