and Mental Disorders Norman Sartorius, Julian Leff, Juan José López-Ibor, Mario Maj, Ahmed Okasha, 2005-05-13 According to the World Health Organization's World Health Report 2001 one family in four worldwide has at least one member currently suffering from a mental disorder. This disorder often remains undiagnosed and untreated but the behaviour of the ill person usually has a significant impact on the quality of life of the family and on the mental health of the other members of the family and generates feelings of shame, guilt, helplessness and despair. This book provides a comprehensive picture of currently available evidence about the specific characteristics of the burden on the families of people with the various mental disorders, the coping strategies which increase or decrease this burden, the family interventions of proven efficacy and what should be said and what should not be said to the relatives of people with the various conditions. *Anxiety Disorders* Gerard Emilien, Cecile Durlach, Ulla Lepola, Timothy Dinan, 2012-12-06 In this book the discussion of the normal and pathological aspects of anxiety is critically examined. A chapter on the molecular basis of anxiety is included, outlining the potential of such approach in the discovery of novel effective pharmacological interventions. The face validity, predictability and usefulness of animal models in the design of valid new efficacious products are discussed. Separate chapters dedicated to each particular type of anxiety such as generalized anxiety disorder, social phobia, posttraumatic stress disorder, panic and obsessive compulsive disorder are included. This book should be of benefit to psychiatrists, clinical psychologists, general practitioners, nurses, students and all those engaged in neuropsychiatric research.
