Finance at the Threshold Christopher Houghton Budd,2016-04-15 Every banking crisis whatever its particular circumstances has two features in common with every previous one Each has been preceded by a period of excessive monetary ease and by ill thought out regulatory changes For many the recent hiatus in inter bank lending has been seen as a blip enormous in size and global in scope but nonetheless a blip *Finance at the Threshold* offers a unique perspective from an English economic and monetary historian In it the author asks Why did the banks stop lending to one another and why now Was it merely a matter of over loose credit due to the relaxation of traditional prudence or did global finance find itself at its limits Have government bail outs saved the day or merely postponed the problem Christopher Houghton Budd offers a radical view of the global financial crisis spanning a wide gamut of current thinking He argues that we need above all to overcome the left right divide so much taken for granted today and promote financial literacy to young people His contribution to the Transformation and Innovation Series claims that global finance has brought us to the limits of what

mechanistic economic explanations can capture New ideas and above all new instruments are needed so that innovation can shift from its dexterous exploitation of inefficiencies and turn its attention instead to fresh initiative Finance at the Threshold is essential reading for academics and practitioners concerned with financial and economic policy and needing to develop a sense of the history thus understanding the forward prospects for global finance *How to Conduct Qualitative Research in Finance* Dan Kaczynski,Michelle Salmona,Tom Smith,2024-07-05 Asserting that the qualitative research paradigm is entrenched in the social sciences as a discipline in its own right this book brings together finance and qualitative research to encourage researchers to expand their respective bodies of knowledge In doing so it promotes a synergy of insights through the mixing of perspectives Providing a comprehensive guide for finance researchers on how to produce impactful qualitative research this book is a vital resource for teaching as well as one s own research *Against the Crisis* Ståle Holgersen,2024-11-26 Capitalism produces crises and crises reproduce capitalism We need an ecosocialist way out If crisis defines our era we need a coherent socialist policy in response St le Holgersen delves into today s economic and ecological crises to demonstrate that they are not exceptions to an otherwise functioning system but integral to its operation It is naive to see these upheavals as opportunities for reform or revolution They are the bedrock of the status quo Fortunately the vicious circle sustaining capitalism is not founded on an iron law Our historical mission in the face of the climate crisis is to create a historical exception to the rule It is time for ecosocialism against crisis *Advances in Entrepreneurial Finance* Rassoul Yazdipour,2010-12-17 *Advances in Entrepreneurial Finance* brings together contributions from researchers from the fields of entrepreneurship behavioral finance psychology and neuroscience to shed new light on the dynamics of decision making and risk taking by entrepreneurs and venture capitalists VCs Every new venture requires access to capital at competitive interest rates and much has been written on general entrepreneurship by management scholars and financial contracting by financial economists using traditional finance theory with all its highly restrictive assumptions regarding decision makers cognitive capabilities and behavior But recent developments in behavioral finance can now be applied to understand how entrepreneurs and VCs perceive risk and uncertainty and how they decide and act accordingly Showcasing the latest research this volume demonstrates that findings from the behavioral and neuroscience arenas can and do explain decision making by entrepreneurs and venture investors in the real world Consequently such findings have practical implications not only for entrepreneurs venture capitalists and their advisors but also all government agencies and NGOs that want to support product and technological innovation capital formation job creation and economic development
