Ethical Responses to Nature's Call James Magrini, 2019-06-05 Arguing for a renewed view of objects and nature *Ethical Responses to Nature's Call* considers how it is possible to understand our ethical duties in the form of ethical intuitionism to nature and the planet by listening to and releasing ourselves over to the call or address of nature Blending several strands of philosophical thought such as Graham Harman's Object Oriented Ontology W D Ross's prima facie Alphonso Lingis's phenomenological ethics traceable to The Imperative and Michael Bonnett's ecophilosophy this book offers a unique rejoinder to the problems and issues that continue to haunt humans relationship to nature The origins of such problems and issues largely remain obscured from view due to the oppressive influence of the Cultural Framework which gives form and structure to the ways we understand discourse on and comport ourselves in relation to the natural world Through understanding this Cultural Framework we also come to know the responses we continue to offer in answer to nature's call and address and are then in a position to analyze and assess those responses in terms of their potential ethical weight Such a phenomenon is made possible through the descriptive and interpretive method of eco phenomenology This renewed vision of the human and nature provides direction for our interaction with and behavior toward nature in such a way that the ethical insight offers a diagnosis and provides a potentially compelling prescriptive for environmental ills
