Nature Conservation Law:

Nature Conservation Law Colin T. Reid, 1994 Nature Conservation Law Charles Butler, 2015-12-31 **Legal Obstacles to the Application of Nature Conservation Legislation** Lothar Gündling, Council of Europe, 1997-01-01 **A Manual of Nature Conservation Law** Michael Fry, 2008 *The Law of Nature Conservation* Christopher Rodgers, 2013-03-21 This book provides a detailed account of the UK law of nature conservation. It covers all the extensive laws introduced in recent years to protect and promote the natural world, examining the operation of the legislation in practice. *Nature Conservation in Europe* Graham Tucker, 2023-05-25 European ecosystems and species remain under pressure from intensive agriculture and forestry, fishing, pollution, urban sprawl, invasive species, and climate change. This book provides a detailed description and critical analysis of nature conservation responses, achievements, and failures, motivated by the concerning state of nature and missed biodiversity targets. It summarises Europe's nature and the impact of human activities and then gives an overview of relevant international biodiversity treaties and the EU nature conservation policy and legislative framework. The core of the book comprises chapters written by national experts which cover the UK and twenty-five EU Member States, providing comparative case studies from which valuable lessons are drawn. Covering wide-ranging topics such as biodiversity pressures, legislation, and governance, biodiversity strategies, species protection, protected areas, habitat management, and funding, this book is of interest to a wide audience, including academics and professionals involved in nature conservation and related environmental fields. **The New Nature Conservation Law of the RSFSR.** Erwin Bucholz, Joint Publications Research Service (Arlington, Va.), 1961 The Privatisation of Biodiversity? Colin T. Reid, Walters Nsoh, 2016-08-26 Current regulatory approaches have not prevented the loss of biodiversity across the world. This book explores the scope to strengthen conservation by using different legal mechanisms such as biodiversity offsetting, payment for ecosystem services, and conservation covenants, as well as tradable development rights and taxation. The authors discuss how such mechanisms introduce elements of a market approach, as well as private sector initiative and resources. They show how examples already in operation serve to highlight the design challenges, legal, technical, and ethical, that must be overcome if these mechanisms are to be effective and widely accepted. **The New Nature Conservation Law of the RSFSR.** Erwin Bucholz, 1961 **Research Handbook on EU Environmental Law** Marjan Peeters, Mariolina Elia, 2020-06-26 This comprehensive Research Handbook discusses how the EU has used its regulatory power to steer towards environmentally friendly behaviour, delving into the deep concerns related to the compliance with and enforcement of EU environmental law. It also highlights the important role of civil society's use of environmental procedural rights and characterizes how the CJEU case law has contributed to the effective implementation of EU environmental legislation.
