Fifth Discipline he and his associates have frequently been asked by the business community How do we go beyond the first steps of corporate change How do we sustain momentum They know that companies and organizations cannot thrive today without learning to adapt their attitudes and practices But companies that establish change initiatives discover after initial success that even the most promising efforts to transform or revitalize organizations despite interest resources and compelling business results can fail to sustain themselves over time That s because organizations have complex well developed immune systems aimed at preserving the status quo Now drawing upon new theories about leadership and the long term success of change initiatives and based upon twenty five years of experience building learning organizations the authors of The Fifth Discipline Fieldbook show how to accelerate success and avoid the obstacles that can stall momentum The Dance of Change written for managers and executives at every level of an organization reveals how business leaders can work together to anticipate the challenges that profound change will ultimately force the organization to face Then in a down to earth and compellingly clear format readers will learn how to build the personal and organizational capabilities needed to meet those challenges These challenges are not imposed from the outside they are the product of assumptions and practices that people take for granted an inherent natural part of the processes of change And they can stop innovation cold unless managers at all levels learn to anticipate them and recognize the hidden rewards in each challenge and the potential to spur further growth Within the frequently encountered challenge of Not Enough Time for example the lack of control over time available for innovation and learning initiatives lies a valuable opportunity to reframe the way people organize their workplaces This book identifies universal challenges that organizations ultimately find themselves confronting including the challenge of Fear and Anxiety the need to diffuse learning across organizational boundaries the ways in which assumptions built in to corporate measurement systems can handcuff learning initiatives and the almost unavoidable misunderstandings between true believers and nonbelievers in a company Filled with individual and team exercises in depth accounts of sustaining learning initiatives by managers and leaders in the field and well tested practical advice The Dance of Change provides an insider s perspective on implementing learning and change initiatives at such corporations as British Petroleum Chrysler Dupont Ford General Electric Harley Davidson Hewlett Packard Mitsubishi Electric Royal DutchShell Shell Oil Company Toyota the United States Army and Xerox It offers crucial advice for line level managers executive leaders internal networkers educators and others who are struggling to put change initiatives into practice

Education for Sustainable Development Brian Chalkley,Martin Haigh,David Higgitt,2013-09-13 In 2005 The United Nations launched its Decade of Education for Sustainable Development which recognises that education including Higher Education is the key to the change in social attitudes that will be needed to protect the welfare of future generations This involves helping learners to live as though the future matters and to achieve ecoliteracy This includes the understanding that personal lifestyle decisions may have consequences ranging from climate change through loss of biodiversity to pollution and resource depletion that may

permit environmental degradation on a planetary scale It also involves helping them to develop the skills needed to cope with such challenges This international collection of research papers and position statements from special issues of the Journal of Geography in Higher Education and Applied Environmental Education and Communication written by many of the leading practitioners in the field aims to provide resources and practical guidance for all seeking to promote and engage in education for a sustainable future Rabindranath Tagore encouraged each learner to make their actions demonstrate a harmonious union between education and environment David Orr argued that the world needs people who live well in their places to make the world both habitable and humane and that the main challenge for education is to help learners make their minds fit for life on Earth This book tries to chart a practical route towards these objectives This book was previously published as special issues of the Journal of Geography in Higher Education and Applied Environmental Education and Communication

James Alison and a Girardian Theology John P. Edwards, 2020-05-14 Opening with a Foreword by James Alison this volume is the first in depth treatment of Alison s theological method John P Edwards shows that Alison s theological project outstrips Ren Girard s application of mimetic theory to theology He concludes that an explicitly Christian theological perspective is necessary for providing a fully coherent account of Girard s notions of conversion and mimetic desire This volume grounds Alison s theological method in his understanding of the ongoing interaction between conversion and theological reflection which is informed by his use of mimetic theory While Alison describes this method as theology in the order of the discovery the author refers to it as an inductive theology The volume closes by demonstrating that such a theology bears fruit in a renewed understanding of the value of Christian doctrines and particularly the doctrine of revelation

Expectations and Demands in Online Teaching: Practical Experiences Walter Gudea, Sorin, 2008-05-30 Despite the considerable growing interest in online education most studies have focused only on the students perspective Merely a handful of studies have attempted to address the teachers perspectives and little has been published on the online teaching experience itself Expectations and Demands in Online Teaching Practical Experiences offers a better understanding of how teachers experience the online environment by exploring various dimensions of online teaching including class preparation process effectiveness and quality and technology utilization The book assists educational institution administrators supporting online education improve their understanding of how teachers experience online teaching and of the issues these teachers face in their teaching
