**Forgotten Heritage** Curt Landry,2019-01-15 A timely and groundbreaking take on the roots of the Christian church and its place in the entirety of God's kingdom There is no better time than now to learn about and become firmly grounded within your spiritual heritage from the foreword by Perry Stone The early church was made up of Jewish and Gentile followers of Jesus and the church's culture was rooted in Judaism and a Jewish understanding of God's relationship to His people Over time however Christianity became increasingly more Roman than Jewish and the church lost its identity Rabbi Curt Landry's personal story is remarkably similar Born to a Jewish mother and a Catholic father Landry was put up for adoption and for more than thirty years he had no understanding of his heritage his roots or who his parents were But when he discovered the truth of his story his life changed completely The key to a life of power and purpose is understanding who you are In this revelatory book Curt Landry helps Christians discover their roots in Judaism empowering them to walk in the revelation of who they really are and who they are born to be **Reclaiming Our Forgotten Heritage** reveals the mysteries of the church letting Christians grasp the power that comes from connecting with their true identity *Finding Lost, Season 6* Nikki

**First and Last Bank** Gustav Peebles, 2025-06-17 A groundbreaking approach to currency and community that may allow us to seize carbon from the atmosphere and offer a new tool in the fight against climate change Through the ages currencies have been based on all manner of objects from tobacco leaves to salt to gold to collateralized debt obligations The only thing that this odd assortment of objects shares is the communal belief that these objects could harness and direct economic growth that they are in a sense fertile In *The First and Last Bank* Gustav Peebles and Benjamin Luzzatto propose that atmospheric carbon could be seen anew as fertile in this same sense In other words carbon rather than loom as waste in our skies could instead be drawn down to the earth by millions of currency users and the communally owned banks they rely on where it could serve as a foundation of new biological life Seeing currency as a powerful tool for collective action the authors argue that dovetailing developments in digital currencies and the biosequestration of carbon have together made a new and radical intervention in the climate battle possible a nonproprietary currency backed by sequestered carbon This new currency would be managed via Wikipedia style open source policies that privilege sustainability and equity over endless growth and pollution Because it is backed by sequestered carbon the use of the currency would draw gaseous carbon out of the atmosphere and push it back into the ground following the exact same trajectory as gold during the era of the international gold standard While it is no silver bullet such a currency would act as a necessary complement to wide scale mitigation efforts at the same time engaging ordinary citizens in the fight to reduce the dangerous levels of carbon in our atmosphere
