Nature And The Crisis Of Modernity:

Nature and the Crisis of Modernity Raymond Albert Rogers,1994 *Nature and the Crisis of Modernity* Raymond Albert Rogers,1994 Using an innovative and compelling approach Rogers applies social theories to the way we view the natural world and finds that Western humans have made a new last frontier at the edge of town where the trees or oceans begin

Man and Nature Seyyed Hossein Nasr,1990 **Nature and the Environment in Contemporary Religious Contexts** Thomas Donlin-Smith,Muhammad Shafiq,2018-06-11 This collection of essays discusses the human relationship with and responsibilities toward the natural environment from the perspective of religions and the social sciences The chapters examine a variety of conditions that have contributed to the contemporary environmental crisis including abuse of power economic greed industrialization deforestation and unplanned waste management They then discuss concepts from several different religious texts and traditions that promote environmental protection as a sacred moral duty for all humanity Religious concepts such as dharma duty toward Mother Earth tikkun Olam repair of the world khalifa people as deputies of God on earth amanah the universe as a trust in human hands and paticca samuppada dependent co arising are employed to argue that all the components of the biosphere are integral to the cosmos each piece with its own value and role in the harmony of the whole The book makes it clear that religions can become more green and play a helpful role in raising our ecological consciousness and supporting preservation of the environment into the future

Nature and Scripture in the Abrahamic Religions: God, Scripture and the rise of modern science (1200-1700) Jitse M. van der Meer,Scott Mandelbrote,2008 These volumes describe how the development of the different styles of interpretation found in reading scripture and nature have transformed ideas of both the written word and the created world

Nature in Modernity Stephen Duguid,2010 *Nature in Modernity* *Servant Citizen* Queen or Comrade explores the origins and implications of the mastery of nature agenda within Western culture and argues that there is a long standing parallel shadow tradition grounded instead in mutuality respect and reciprocity This is explored in a series of chapters that focus on our hunter gatherer heritage the shift to a more sedentary and agricultural life and the subsequent emergence of mastery of self and nature as the dominant cultural objective The impact of this mastery agenda on the natural environment is explored and a case made that our current ecological crisis has its origins in this tradition of mastery A counter tradition is examined identifying a range of cultural tools grounded in alternative traditions tools that can be used to create a culture of care mutuality and reciprocity in which it will be logical to welcome nature in all its complexity as a fellow citizen

The Nature of Modernism Elizabeth Black,2017-11-22 This books presents the first extended study of the relationship between British modernist poetry and the environment Challenging reductive associations of modernism as predominantly anthropocentric in character and urban in focus the book s central argument is that within British modernist poetry there is a clear and sustained interest in the natural world which has yet to receive adequate critical attention Whilst modernist studies continues to emphasize the

plurality of the movement and the breadth of voices and concerns within it the environmental consciousness of modernist literature and its response to changes to human nature relations following the experience of war and modernity remain largely unexamined Exploring British modernist poetry from an ecocritical perspective offers a fresh approach to the movement and its context and produces original readings of both canonical and more marginalized modernist voices This book opens by discussing the relationship between modernism and ecocriticism and the benefits of creating a dialogue between the two It then presents new readings of Edward Thomas T S Eliot Edith Sitwell and Charlotte Mew that reveal a shared preoccupation with environmental issues and a common desire to find new ways of achieving physical psychological and artistic reconnection with nature Building on the continuing growth of ecocriticism this book demonstrates how green approaches to modernist studies can produce new insights into both individual poets and the modernist movement as a whole making it an essential resource for students of modernism ecocriticism and early twentieth century literature

Nature: From nature to natures : contestation and reconstruction David Inglis, John Bone, Rhoda Wilkie, 2005 Many influential stances within the social sciences regard nature in one of two ways either as none of their concern which is with the social and cultural aspects of human existence or as wholly a social and cultural fabrication But there is also another strand of social scientific thinking that seeks to understand the interplay between social and cultural factors on one side and natural factors on the other These volumes contain the main contributions that have been made within each of these streams of thought The selections illustrate to the reader the complexity of the various positions within these streams and the strengths and limitations of each perspective A new introduction places these articles in their historical and intellectual context and the volumes are completed with an extensive index and chronological table of contents

Nature and Scripture in the Abrahamic Religions: 1700-Present Scott Mandelbrote, Jitse van der Meer, 2009-01-31 The four companion volumes of Nature and Scripture in the Abrahamic Religions contribute to a contextual evaluation of the mutual influences between scriptural exegesis and hermeneutics on the one hand and practices or techniques of interpretation in natural philosophy and the natural sciences on the other We seek to raise the low profile this theme has had both in the history of science and in the history of biblical interpretation Furthermore questions about the interpretation of scripture continue to be provoked by current theological reflection on scientific theories We also seek to provide a historical context for renewed reflection on the role of the hermeneutics of scripture in the development of theological doctrines that interact with the natural sciences Contributors are J Matthew Ashley Robert E Brown Elizabeth Chmielewski Edward B Davis Henri Wijnandus de Krijff Marwa Elshakry Richard England Menachem Fisch George Harinck Bernhard Kleeberg Scott Mandelbrote G Blair Nelson Alexei V Nesteruk Jitse M van der Meer Rob P W Visser and William Yarchin
