understood their relationships with their families households and the world within a framework of religious duty and virtue For urban middling and labouring individuals religious practice and the influence of faith was not limited to time spent in church or chapel but extended into all areas of activity and experience the workplace the streets and other public spaces and the home The importance of faith in the lived experience of town dwellers was not something that existed in spite of change faith was promoted by the new conditions of urban life Faith in the Town explores key decades of this transformational period encompassing almost a century of urban development between 1740 and 1830 By placing lay religious belief centre stage this book demonstrates that many of the developments associated with modernity specifically industrialisation urbanisation population growth and Enlightenment thinking were not inimical to faith Instead religious belief and lay piety was a crucial element in the formation of urban economy society and culture during the long eighteenth century meaning that northern towns were not only places where faith could both be nourished and flourish but that these urban centres were themselves shaped by faith Catholic Faith and Practice in England, 1779-1992 Margaret H.
