Real People Personal Identity Without Thought Experiments:

Real People Kathleen V. Wilkes, 1988 A study of the scope and limits of the concept of a person covering methodology of thought experimentation real life conditions such as infancy insanity and dementia and looking at different views of the person found in Homer Aristotle the post Cartesians and contemporary cognitive science **Personal Identity** Ellen Frankel Paul, Fred Dycus Miller, Jeffrey Paul, 2005 What is a person What makes me the same person today that I was yesterday or will be tomorrow Philosophers have long pondered these questions In Plato's Symposium Socrates observed that all of us are constantly undergoing change we experience physical changes to our bodies as well as changes in our manners customs opinions desires pleasures pains and fears Aristotle theorized that there must be some underlying substratum that remains the same even as we undergo these changes John Locke rejected Aristotle's view and reformulated the problem of personal identity in his own way is a person a physical organism that persists through time or is a person identified by the persistence of psychological states by memory These essays written by prominent philosophers and legal and economic theorists offer valuable insights into the nature of personal identity and its implications for morality and public policy

Models of the Self Shaun Gallagher, Jonathan Shear, 1999 A comprehensive reader on the problem of the self as seen from the perspectives of philosophy development psychology robotics cognitive neuroscience psychopathology semiotics phenomenology and contemplative studies all focused on a keynote paper Thought Experiment Tamar Szabo Gendler, 2014-01-14 This book offers a novel analysis of the widely used but ill understood technique of thought experiment The author argues that the powers and limits of this methodology can be traced to the fact that when the contemplation of an imaginary scenario brings us to new knowledge it does so by forcing us to make sense of exceptional cases **Self and Subjectivity** Kim Atkins, 2008-04-15 Self and Subjectivity is a collection of seminal essays with commentary that traces the development of conceptions of self and subjectivity in European and Anglo American philosophical traditions including feminist scholarship from Descartes to the present **Information Systems and Qualitative Research** Allen Lee, Jonathon Liebenau, Janice I. DeGross, 2013-06-05 This book contains the papers presented and discussed at the conference that was held in May/June 1997 in Philadelphia Pennsylvania USA and that was sponsored by Working Group 8.2 of the International Federation for Information Processing IFIP established 8.2 as a group concerned with the interaction of information systems and the organization Information Systems and Qualitative Research is essential reading for professionals and students working in information systems in a business environment such as systems analysts developers and designers data administrators and senior executives in all business areas that use information technology as well as consultants in the fields of information systems management and quality management **Controversies and the Metaphysics of Mind** Yaron M. Senderowicz, 2010 Since ancient times metaphysical theories have been shaped by the dialectical relations between metaphysical positions The present book offers a new account of the role of controversies in the evolution of ideas in current

metaphysics of mind Part One develops a pragmatic theory of metaphysical controversies that combines Kantian themes and themes from current argumentation theory The theory developed in this book underscores the role of a unique type of dialectical arguments which establish metaphysical positions as controversial relevant alternatives in the evolution of chains of debates in metaphysics In Part Two and Part Three this theory is applied to chains of debates in present day metaphysics of mind which address the problems of consciousness and personal identity One of the contentions defended in this book is that the intellectual history of metaphysics is not a process in which positions are replaced by opposite positions but rather a history of their status as relevant alternatives The book analyzes in detail and demonstrates how progress in contemporary metaphysics of mind consists in a dialectical process through which challenges to extant positions lead to innovative alternatives that are intrinsically relevant to advancing the understanding of the issues under discussion **Practical**

Identity and Narrative Agency Kim Atkins,Catriona Mackenzie,2013-05-13 The essays collected in this volume address a range of issues that arise when the focus of philosophical reflection on identity is shifted from metaphysical to practical and evaluative concerns They also explore the usefulness of the notion of narrative for articulating and responding to these issues The chapters written by an outstanding roster of international scholars address a range of complex philosophical issues concerning the relationship between practical and metaphysical identity the embodied dimensions of the first personal perspective the kind of reflexive agency involved in the self constitution of one s practical identity the relationship between practical identity and normativity and the temporal dimensions of identity and selfhood In addressing these issues contributors engage with debates in the literatures on personal identity phenomenology moral psychology action theory normative ethical theory and feminist philosophy **The Broadview Introduction to Philosophy** Andrew

