## **Operation Desert Storm Evaluation Of The Air Campaign:**

Operation Desert Storm Kwai-Cheung Chan, 1998-03 This is the unclassified version of a classified report 85% of the original classified material is presented in this report Addresses the use and performance of aircraft munitions and missiles employed during the air campaign the validity of DoD and manufacturer claims about weapon systems performance particularly those systems utilizing advanced technology the relationship between cost and performance of weapon systems and the extent that air campaign objectives were met Discusses LGB accuracy F 117 and TLAM effectiveness IADS capabilities target sensor technologies combat support platforms and more **Operation Desert Storm** DIANE Publishing Company, 1996-11 Operation Desert Storm was primarily a sustained 43 day air campaign by the U S and its allies against Iraq between Jan 17 1991 and Feb 28 1991 It was the first large employment of U S air power since the Vietnam War and by some measures it was the most successful war fought by the U S in the 20th century The main ground campaign occupied only the final 100 hours of the war This report is a comprehensive evaluation of the use and effectiveness of the various aircraft munitions and other weapon systems used in this victorious air campaign Operation Desert Storm evaluation of the air campaign : report to the Ranking Minority Member, Committee on Commerce, House of Representatives / United States General Accounting Office. , 1997 *Operation Desert Storm* , 1997 This report is the unclassified version of a classified report that we issued in July 1996 on the Operation Desert Storm air Campaign The Department of Defense DoD reevaluated the security classification of the original report and as a result about 85 percent of the material originally determined to be classified has subsequently been determined to be unclassified and is presented in this report The data and findings in this report address 1 the use and performance of aircraft munitions and missiles employed during the air campaign 2 the validity of DOD and manufacturer claims about weapon systems performance particularly those systems utilizing advanced technology 3 the relationship between cost and performance of weapon systems and 4 the extent that Desert Storm air campaign objectives were met **Operation Desert Storm** , 1997 *Operation Desert Storm* , 1997

**Operation Desert Storm** United States. General Accounting Office, 1996 Operation Desert Storm. Evaluation of the Air War , 1996 This report evaluates the use and effectiveness of the various aircraft munitions and other weapon systems used in the victorious air campaign in Operation Desert Storm in order to aid the Congress in future procurement decisions Over 5 years ago the United States and its coalition allies successfully forced Iraq out of Kuwait The performance of aircraft and their munitions cruise missiles and other air campaign systems in Desert Storm continues to be relevant today as the basis for significant procurement and force sizing decisions For example the Department of Defense DOD Report on the Bottom Up Review BUR explicitly cited the effectiveness of advanced weapons used in Desert Storm including laser guided bombs LGBs and stealth aircraft as shaping the BUR recommendations on weapons procurement **OPERATION DESERT STORM: EVALUATION OF THE AIR CAMPAIGN... 158928, B-276599... U.S. GAO... JUNE 12, 1997** United States.

General Accounting Office,1998\* *Indexes for Abstracts of Reports and Testimony* ,1998 **Strategic Air Power in Desert Storm** John Andreas Olsen,2013-11-05 In response to the Iraqi invasion of Kuwait on the second of August 1990 a small group of air power advocates in the Pentagon proposed a strategic air campaign Operation Desert Storm designed to drive the Iraqi army from Kuwait by a sustained effort against the major sources of Iraqi national power John Andreas Olsen provides a coherent and comprehensive examination of the origins evolution and implementation of this campaign His findings derive from official military and political documentation interviews with United States Air Force officers who were closely involved with the planning of the campaign and Iraqis with detailed knowledge and experience of the inner workings of the Iraqi regime **A Toolbox for the Application of the Rules of Targeting** Tetyana (Tanya) Krupiy,2016-02-29 How military commanders interpret the rules of targeting impacts not only on whether civilians and civilian objects are harmed in the course of a military operation but also on the scale of harm that ensues Commentators have queried whether military commanders observed the law even when parties to a conflict acted in accordance with mandates to protect civilians as was the case when a coalition of states bombed targets in Libya in 2011 However limited guidance is publicly available on how military commanders apply these rules on the battlefield In order to allow military commanders to exercise judgment in determining what steps they are required to take to spare civilians in a specific set of circumstances the rules of targeting are formulated in an open ended fashion which complicates one s ability to evaluate whether a particular military operation complies with the law By examining case studies ranging from Operation Desert Storm in 1991 to Operation Protective Edge in 2014 this book addresses lacunae in current scholarship It puts forward principles which capture how military commanders deliberate while interpreting what the rules of targeting require in particular scenarios International humanitarian law this book contends places a duty on attackers to assume risk in order to mitigate danger to civilians Drawing on the field of psychology this study provides an explanation of how military commanders assess when circumstances do not permit them to inform civilians about a forthcoming attack *Abstracts of Reports and Testimony* ,1998 **The Effectiveness of Airpower in the 20Th Century** Capt. John O'Connell USN,2006-08-17 The book reviews the actual effectiveness of military air power in accomplishing desired military and political goals in a number of conflicts following WWII During the Korean War and the Vietnam War U S air power attempted a re run of WWII aerial activities However in both conflicts political constraints prevented the United States from achieving its desired political results although the 1972 B 52 strategic bombing campaign against Hanoi worked to bring the North Vietnamese back to the negotiating table The Falklands Malvinas War pitted the UK against Argentina in a remote corner of the South Atlantic Air power allowed a U K victory barely The USSR held air supremacy over Afghanistan but was unable to subdue tough Afghan guerrillas and was finally forced to withdraw after Stinger missiles were introduced The Gulf War demonstrated the increasing effectiveness of precision aerial weaponry The conflict in Kosovo finally produced a result long sought by air

