Indigenous Women, Work, and History Mary Jane Logan

McCallum, 2014-05-02 When dealing with Indigenous women's history we are conditioned to think about women as private sphere figures circumscribed by the home, the reserve, and the community. Moreover, in many ways Indigenous men and women have been cast in static, pre-modern and one-dimensional identities, and their twentieth-century experiences reduced to a singular story of decline and loss. In *Indigenous Women, Work, and History*, historian Mary Jane Logan McCallum rejects both of these long-standing conventions by presenting case studies of Indigenous domestic servants, hairdressers, community health representatives, and nurses working in modern Native ways between 1940 and 1980. Based on a range of sources including the records of the Departments of Indian Affairs and National Health and Welfare, interviews, and print and audio-visual media, McCallum shows how state-run education and placement programs were part of Canada's larger vision of assimilation and extinguishment of treaty obligations. Conversely, she also shows how Indigenous women link these same programs to their social and cultural responsibilities of community building and state resistance. By placing the history of these modern workers within a broader historical context of Aboriginal education and health, federal labour programs, post-war Aboriginal economic and political developments, and Aboriginal professional organizations, McCallum challenges us to think about Indigenous women's history in entirely new ways.

The Politics of Social, Ecological, and Structural Determinants of Health in Canada Elizabeth McGibbon, 2024-11-22 *The Politics of Social, Ecological, and Structural Determinants of Health in Canada* is the first Canadian book to examine intersections of social, ecological, and structural determinants of health as the crucial pathway to tackling growing health inequities in Canada. Critical perspectives on the social and ecological determinants of health are explored using detailed and easily accessible case studies. Each chapter integrates how health and illness are rooted in social, economic, and political structures with clear explanations of how societal power and ruling relations so strongly determine human and planetary health. Bringing together health, social, ecological, and political sciences, this text makes the case that the structural determinants of health are increasingly urgent and pivotal markers of who lives and who dies. The text also explores earth-centred policy and governance strategies to lessen and halt extreme inequities. This powerful text will serve a broad scope of readers, including students and researchers in health, social, and geological sciences, practitioners, and policy makers, and people in non-governmental and not-for-profit organizations.

Faculty of Nursing on the Move Geertje Boschma, 2005 *Faculty of Nursing on the Move* provides a historical analysis of the Faculty of Nursing at the University of Calgary in contrast and comparison to the broader evolution of academic nursing in Canada. It addresses how the faculty has responded to important social trends and changes in health care policy and helps the reader to understand contemporary nursing issues. Starting with the dramatic changes in health care policy after the Second World War, it establishes the role of nursing education as pivotal to a growing health care industry. The book then moves on to describe the challenge of developing an identity for an academic unit within the larger

academic and health care structure This book will be of particular interest to anyone involved in women s studies as it represents a case study for broader women s issues within an academic environment **Nursing and Globalization in the Americas** Karen Lucas Breda,Ray Elling,2018-02-06 Nursing is vital to millions of people worldwide This book details the ebb and flow of its fascinating history and politics through case studies from Brazil Argentina Chile Colombia Mexico Canada and the United States Authors from across the Americas share findings and explore new thinking about Western hemisphere specific issues that affect nursing and health care Using economic globalization as an overarching framework these cross national case studies show the strengths and contradictions in nursing elucidating common themes and examining successes The partnership of authors shapes a collective understanding of nursing in the Americas and forms a basis for enduring hemisphere wide academic exchange Thus the book offers a new platform for understanding the struggles and obstacles of nursing in a climate of globalization as well as for understanding nursing s richness and accomplishments Because politics economics health and nursing are inextricably linked this volume critically explores the intersections among political economies and nursing and health care systems The historical and contextual background allows readers to make sense of how and why nursing in the Americas has taken on its present form
