New Ways In Teaching Young Children:

Teaching Young Children: Choices In Theory And Practice Mac Naughton, Glenda, Williams, Gillian, 2008-11-01 This book presents early childhood students and staff with a broad and diverse range of teaching techniques to support children's learning. It examines 26 techniques ranging from simple ones such as describing and listening to more complex methods such as deconstruction and scaffolding. The strategies selected are derived from the best current research knowledge about how young children learn. A detailed evaluation of each strategy enables childcare staff, early childhood teachers and students to expand their repertoire of teaching strategies and to critically evaluate their own teaching in early childhood settings. Vignettes and examples show how early childhood staff use the techniques to support children's learning and help to bring the discussion of each technique to life. Revised and updated in light of the latest research, new features include: Coverage of the phonics debate; Addition of ICT content; Questions for further discussion; Revision to the chapter on problem solving; Updated referencing throughout. *Teaching Young Children* is key reading for students and experienced early childhood staff working in diverse settings with young children.

New Ways to Think and Learn with Metacognition Pamela R. Cook, Judith McConnell Mikkelsen, 2025-02-26 There is a global interest in the development and effectiveness of metacognition which is the concept of thinking about thinking. This book marries a powerful reckoning of 33 contributing scholars from the countries of Belize, Canada, England, Malaysia, Russia, Scotland and 8 states within the United States of America. Techniques and strategies to develop heightened metacognitive behaviours are included in this book. Eighteen chapters comprise topics related to metacognition such as its interconnectedness with children's thinking and learning as evident for example in the Montessori Method, how it impacts the lives of culturally and linguistically diverse students, its role in drama, dance and television programs including its presence in epistemic trust in educational pedagogy, obsessive compulsive disorders and as a bridge to those who are deaf and hard of hearing. Metacognition is everywhere; one can see it, feel it, hear it, move with it and if given the opportunity taste the success of metacognition.
