Pragmatist Neurophilosophy: American Philosophy and the Brain John R. Shook, Tibor Solymosi, 2014-04-24 Pragmatist Neurophilosophy American Philosophy and the Brain explains why the broad tradition of pragmatism is needed now more than ever Bringing pragmatist philosophers together with cognitive psychologists and neuroscientists this volume explores topics of urgent interest across neuroscience and philosophy from the perspective of pragmatism Discussing how Charles Peirce William James John Dewey and George Mead benefited from their laboratory knowledge contributors treat America s first generation pragmatists as America s first cognitive scientists They explain why scientists today should participate in pragmatic judgments just as the classical pragmatists did and how current scientists can benefit from their earlier philosophical explorations across the same territory Looking at recent neuroscientific discoveries in relation to classical pragmatists they explore emerging pragmatic views supported

directly from the behavioral and brain sciences and describe how neuropragmatism engages larger cultural questions by adequately dealing with meaningful values and ethical ideals Pragmatist Neurophilosophy is an important contribution to scholars of both pragmatism and neuroscience and a timely reminder that America's first generation of pragmatists did not stumble onto its principles but designed them in light of biology's new discoveries

Nature's Primal Self Nam T. Nguyen, 2011-12-28 Nature's Primal Self examines Corrington's thought called ecstatic naturalism in juxtaposition to both C. S. Peirce's pragmatic and semiotic concept of the self and Karl Jaspers' existential elucidation of Existenz. Peirce's and Jaspers' anthropocentrism is thus corrected by Corrington's ecstatic naturalism. Ecstatic naturalism as a new movement is both a semiotic theoretical method and a metaphysics that probes deeply into the ontological divide between nature naturing and nature natured. Author Nam T. Nguyen attempts to achieve three goals: first to present and elucidate the underlying philosophical concepts of Charles Peirce, Karl Jaspers, and Robert Corrington; second to critique the anthropocentric self of Peirce's semiotic pragmatism and of Jaspers' existential anthropology; and third to introduce the concept of nature's primal self radically grounded in the perspective of ecstatic naturalism as a judicious, more encompassing and richer framework compared to Peirce's semiotic construction of the self and Jaspers' existential concept of Existenz. *Nature and History in American Political Development* James W. Ceaser, Jack N. Rakove, Nancy L. Rosenblum, Rogers M. Smith, James W. Ceaser, 2009-06-30 In this inaugural volume of the Alexis de Tocqueville Lectures, James Ceaser traces the way certain foundational ideas including nature, history, and religion have been understood and used over the course of American history. Ceaser treats these ideas as elements of political discourse that provide the ground for other political ideas such as liberty or equality. Three critical commentators challenge Ceaser's arguments, and a spirited debate about large and enduring questions in American politics ensues. **Nature's Perspectives** Armen Marsoobian, Kathleen Wallace, Robert S.