Bailey,2019-05-21 The Broadview Introduction to Philosophy is a comprehensive anthology that surveys core topics in Western philosophy including philosophy of religion theories of knowledge metaphysics ethics social political philosophy and issues of life death and happiness Unlike other introductory anthologies the Broadview offers considerable apparatus to assist the student reader in understanding the texts without simply summarizing them Each selection includes an introduction discussing the context and structure of the primary reading as well as thorough annotations designed to clarify unfamiliar terms references and argument forms Canonical texts from the history of philosophy are presented alongside contemporary scholarship women authors are included throughout *Rethinking Human Nature* Malcolm

Jeeves,2011-02-23 How do the many exciting recent scientific discoveries in neuroscience psychology evolutionary biology genetics and paleoanthropology challenge and complicate but also enrich and illuminate the traditional Christian portrait of human nature In *Rethinking Human Nature* an international team of scientists historians philosophers and theologians presents both the wisdom of the past and the cutting edge of present and developing scientific research to explore answers to this vital question Their discussions examining our brains our genes our ancestors our societies and more will help us

develop a more nuanced and complete understanding of what it really means to be human Contributors Evandro Agazzi R J Berry Alison S Brooks Franco Chiereghin Felipe Fernandez Graeme Finlay Joel Green Malcolm Jeeves Jrgen Mittelstrass David G Myers Janet Martin Soskice Fernando Vidal **Body & Soul** J. P. Moreland, Scott B. Rae, 2000-03-24 The rise of science has called into question the existence of the soul and even many Christian intellectuals view the soul as an outdated and unbiblical concept J P Moreland and Scott B Rae present a vigorous philosophical and ethical defense of human nature as body and soul examining Christian dualism as it impinges on critical ethical concerns *The Bioethics Reader* Ruth F. Chadwick, Helga Kuhse, Willem A. Landman, Udo Schüklenk, Peter Singer, 2007-09-04 A collection celebrating some of the best essays from the Blackwell journals Bioethics and Developing World Bioethics Contributors include Helga Kuhse Michael Selgelid and Baroness Mary Warnock former Chair of the British Government's Committee of Inquiry into Human Fertilization and Embryology's Traces some of the most important concerns of the 1980s such as the ethics of euthanasia reproductive technologies the allocation of scarce medical resources surrogate motherhood through to a range of new issues debated today particularly in the field of genetics Includes contributions that are still as hotly debated today as they were 20 years ago and serves as a salutary reminder that free and open discussion is vital to the health of the discipline itself Includes eight sections comprising some of the journals best publications in methodological issues the health care professional patient relationship public health ethics research ethics genetics as well as beginning and end of life issues Will serve the academic bioethicists as well as students of bioethics as an excellent source book **Ignorant Cognition** Selene Arfini, 2019-02-19 This book offers a comprehensive philosophical investigation of ignorance Using a set of cognitive tools and models it discusses features that can describe a state of ignorance if linked to a particular type of cognition affecting the agent's social behavior belief system and inferential capacity The author defines ignorance as a cognitive condition that can be either passively and unconsciously borne by an agent or actively nurtured by him or her and a condition that entails epistemic limitations which can be any lack of knowledge belief information or data that affect the agent's behavior belief system and inferential capacity The author subsequently describes the ephemeral nature of ignorance its tenacity in the development of human inferential and cognitive performance and the possibility of sharing ignorance among human agents within the social dimension By combining previous frameworks such as the naturalization of logic the eco cognitive perspective in philosophy and concepts from Peircean epistemology and adding original ideas derived from the author's own research and reflections the book develops a new cognitive framework to help understand the nature of ignorance and its influence on the human condition **The British Empiricists** Stephen Priest, 2007-09-25 The Empiricists represent the central tradition in British philosophy as well as some of the most important and influential thinkers in human history Their ideas paved the way for modern thought from politics to science ethics to religion The British Empiricists is a wonderfully clear and concise introduction to the lives careers and views of Hobbes Locke Berkeley Hume Mill Russell and Ayer Stephen Priest examines

each philosopher and their views on a wide range of topics including mind and matter ethics and emotions freedom and the physical world language truth and logic The book is usefully arranged so that it can be read by thinker or by topic or as a history of key philosophical problems and equips the reader to recognize and practice philosophical thinking understand the methods of solving philosophical problems used by the British Empiricists appreciate the role of empiricism in the history of Western philosophy For any student new to philosophy Western philosophy or the British Empiricists this masterly survey offers an accessible engaging introduction