power enthusiasts an end to fighting brought about by air attack alone [Air Warfare in the Missile Age](#) Lon O. Nordeen, 2014-12-02 Lon O Nordeen has completely updated his 1985 chronicle of military aviation's evolving role in warfare now covering the major conflicts of the past four decades. He presents the historical and political background of each conflict and includes in depth discussions of the aircraft weapons tactics training new systems and other factors that influenced the outcome of each war. New and existing chapters have been enhanced with information based on recently declassified material especially regarding Vietnam and new sources in Egypt Israel and the former Soviet Union. As smart bombs have become more successful in reducing the risks for pilots and frontline troops air missile warfare has become the central player in military conflicts. *Air Warfare in the Missile Age* Second Edition is a valuable resource for understanding the evolution of modern air warfare.

*Foreign Policy* Robert J. Lieber, 2017-03-02 The best writing on foreign policy integrates theory and policy in ways that address the principal questions about a country's place in the world and encourage the reader to think about contemporary questions from a long term perspective. Accordingly the essays in this volume have been chosen with an eye to whether they represent important and original thinking and are likely to remain relevant. The authors included here represent diverse views about foreign policy and the international context in which it takes place. While two dozen pieces chosen from a vast literature can never be definitive nevertheless each of these articles offers a thoughtful reasoned and often eloquent assessment that is likely to remain a reference point for those seriously interested in the subject. The work is organized into five sections: how to think about foreign policy, the domestic context, foreign policy and unipolarity, foreign policy after 9/11 and foreign policy and the future.

**Wastrels of Defense** Winslow Wheeler, 2013-11-15 In this damning expose a veteran senate defense advisor argues that since Sept 11 2001 the conduct of the U.S. Congress has sunk to new depths and endangered the nation's security. Winslow Wheeler draws on three decades of work with four prominent senators to tell in lively detail how members of Congress divert money from essential war fighting accounts to pay for pork in their home states, cook the budget books to pursue personal agendas and run for cover when confronted with tough defense issues. With meticulous documentation to support his claims he contends that this behavior is not confined to one party or one political philosophy. He further contends that senators who sell themselves as reformers and journalists covering Capitol Hill are simply not doing their jobs. Pork is far from a new phenomenon in Washington yet most Americans fail to understand its serious consequences. Wheeler knows the harm it does and challenges citizens to take action against lawmakers pretending to serve the public trust while sending home the bacon. Dubbed a Hill Deep Throat who participated in the game he now criticizes he fills his book with evidence of Congressional wrongdoing naming names and citing specific examples. Pointing to the extremes that have become routine in the legislative process he focuses on defense appropriations and Congress's willingness to load down defense bills with pork in some cases with the Pentagon's help. On the question of deciding war he accuses today's members of Congress of lacking the character of their predecessors often positioning themselves on both

sides of the question of war against Iraq without probing the administration's justifications Wheeler concludes with a model for reform that he calls twelve not so easy steps to a sober Congress *The American Culture of War* Adrian R.
