beginning of a period of wonderful exuberance All of the excitement that attends the beginning of a new century and the start of a new millennium together with a growing awareness of the interdependence of nature and culture cannot help but fuel this historic genre I believe that as the genre attracts more and more gifted young writers and addresses increasingly the compelling political and social issues of our time it will gain in stature and maturity offering what Barry Lopez so eloquently called a literature of hope John A Murray from the Introduction John A Murray is Assistant Professor of English at the University of Alaska Fairbanks and the author editor of eleven previous books including *Wild Africa* *Three Centuries of Nature Writing from Africa* *Nature's New Voices* *The Great Bear* *Contemporary Writings on the Grizzly* *The Islands and the Sea* and *A Republic of Rivers*

Reading the Roots Michael P. Branch, 2004 *Reading the Roots* is an unprecedented anthology of outstanding early writings about American nature a rich influential yet critically underappreciated body of work Rather than begin with Henry David Thoreau who is often identified as the progenitor of American nature writing editor Michael P Branch instead surveys the long tradition that prefigures and anticipates Thoreau and his literary descendants The selections in *Reading the Roots* describe a diversity of landscapes wildlife and natural phenomena and their authors represent many different nationalities cultural affiliations religious views and ideological perspectives The writings gathered here also range widely in terms of subject rhetorical form and disciplinary approach from promotional tracts and European narratives of contact with Native Americans to examples of scientific theology and romantic nature writing The volume also includes a critical introduction discussing the cultural scientific and literary value of early American nature writing headnotes that contextualize all authors and selections and a substantial bibliography of primary and secondary sources in the field *Reading the Roots* at last makes early American landscapes and a range of literary responses to them accessible to scholars students and general readers

Nature Writing Don Scheese, 2013-10-28 In this comprehensive study of the genre Don Scheese traces its evolution from the pastoralism evident in the natural history observations of Aristotle and the poetry of Virgil to current American writers He documents the emergence of the modern form of nature writing as a reaction to industrialization Scheese's personal observations of natural settings sharpen the reader's understanding of the dynamics between author and locale His study is further informed by ample use of illustrations and close readings core writers such as Thoreau John Muir and Mary Austin showing how each writer's work exemplifies the pastoral tradition and celebrate a spirit of place in the United States

Some Ideas in Modern American Nature Writing Walter John Herrscher, 1969 *The Woods Stretched for Miles* Marilou Awiakta, 2017-04 From the savannas of south Florida through the hardwood uplands of Mississippi to the high mountains of Tennessee this anthology gathers essays about Southern landscape and nature from 18 writers with ties to the region
