ANTI-SUBMARINE WEAPONS
AIR-LAUNCHED ANTI-SHIPING WEAPONS
ROCKETS AND EARLY MISSILES

There is no shortage of reference on the weapons that fought the Second World War, but the weapons they carried have been largely ignored, except for the most basic particulars. This situation is entirely rectified by this new book, which is completely encyclopaedic in scope and largely based on original research. Divided by country (including those powers not officially involved in the war), the book covers all the major weaponry of the period. Weapons of earlier design which were employed during the war, and those in experimental, trials or development stages in 1945, are also included.

Features include:

- Summary of factors affecting naval armament design and procurement
- Technical introductions to each weapon type, covering fire control, propellant, projectiles, etc
- Over 500 tables of data

- In-depth descriptions of every weapon, its characteristics, design history and performance
- More than 500 illustrations including detailed plans and drawings.

Considering its size, scope and complexity, *Naval Weapons of World War Two* must be regarded as one of the most important naval reference works of recent years.

Naval Weapons Of World War Two:

Naval Weapons of World War Two N. J. M. Campbell, John Campbell, 1985 *British Naval Weapons of World War Two* Norman Friedman, 2020-07-30 John Lambert was a renowned naval draughtsman whose plans were highly valued for their accuracy and detail by modelmakers and enthusiasts By the time of his death in 2016 he had produced over 850 sheets of drawings many of which have never been published These have now been acquired by Seaforth and this is the third of a planned series of albums on selected themes reproducing complete sheets at a large page size with an expert commentary and captioning The initial volumes concentrate on British naval weaponry used in the Second World War thus completing the project John Lambert was working on when he died His interest was always focused on smaller warships and his weapons drawings tend to be of open mountings the kind that present a real challenge to modelmakers rather than enclosed turret guns but he also produced drawings of torpedo tubes underwater weapons fire control directors and even some specific armament related deck fittings Following the earlier volumes on destroyer and escort armament this one covers the multitude of weapons carried by Coastal Forces many of which were improvised ad hoc or obsolescent but eventually leading to powerful purpose designed weaponry An appendix covers the main deck guns carried by British submarines of this era The drawings are backed by introductory essays by Norman Friedman an acknowledged authority on naval ordnance while a selection of photographs adds to the value of the book as visual reference Over time the series will be expanded to make this unique technical archive available in published form a move certain to be welcomed by warship modellers enthusiasts and the many fans of John Lambert's work *Secret Weapons and World War II* Walter E. Grunden, 2005 Grunden's analysis of this fundamental flaw in the Japanese war effort seamlessly weaves together science technology and military history to provide an entirely unique look at a crucial but understudied aspect of World War II Comparing the science and weapons programs of all the major combatants he demonstrates that Japan's failure was nearly inevitable given its paucity of strategic resources an inadequate industrial base the absence of effective centralized management to coordinate research military hostility toward civilian scientists and bitter interservice rivalries In the end Japan could not overcome these obstacles and thus failed to make the transition to the kind of Big Science it needed to ward off its enemies and dominate the Far East

BOOK JACKET *The Royal Navy, 1930-2000* Richard Harding, 2005 This book explores innovation within the Royal Navy from the financial constraints of the 1930s through to the refocusing of the Royal Navy after 1990 *The U.S. Navy's "Interim" LSM(R)s in World War II* Ron MacKay, Jr., 2016-05-03 The Interim LSM R or Landing Ship Medium Rocket was a revolutionary development in rocket warfare in World War II and the U S Navy's first true rocket ship An entirely new class of commissioned warship and the forerunners of today's missile firing naval combatants these ships began as improvised conversions of conventional amphibious landing craft in South Carolina's Charleston Navy Yard during late 1944 They were rushed to the Pacific Theatre to support the U S Army and Marines with heavy rocket bombardments that devastated

Japanese forces on Okinawa in 1945 Their primary mission was to deliver maximum firepower to enemy targets ashore Yet LSM R s also repulsed explosive Japanese speed boats rescued crippled warships recovered hundreds of survivors at sea and were deployed as antisubmarine hunter killers Casualties were staggering enemy gunfire blasted one while kamikaze attacks sank three crippled a fourth and grazed two more This book provides a comprehensive operational history of the Navy s 12 original Interim LSM R s

Imperial Japanese Navy Heavy Cruisers 1941-45 Mark Stille,2012-05-20 Designed with little more than a passing nod to the international naval treaties of the inter war period the Imperial Japanese Navy s heavy cruisers were fast and heavily armed Like the other vessels of the Japanese Navy the heavy cruisers were technologically superior to and far more innovative than their Allied rivals whom they met in many of the major Pacific Theatre battles including Midway and Leyte Gulf Mark Stille continues his study of the IJN of WWII with this fascinating topic addressing the design and development of all 18 ships in the six heavy cruiser classes from pre war construction and mid war alterations to their operational histories and eventual fates

US Standard-type Battleships 1941-45 (2) Mark Stille,2015-12-20 This book completes an authoritative two part study on the Standard type US battleships of World War II ships that were designed to fight a different type of war than the one that unfolded It gives precise technical details of the design history and features of the Tennessee Colorado and the unfinished South Dakota and Lexington classes whilst providing an operational history of the former two Written by a leading expert on the US Navy in World War II and augmented by contemporary photographs and specially commissioned illustrations this is the other half of the story of the US Standard type battleships from the terrible damage they sustained at Pearl Harbor to their support of the war winning landings of the US Marine Corps and US Army

World War Two in Europe David T. Zabecki,1999 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company

The Bullet , The Royal Navy 1930-1990 Richard Harding,2004-11-25 This new book explores innovation within the Royal Navy from the financial constraints of the 1930s to World War Two the Cold War and the refocusing of the Royal Navy after 1990 Successful adaptation to new conditions has been critical to all navies at all times
