Furthermore because many women find it difficult to concentrate and focus on what they are supposed to be doing work performance often suffers and they are considerably more likely to suffer accidents when suffering the worst of PMS The bad moods and anxiety associated with premenstrual tension affects all areas of your life Do you really want to keep confusing and upsetting other people with this condition Premenstrual tension can be a baffling for other people to watch and emotionally painful for the woman who is experiencing Many women find themselves emotionally confused by the process and at the mercy of many different distressing symptoms at once It can be excruciating It is just all so overwhelming and also for many women quite frightening For some it feels like they are losing their beauty or like they are losing their mind It also doesn't help that women are often called irrational when they suffer from this disorder It takes away from their credibility and costs them their reputation not only in their personal relationships but on the job This is why it can be crucial for you as a woman to take control and do something about your symptoms Part of winning the battle against the symptoms of premenstrual tension is able to do this is recognizing that this is a process that every woman goes through and being able to identify exactly what is going on in your body That is why in *Curing Premenstrual Tension Naturally* I give you a crash course in just exactly what PMT also known as PMS is all about In this concise informative and easy to read eBook I discuss The prevalence of premenstrual tension in this society and why even women as young as thirteen can experience it How the days leading up to your period are affected by fluctuating hormone levels and how to predict when your symptoms will be worse How the levels of progesterone in your body can especially contribute to mood swings bloating and other problems associated with premenstrual tension How your levels of serotonin the feel good chemical in your brain might be affecting your ability to weather the days leading up to your period and what you can do to elevate this hormone How your family history may predict whether or not you are likely to suffer from PMS How one's general health can affect how well you adjust to the discomfort of premenstrual symptoms How your personality type can impact how you deal with having your period Why sexual intercourse seems more uncomfortable when you have PMS How dramatic falls in estrogen levels work to cause your face to flush and make you feel uncomfortable and anxious in the days leading up to your period How falling estrogen levels can cause you to have a fever and start sweating for no reason How to deal with the onset of skin problems like acne How to deal with the painful swelling breasts that can be one of the symptoms of PMS How changes in hormones can affect every single organ in your body What single activity you can do every day to deal with the weight gain associated with PMS Why some women suffer changes in memory or attention span as their estrogen fluctuates
