Clementi,S. Chin,2012-12-06 This volume collects a number of the invited lectures and a few selected contrib utions presented at the International Symposium on Structure and Dynamics of Nucleic Acids Proteins and Membranes held August 31st through September 5th 1986 in Riva del Garda Italy The title of the conference as well as a number of the topics covered represent a continuation of two previous conferences the first held in 1982 at the University of California in San Diego and the second in 1984 in Rome at the Accademia dei Lincei These two earlier conferences have been documented in Structure and Dynamics Nucleic Acids and Proteins edited by E Clementi and R H Sarma Adenine Press New York 1983 and Structure and Motion Membranes Nucleic Acids and Proteins edited by E Clementi G Corongiu M H Sarma and R H Sarma Adenine Press New York 1985 At this conference in Riva del Garda we were very hesitant to keep the name of the conference the same as the two previous ones Indeed a number of topics discussed in this conference were not included in the previous ones and even the emphasis of this gathering is only partly reflected in the conference title An alternative title would have been Structure and Dynamics of Nucleic Acids Proteins and Higher Functions or possibly higher components rather than higher functions **Dynamics of Proteins and Nucleic Acids** J. Andrew McCammon,Stephen C. Harvey,1988-04-29 This book is a self contained introduction to the theory of atomic motion in proteins and nucleic acids An understanding of such motion is essential because it plays a crucially important role in biological activity The authors both of whom are well known for their work in this field describe in detail the major theoretical methods that are likely to be useful in the computer aided design of drugs enzymes and other molecules A variety of theoretical and experimental studies is described and these are critically analyzed to provide a comprehensive picture of dynamic aspects of biomolecular structure and function The book will be of interest to graduate students and research workers in structural biochemistry X ray diffraction and NMR theoretical chemistry liquids and polymers biophysics enzymology molecular biology pharmaceutical chemistry genetic engineering and biotechnology **Biomedical Index to**

Structure, Dynamics and Function of Biomolecules Anders Ehrenberg,Rudolf Rigler,Astrid Gräslund,Lennart Nilsson,2012-12-06 This is a collection of papers presented and discussed at the first EBSA workshop held at Saltsj6baden outside stockholm in Sweden July 6 10 1986 The common theme of these papers is dynamics of biomolecules and how the dynamics depends on the molecular structure and organi zation and connects to and determines the biological function This is a rapidly expanding field of research which combines many different aspects of molecular bio physics Much material is new and presented for the first time Even if the work so far has been of the kind that is usually called basic research practical applications are clearly indicated in some articles and are waiting around the corner in several other cases At the workshop only one third of the time was used for the formal presentations and two thirds for discussion To this should also

be added discussions during the poster sessions During these lively and unrecorded discussions fresh viewpoints emerged and new ideas were created Ad mittedly our knowledge at present is only fragmentary but when pieces of the puzzle are brought together at a workshop or in a publication of this kind more extended and sometimes unexpected contours and shapes become vi sible It is our hope that this rapid publication of camera ready manuscripts will transfer some of the spi rit at the workshop to the reader and in his or her institute or laboratory initiate further discussions bring forward more ideas and start new experimental ap roaches **Cumulated Index Medicus** ,1998