Oxford Studies in Experimental Philosophy, Volume 2 Tania Lombrozo, Joshua Knobe, Shaun Nichols, 2018-03-02 The new field of experimental philosophy has emerged as the methods of psychological science have been brought to bear on traditional philosophical issues Oxford Studies in Experimental Philosophy is the place to go to see outstanding new work in the field It features papers by philosophers papers by psychologists and papers co authored by people in both disciplines The series heralds the emergence of a truly interdisciplinary field in which people from different disciplines are working together to address a shared set of questions This second volume in the series is divided into three sections that explore epistemology moral and political philosophy and metaphysics and mind

Engaging Characters Murray Smith, 2022-05-12 Characters those fictional agents populating the fictional worlds we spend so much time absorbed in are ubiquitous in our lives We track their fortunes judge their actions and respond to them with anger amusement and affection indeed the whole palette of human emotions Powerfully drawn characters transcend their stories entering into our imaginations and deliberations about the actual world acting as analogies and points of reference And yet there has been remarkably little sustained and systematic reflection on these creatures that absorb so much of our attention and emotional lives In Engaging Characters Murray Smith sets out a comprehensive analysis of character exploring the role of characters in our experience of narrative and fiction Smith s analysis focuses on film and also illuminates character in literature opera song cartoons new and social media At the heart of this account is an explanation of the capacity of characters to move us Teasing out the various dimensions of character Smith explores the means by which films draw us close to characters or hold us at a distance from them and how our beliefs and attitudes are formed and sometimes reformed by these encounters Integrating these arguments with research on emotion in philosophy psychology evolutionary theory and anthropology Engaging Characters advances an account of the nature of fictional characters and their functions in fiction imagination and human experience In this revised twenty fifth anniversary edition of Engaging Characters Smith refines and extends the arguments of the first edition with a substantial new introduction reviewing the debates on emotion empathy and film spectatorship that the book has inspired

Biology and Subjectivity Miguel García-Valdecasas, José Ignacio Murillo, Nathaniel F. Barrett, 2016-08-26 Some may consider that the language and concepts of philosophy will eventually be superseded by those of neuroscience This book questions such a naive assumption and through a variety of perspectives and traditions the authors show the possible contributions of philosophy to non

reductive forms of neuroscientific research Drawing from the full range and depth of philosophical thought from hylomorphism to ethics by way of dynamical systems enactivism and value theory amongst other topics this edited work promotes a rich form of interdisciplinary exchange Chapters explore the analytic phenomenological and pragmatic traditions of philosophy and most share a common basis in the Aristotelian tradition Contributions address one or more aspects of subjectivity in relation to science such as the meaning and scope of naturalism and the place of consciousness in nature or the relation between intentionality teleology and causality Readers may further explore the nature of life and its relation to mind and then the role of value in mind and nature This book shows how philosophy might contribute to real explanatory progress in science while remaining faithful to the full complexity of the phenomena of life and mind It will be of interest to both philosophers and neuroscientists as well as those engaged in interdisciplinary cooperation between philosophy and science

Narrative Identity and Moral Identity Kim Atkins, 2008-06-03 This book is part of the growing field of practical approaches to philosophical questions relating to identity agency and ethics approaches which work across continental and analytical traditions and which Atkins justifies through an explication of how the structures of human embodiment necessitate a narrative model of selfhood understanding and ethics

Personal Ontology Andrew Brenner, 2024-03-14 Presents the main competing accounts of personal ontology that we are either souls or we are composite physical objects of some sort

Religion and Science in Context Willem B. Drees, 2009-09-10 How should we think about religion science and their relationship in modern society Some religious groups oppose evolution some atheists claim science is on their side Others reconcile their beliefs with science or consider science and faith to deal with fundamentally different aspects of human life What indeed is religion belief or trust in God s existence How do we distinguish sense from superstition What does science have to say on such issues Willem B Drees considers contemporary discussions of these issues in Europe and North America using examples from Christianity and religious naturalism and reflections on Islam and Tibetan Buddhism He argues that the scientific understanding leaves open certain ultimate questions and thus allows for belief in a creator but also for religious naturalism or serious agnosticism By analysing the place of values in a world of facts and the quest for meaningful stories in a material world *Religion and Science in Context* offers an original and self critical analysis of the field its assumptions and functions and ends with a vision of its possible future
