Modern Political Theory Varma S.P.,1975 Modern Political Theory critically examines the contemporary state of political theory making an assessment of the achievements and limitations of the Behavioural Revolution in its totality and reviews objectively the major paradigms and conceptual frameworks adopted by the discipline The salient features of the contending conceptual models elaborated by leading scholars operating from separate locations and disparate premises have been highlighted and intellectual inter linkages in their works have been traced The book has 3 parts Part I comprises the scope of political science as a discipline Part II deals with the tools and techniques of political analysis Part III delineates mainstreams of contemporary political thought National Union Catalog ,1956 Includes entries for maps and atlases

Zen-Existentialism Lit-sen Chang,2011-07-21 Modern man has found that material achievements are failing him but in his escape from despair he has become an easy prey for the deceptive cult of Zen Existentialism There has emerged a mode of radical New Humanism with its emphasis on human autonomy In place of the God man appears the man god There is a search for the world within the limitless inner space the expansion of consciousness and the transcendental experience of Satori First published in 1969 this book prophetically anticipated the growth of New Age developments in the decades to follow Lit sen Chang directly spoke to the Hippie movement of his day which was then seeking various means of transcendence through drugs and eastern mysticism This book also reflects fifty years of bitter experiences of the author s spiritual pilgrimage and shows how he was miraculously delivered by the grace and power of God from his cul de sac Chang writes of the utter futility of the fantasy of the East analyzes the root causes of the crises in the West and points out the doom of auto soterism after his careful diagnosis of the human problem in cultural philosophical religious and theological terms

Existentialism, 1948 **Action and Ethics in Aristotle and Hegel** Gary Pendlebury, 2017-07-05 Pendlebury alleges that abstraction and rationalization have had a strong and malign influence on normative moral philosophy in the 20th century Criticizing writers such as Hare Rawls and Scanlon for pursuing a conception of moral philosophy that bears little resemblance to the way in which human beings actually think and conduct themselves Pendlebury instead suggests a Virtue Ethics inspired by Hegel's and Aristotle's accounts of action as a corrective to this trend showing that moral activity is historically and socially based and must address the formed character of individual agents This trend which began with the responses by Locke Hume and Kant to Descartes Meditations rendered moral philosophy individualistic and psychologistic in contrast to Aristotle and Hegel's claim that man is essentially a social creature Pendlebury argues that this should be the starting point of any account and understanding of morality which roots the concept of will in the practical activity involved in being a member of an ethical community rather than an abstract metaphysical entity that is supposedly in the possession of individuals In providing a critique of modern moral philosophy from this perspective Pendlebury's line of enquiry lends much support to Virtue Ethics as exemplified in the work of Hursthouse and Slote while taking a more combative approach with those with whom he disputes In doing so he shows that serious considerations of continental philosophy highlights the richness of moral activity absent from analytical tradition which for so long has been bent on marginalizing it **The**

Sementelli, 2020-12-28 Knowledge does not happen in a vacuum yet scholars and other professionals tend to engage in management scholarship focused on their specific niche often without knowing if or how their work might relate to other research streams Further exacerbating things people within specific disciplines including management tend not to communicate regularly outside of their relatively homogeneous audiences If we were able to bridge communication among these groups scholars and practitioners we might be able to better understand one another in a way that is contextually informed by each other's experiences Sementelli argues that understanding concepts of power agency and experience can provide such tools to orient management theories and practices relative to one another Using critical management thought to frame a discussion of ontology and how knowledge emerges from it enables the development of an orienting sandbox that works both practically and intellectually Such a sandbox enables us not just to communicate one's organizational priorities but also reveal some underlying reasons for those priorities and areas of inquiry This monograph focuses on public administration in particular as a special case of critical management research This book also examines the complexity of experiences of being using Karl Jaspers as a basis The sandbox that emerges can be used as a way to organize and orient
