Reality Illusion An Overview Of Course Metaphysics Paperback By Perry:

Reality and Illusion Robert Perry, 2002-09 A Course in Miracles is a spiritual path which focuses on the forgiveness of others and the release from guilt and fear Despite this practical focus the entire path rests on a very lofty vision of ultimate reality The foundation of the Course consists of its answers to age old questions What is real Does God exist What is our essential nature Why are we here How did we get here The Course s answers are profound but often hard to understand This book attempts to organize the Course s metaphysics into a coherent understandable picture Part I presents the Course s view of reality Part II then talks about illusion telling of our primordial break from reality which resulted in this illusory world of separated existence Book jacket

Reality Jan Westerhoff, 2011 What is real has been one of the key questions of philosophy since its beginning in antiquity But it is not just a question that philosophers ask This book discusses what reality is by looking at a variety of arguments theories and thought experiments from philosophy physics and cognitive science **Illusion and reality** John Raymond Dugan, 1973 Reality Is But a Dream Helen D. Vandeman, 2010-03 If this is reality why is there so much unhappiness in the world How do we know that what we see is reality How do we know we re not asleep and dreaming If the world is a dream whose dream is it And what power do we have in the dream To find lasting happiness and peace let alone awaken from the dream we must surrender everything we believe about reality about life and most definitely about ourselves Advanced praise for *Reality Is But a Dream* The notion of flowing one way time is perhaps the most basic illusion that exists and is a major cause of human suffering and the fear of death and annihilation *Reality Is But a Dream* is an invitation to give up this illusion in favor of a more fulfilling accurate version of reality Larry Dossey MD Author *The Power of Premonitions* A profound and

insightful glimpse into the nature of perception and the self Vandeman's book challenges us to reconsider what we take for reality and inspires us to wake up from our illusions about what that reality is Richard Smoley Author The Dice Game of Shiva How Consciousness Creates the Universe Helen D Vandeman is an intuitive and author of We Are One Using Intuition to Awaken to Truth and The Thresholds of Intention Crossing from Dreaming to Awakening She lives in Berkeley CA and can be reached through her website <http://helenvandeman.byregion.net> Dynamic Idealism Alfred H. Perception Adam Pautz, 2021 Perception is one of the most pervasive and puzzling problems in philosophy generating a great deal of attention and controversy in philosophy of mind, psychology and metaphysics If perceptual illusion and hallucination are possible how can perception be what it intuitively seems to be a direct and immediate access to reality How can perception be both internally dependent and externally directed Perception is an outstanding introduction to this fundamental topic covering both the perennial and recent work on the problem Adam Pautz examines four of the most important theories of perception: the sense datum view, the internal physical state view, the representational view and naïve realism, assessing each in turn He also discusses the relationship between perception and the physical world and the issue of whether reality is as it appears Useful examples are included throughout the book to illustrate the puzzles of perception including hallucinations, illusions, the laws of appearance, blindsight and neuroscientific explanations of our experience of pain, smell and color The book covers both traditional philosophical arguments and more recent empirical arguments deriving from research in psychophysics and neuroscience The addition of chapter summaries, suggestions for further reading and a glossary of terms make Perception essential reading for anyone studying the topic in detail as well as for students of philosophy of mind, philosophy of psychology and metaphysics
