New Zealand English:

New Zealand English Elizabeth Gordon, Lyle Campbell, Jennifer Hay, Margaret MacLagan, Andrea Sudbury, Peter Trudgill, 2004-05-20 New Zealand English at just 150 years old is one of the newest varieties of English and is unique in that its full history and development are documented in extensive audio recordings. The rich corpus of spoken language provided by New Zealand's mobile disk unit has provided insight into how the earliest New Zealand born settlers spoke and consequently how this new variety of English developed. On the basis of these recordings this book examines and analyses the extensive linguistic changes New Zealand English has undergone since it was first spoken in the 1850s. The authors, all experts in phonetics and sociolinguistics, use the data to test previous explanations for new dialect formation and to challenge current claims about the nature of language change. The first ever corpus based study of the evolution of New Zealand English, this book will be welcomed by all those interested in phonetics, sociolinguistics, historical linguistics and dialectology.

New Zealand English and English in New Zealand Elizabeth Gordon, Tony Deverson, 1998 19 interviews and examples of New Zealand speech. Interviews with Mrs Hannah Cross, Mr Malcolm Ritchie, Mrs Anne E Hamilton, Mrs Catherine Dudley, Mrs Brenda Bell, Sir Stephen Allen, Mr Jack Osmer, and Mrs R. Also two contemporary Southland speakers. Readings include a Māori accented speaker.

New Zealand Ways of Speaking English Allan Bell, Janet Holmes, 1990 This book examines the sociolinguistics and pragmatics of New Zealand English. The book details the structure and use of NZ English in a range of different social and regional contexts. Topics covered include the question of a New Zealand pidgin, changes in attitude to NZ English and differences in New Zealand women's and men's speech.

The Dictionary of New Zealand English H. W. Orsman, 1997 The Dictionary of New Zealand English provides a unique historical record of New Zealand words and phrases from their earliest use to the present day. Its 6 000 main headword entries and 9 300 separate subentries provide fascinating insights into New Zealand's diverse linguistic heritage. Coverage includes words and phrases originating from New Zealand such as chateau, cardboard dog, dosing, glide, time, judder, bar, nappy valley and peggy square, which reflect a lively local penchant for innovation, while others such as biddy, bid and taihoa illustrate the unique influence of the Māori language. Many of the entries such as hotel, rabbit proof and remittance man have a particular meaning in New Zealand or have special historical significance. Other examples such as yacker merely confirm New Zealand's special relationship with Australia.

New Zealand English Allan Bell, Koenraad Kuiper, 2000-02-15 New Zealand English is currently one of the most researched varieties of English world wide. This book presents an up to date account of all the major aspects of New Zealand English by leading scholars as well as younger specialists in each of the major fields of enquiry. The book is authoritative in its range and represents not only a synopsis of past research but also new research in many areas of study. It is of interest not just to specialists in regional varieties of English but many of the chapters detail new approaches to the study of dialect phenomena. It contains an introduction describing the external history of New Zealand

surprising that previous research focused on lexical and phonological aspects of NZE and practically neglected grammatical peculiarities New Zealand English Grammar Fact or Fiction presents a careful comparative analysis of parallel corpora of New Zealand British American and Australian English in order to single out morphological syntactic and lexico grammatical features typical of an emerging New Zealand standard In addition to corpus data on regional variation the author uses data on short term diachronic change within British and American English to show how regional variation is closely related to both stylistic variation a world wide colloquialisation of the written norms of English and ongoing linguistic change leading to temporal regional differences NZE is different from other national varieties of English in terms of preferences for certain variants rather than categorically different grammatical rules Nevertheless it is a standard in its own right in so far as it is a typical mix of variants available in World English The methodological approach combines both qualitative analyses and statistical evidence The question in how far statistically significant differences in word frequencies can be shown to be linguistically significant is also relevant for other quantitative research into emerging national standards

Accents of English John Christopher Wells,1982 Accents of English is about the way English is pronounced by different people in different places Volume I provides a synthesizing introduction which shows how accents vary not only geographically but also with social class formality sex and age and in volumes 2 and 3 the author examines in greater depth the various accents used by people who speak English as their mother tongue the accents of the regions of England Wales Scotland and Ireland volume 2 and of the USA Canada and West Indies Australia New Zealand South Africa India Black Africa and the Far East volume 3 Each volume can be read independently and together they form a major scholarly survey of considerable originality which not only includes descriptions of hitherto neglected accents but also examines the implications for phonological theory
