**Urban Guerrilla Warfare** Anthony James Joes, 2007-04-20 Guerrilla insurgencies continue to rage across the globe fueled by ethnic and religious conflict and the easy availability of weapons At the same time urban population centers in both industrialized and developing nations attract ever increasing numbers of people outstripping rural growth rates worldwide As a consequence of this population shift from the countryside to the cities guerrilla conflict in urban areas similar to the violent response to U S occupation in Iraq will become more frequent *Urban Guerrilla Warfare* traces the diverse origins of urban conflicts and identifies similarities and differences in the methods of counterinsurgent forces In this wide ranging and richly detailed comparative analysis Anthony James Joes examines eight key examples of urban guerrilla conflict spanning half a century and four continents Warsaw in 1944 Budapest in 1956 Algiers in 1957 Montevideo and S o Paulo in the 1960s Saigon in 1968 Northern Ireland from 1970 to 1998 and Grozny from 1994 to 1996 Joes demonstrates that urban insurgents violate certain fundamental principles of guerrilla warfare as set forth by renowned military strategists such as Carl von Clausewitz and Mao Tse tung Urban guerrillas operate in finite areas leaving themselves vulnerable to encirclement and ultimate defeat They also tend to abandon the goal of establishing a secure base or a cross border sanctuary making precarious combat even riskier Typically urban guerrillas do not solely target soldiers and police they often attack civilians in an effort to frighten and disorient the local population and discredit the regime Thus urban guerrilla warfare becomes difficult to distinguish from simple terrorism Joes argues persuasively against committing U S troops in urban counterinsurgencies but also offers cogent recommendations for the successful conduct of such operations where they must be undertaken

*Iran Since the Revolution (RLE Iran D)* Sepehr Zahir, 2012-04-27 Since the turn of the century Iran has experienced three major political upheavals in the struggle to democratize her political systems The last revolution inaugurated an era of unprecedented turmoil and instead of fulfilling its democratic aim paved the way for an even

more despotic theocracy To put the revolution in a proper perspective some attempt is made to explain the reasons for Khomeini's success in acquiring first the symbolic leadership of the anti Shah revolution and then the monopolistic control of power in Iran How and why the other claimants to power were shunted aside and later brutally repressed is a further theme for discussion The domestic and external ramifications of the revolution are examined in detail in particular the rise of the anti American feeling which culminated in the hostage crisis In conclusion an analysis is offered of the instrumentalities of power available to the Islamic Republic and several scenarios are explored in which Iran's competing forces may converge to determine whether this third revolution will finally succeed in subordinating political authority to popular democratic consent

**The State against Society** Grzegorz Ekiert,1996-09-30 Classical images of state socialism developed in contemporary social sciences were founded on simple presuppositions State socialist regimes were considered to be politically stable due to their pervasive institutional and ideological control over the everyday lives of their citizens impervious to reform and change and representative of extreme political and economic dependency Despite their contrasting historical experiences they have been treated as basically identical in their institutional design social and economic structures and policies Grzegorz Ekiert challenges this notion in a comparative analysis of the major political crises in post

1945 East Central Europe Hungary 1956 63 Czechoslovakia 1968 76 and Poland 1980 89 The author maintains that the nature and consequences of these crises can better explain the distinctive experiences of East Central European countries under communist rule than can the formal characteristics of their political and economic systems or their politically dependent status He explores how political crises reshaped party state institutions redefined relations between party and state institutions altered the relationship between the state and various groups and organizations within society and modified the political practices of these regimes He shows how these events transformed cultural categories produced collective memories and imposed long lasting constraints on mass political behavior and the policy choices of ruling elites These crises shaped the political evolution of the region produced important cross national differences among state socialist regimes and contributed to the distinctive patterns of their collapse Major Events of the Nuclear Age Erik V.
