David Elliston Allen

Naturalist In Britain:

The Naturalist in Britain David Elliston Allen, 2021-07-13 At once a major resource for historians of science and an excellent introduction to natural history for the general reader David Allen's *The Naturalist in Britain* established a precedent for investigating natural history as a social phenomenon Here the author traces the evolution of natural history from the seventeenth to the early twentieth centuries from the herbalizings of apprentice apothecaries to the establishment of national reserves and international societies to the emergence of natural history as an organized discipline Along the way he describes the role of scientific ideas popular fashion religious motivations literary influences the increase of leisure time and disposable income and the tendency of like minded persons to form clubs His comprehensive and entertaining discussion creates a vibrant portrait of a scientific movement inextricably woven into a particular culture *The Naturalist in Britain* David Elliston Allen, American Council of Learned Societies, 1976 **The Naturalist in Britain** David Elliston Allen, 1978

Naturalists and Society D.E. Allen, 2024-10-28 The author's aim in these essays which complement his pioneering books on natural history has been to find out more about the different categories of people who engaged in this field in the past and to piece together how the subject has been shaped by changes in society as a whole For long the historical study of natural history was neglected being questionably science as historians of science chose to define that word David Allen's work has done much to remedy this One group of the essays included here seeks to reinterpret and document more fully topics covered in *The Naturalist in Britain* others look at crazes that swept society notably the Victorian mania for fern collecting and at the biographies of some of the leading naturalists in 18th and 19th century Britain *An Environmental History of Wildlife in England 1650 - 1950* Tom Williamson, 2013-12-05 Choice Outstanding Academic Title 2014 While few detailed surveys of fauna or flora exist in England from the period before the nineteenth century it is possible to combine the evidence of historical sources ranging from game books diaries churchwardens accounts and even folk songs and our wider knowledge of past land use and landscape with contemporary analyses made by modern natural scientists in order to model the situation at various times and places in the more remote past This timely volume encompasses both rural and urban environments from 1650 to the mid twentieth century drawing on a wide variety of social historical and ecological sources It examines the impact of social and economic organisation on the English landscape biodiversity the agricultural revolution landed estates the coming of large scale industry and the growth of towns and suburbs It also develops an original perspective on the complexity and ambiguity of man animal relationships in this post medieval period **Naturalists and Society** David Elliston Allen, 2001 The author's aim in these essays which complement his pioneering books on natural history has been to find out more about the different categories of people who engaged in this field in the past and to piece together how the subject has been shaped by changes in society as a whole For long the historical study of natural history was neglected being questionably science as historians of science chose to define that word David Allen's work has done much to remedy this One

group of the essays included here seeks to reinterpret and document more fully topics covered in *The Naturalist in Britain* others look at crazes that swept society notably the Victorian mania for fern collecting and at the biographies of some of the leading naturalists in 18th and 19th century Britain *The Naturalist's Directory*, 1914 **The Naturalists' Directory**, 1882 *The Naturalist*, 1913 *Virginia Woolf and the Study of Nature* Christina Alt, 2010-07-08 Reflecting the modernist fascination with science Virginia Woolf's representations of nature are informed by a wide ranging interest in contemporary developments in the life sciences Christina Alt analyses Woolf's responses to disciplines ranging from taxonomy and the new biology of the laboratory to ethology and ecology and illustrates how Woolf drew on the methods and objectives of the contemporary life sciences to describe her own literary experiments Through the examination of Woolf's engagement with shifting approaches to the study of nature this work covers new ground in Woolf studies and makes an important contribution to the understanding of modernist exchanges between literature and science
