Nature Of Paleolithic Art:

The Nature of Paleolithic Art R. Dale Guthrie, 2005 Publisher Description **Humans, Nature, and Birds** Darryl Wheye, Donald Kennedy, 2008-01-01 This book invites readers to enter a two floor virtual gallery where 60 plus images of birds reflecting the accomplishments of human pictorial history are on display These are works in a genre the authors term Science Art that is art that says something about the natural world and how it works Darryl Wheye and Donald Kennedy show how these works of art can advance our understanding of the ways nature has been perceived over time its current vulnerability and our responsibility to preserve its wealth Each room in the gallery is dedicated to a single topic The rooms on the first floor show birds as icons birds as resources birds as teaching tools and more On the second floor the images and their captions clarify what Science Art is and how the intertwining of art and science can change the way we look at each The authors also provide a timeline linking scientific innovations with the production of images of birds and they offer a checklist of steps to promote the creation and accessibility of Science Art Readers who tour this unique and fascinating gallery will never look at art depicting nature in the same way again Published with assistance from the Alfred P Sloan Foundation s Public Understanding of Science and Technology Program The Idea of Wilderness Max Oelschlaeger, 1991-01-01 How has the concept of wild nature changed over the millennia And what have been the environmental consequences In this broad ranging book Max Oelschlaeger argues that the idea of wilderness has reflected the evolving character of human existence from Paleolithic times to the present day An intellectual history it draws together evidence from philosophy anthropology theology literature ecology cultural geography and archaeology to provide a new scientifically and philosophically informed understanding of humankind s relationship to nature Oelschlaeger begins by examining the culture of prehistoric hunter gatherers whose totems symbolized the idea of organic unity between humankind and wild nature and idea that the author believes is essential to any attempt to define human potential He next traces how the transformation of these hunter gatherers into farmers led to a new awareness of distinctions between humankind and nature and how Hellenism and Judeo Christianity later introduced the unprecedented concept that nature was valueless until humanized Oelschlaeger discusses the concept of wilderness in relation to the rise of classical science and modernism and shows that opposition to modernism arose almost immediately from scientific literary and philosophical communities He provides new and in some cases revisionist studies of the seminal American figures Thoreau Muir and Leopold and he gives fresh readings of America s two prodigious wilderness poets Robinson Jeffers and Gary Snyder He concludes with a searching look at the relationship of evolutionary thought to our postmodern effort to reconceptualize ourselves as civilized beings who remain in some ways natural animals **The Life of Imagination** Jennifer Anna Gosetti-Ferencei, 2018-10-30 Imagination allows us to step out of the ordinary but also to transform it through our sense of wonder and play artistic inspiration and innovation or the eureka moment of a scientific breakthrough In this book Jennifer Anna Gosetti Ferencei offers a groundbreaking new understanding

of its place in everyday experience as well as the heights of creative achievement The Life of Imagination delivers a new conception of imagination that places it at the heart of our engagement with the world thinking acting feeling making and being Gosetti Ferencei reveals imagination's roots in embodied human cognition and its role in shaping our cognitive ecology She demonstrates how imagination arises from our material engagements with the world and at the same time endows us with the sense of an inner life how it both allows us to escape from reality and aids us in better understanding it Drawing from philosophy cognitive science evolutionary anthropology developmental psychology literary theory and aesthetics Gosetti Ferencei engages a spectacular range of examples from ordinary thought processes and actions to artistic scientific and literary feats to argue that like consciousness itself imagination resists reductive explanation The Life of Imagination offers a vital account of transformative thinking that shows how imagination will be essential in cultivating a future conducive to human flourishing and to that of the life around us

[Philosophy of Nature](#) Paul K. Feyerabend, 2016-09-13 Philosopher physicist and anarchist Paul Feyerabend was one of the most unconventional scholars of his time His book Against Method has become a modern classic

Yet it is not well known that Feyerabend spent many years working on a philosophy of nature that was intended to comprise three volumes covering the period from the earliest traces of stone age cave paintings to the atomic physics of the 20th century a project that as he conveyed in a letter to Imre Lakatos almost drove him nuts Damn the Naturphilosophie The book's manuscript was long believed to have been lost Recently however a typescript constituting the first volume of the project was unexpectedly discovered at the University of Konstanz In this volume Feyerabend explores the significance of myths for the early period of natural philosophy as well as the transition from Homer's aggregate universe to Parmenides uniform ontology He focuses on the rise of rationalism in Greek antiquity which he considers a disastrous development and the associated separation of man from nature Thus Feyerabend explores the prehistory of science in his familiar polemical and extraordinarily learned manner The volume contains numerous pictures and drawings by Feyerabend himself It also contains hitherto unpublished biographical material that will help to round up our overall image of one of the most influential radical philosophers of the twentieth century [Reading Prehistoric Human Tracks](#) Andreas Pastoors, Tilman
