On the Ethics of Naturalism William Ritchie Sorley, 2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1885 edition Excerpt seen in a writer such as J S Mill there is a constant goal always set to it in the possible maximum of pleasant feeling It would not have been inconsistent for him however to look upon human nature as capable of developing new susceptibilities for pleasure Progress is made by increasing the amount of pleasure actually got And so far the ideal itself is certainly fixed while progress consists in its gradual realisation But there is no special virtue in having an ideal which is itself progressive A progressive ideal simply means an ideal which is incompletely comprehended and the comprehension of which proceeds gradually with its realisation At any time the definition of such an ideal can only be tentative with the actual assimilation of character to it the intellect comes to grasp its nature with increasing clearness I do not myself think that we can expect to have more than such a tentative and progressive comprehension of the moral ideal of humanity But we must not take objection to a theory because it gives at once a clear and definite view of the final end of conduct though we must not refrain from inquiring how the end is known 1 J T Punnet Ethical Alternatives Mind x 95 2 Science of Ethics p 363 s Natural Law An Essay in Ethics 1877 p 101 But the bearing of the objection to utilitarianism Force of it becomes apparent when we try to

phrases for an effortless more informed read *Moral Virtue and Nature* Stephen R. Brown, 2008-04-10 What make someone a good human being Is there an objective answer to this question an answer that can be given in naturalistic terms For ages philosophers have attempted to develop some sort of naturalistic ethics Against ethical naturalism however notable philosophers have contended that such projects are impossible due to the existence of some sort of gap between facts and values Others have suggested that teleology upon which many forms of ethical naturalism depend is an outdated metaphysical concept This book argues that a good human being is one who has those traits the possession of which enables someone to achieve those ends natural to beings like us Thus the answer to the question of what makes a good human being is given in terms both objective and naturalistic The author shows that neither is ought gaps nor objections concerning teleology pose insurmountable problems for naturalistic virtue ethics This work is a much needed contribution to the ongoing debate about ethical theory and ethical virtue **Ethical Naturalism and the Problem of Normativity** David Copp, 2024 We all have ethical beliefs such as the belief that torture is wrong Ethical beliefs purport to guide our behaviour rather than merely to describe the world and this creates a puzzle What could possibly make some of these beliefs be true Ethical realists hold that there are ethical facts that make some of them true Ethical naturalists contend that these are ordinary natural facts facts that are similar in all relevant respects to physical ones This idea has seemed especially problematic How could it be that any ordinary natural fact has the kind of normativity the action guiding nature that our ethical beliefs point to David Copp answers these puzzles and argues surprisingly that ethical naturalism is better positioned to explain the nature of normativity than its alternatives
