Miller, Robert D. Truog, 2012 This book challenges conventional medical ethics by exposing the inconsistency between the reality of end of life practices and established ethical justifications of them **Behind the White Coat** Dr Steve Farber, Steven H. Farber, 2003-03-15 Practical Decision Making in Health Care Ethics Raymond J. Devettere, 2009-12-04 For nearly fifteen years Practical Decision Making in Health Care Ethics has offered scholars and students a highly accessible and teachable alternative to the dominant principle based theories in the field Devettere's approach is not based on an ethics of abstract obligations and duties but following Aristotle on how to live a fulfilled and happy life in short an ethics of personal well being grounded in prudence the virtue of ethical decision making This third

edition is revised and updated and includes discussions of several landmark cases including the tragic stories of Terri Schiavo and Jesse Gelsinger the first death caused by genetic research Devettere addresses new topics such as partial birth abortion law embryonic stem cell research infant euthanasia in The Netherlands recent Vatican statements on feeding tubes organ donation after cardiac death new developments in artificial hearts clinical trials developed by pharmaceutical companies to market new drugs ghostwritten scientific articles published in major medical journals and controversial HIV AIDS research in Africa This edition also includes a new chapter on the latest social and political issues in American health care Devettere s engaging text relies on commonsense moral concepts and avoids academic jargon It includes a glossary of legal medical and ethical terms an index of cases and thoroughly updated bibliographic essays at the end of each chapter that offer resources for further reading It is a true classic brilliantly conceived and executed and is now even more valuable to undergraduates and graduate students medical students health care professionals hospital ethics committees and institutional review boards and general readers interested in philosophy medicine and the rapidly changing field of health care ethics

Last Rights Barbara Logue,1993-01-01 Several recent trends demographic social and economic are increasing the incidence and public support of deliberate death among the old and sick The number of elderly people is at an all time high Medical technology can prolong the lives of these men and women but it cannot keep them independent free of pain or competent to manage their own affairs Never before have so many been so sick for so long Changes in the size and structure of the American family make long term home care almost impossible while exorbitant health costs and scarce resources limit the provision of highquality care by paid workers Researcher Barbara J Logue refers to any deliberate behavior that causes death as death control She points out that death control like birth control involves very serious and deeply personal decisions choices that ought to be made on the basis of reliable information with care and compassion without coercion She goes on to assert that like birth control death control should be performed legally and with the help of the medical community Without access to assisted deaths many frail old people are left to endure wretched deaths Some die slowly of neglect or malnutrition in nursing homes Others take their own lives sometimes by violent means while they can still act independently because they are afraid that no one will help them if they wait until they are very sick Some die alone fearful of implicating friends or relatives in their back alley euthanasia While some die too soon because they are poor uneducated or hard to manage others are overtreated and their deaths delayed because doctors and hospitals want to increase their income or fearprosecution if they help a patient die Barbara Logue describes these and many other hazards inherent in our present long term care system noting that all too often the system causes suffering instead of alleviating it After assessing the alternatives she urges that we must make compassionate death control as available as birth control We must regulate and monitor it like any other medical procedure taking steps to minimize the risks while maximizing the benefits

Health Care Policy in an Age of New Technologies Kant Patel,Mark E Rushefsky,2015-05-20 Revolutionary

advances in biomedical research and information systems technology pose new and difficult issues for American health care policy especially in the context of managed care Health Care Policy in a New Millennium takes on this challenging array of issues where the dignity of individual life meets the imperatives of national level health care systems patients rights rationing of care organ transplants genetic research confidentiality of medical records the right to die and other ethical dilemmas The book places these critical questions about the quality of life in our society in their political legal social economic and ethical contexts

The Patient's Wish to Die Christoph Rehmann-Sutter, Heike Gudat, Kathrin Ohnsorge, 2015-06-04 Wish to die statements are becoming a frequent phenomenon in terminally ill patients Those confronted by these statements need to understand the complexity of such wishes so they can respond competently and compassionately to the requests If misunderstood the statements can be taken at face value and the practitioner may not recognise that a patient is in fact experiencing ambivalent feelings at the end of life or they may misinterpret the expressed wish to die as a sign of clinical depression Public debate about the morality and ethics of various end of life care options has exploded in recent years However it has never been sensitive to the finer aspects of clinical reality or the experiences of patients The Patient's Wish to Die Research Ethics and Palliative Care brings together that reality and the patient's voice combining them with different research approaches It presents the best available knowledge and research methodologies about patients wishes at the end of life together with a series of ethical views and a discussion about the clinical implications for palliative care The book presents material in an open and unbiased manner whilst remaining sensitive to the spiritual and existential dimensions of dying and to the different cultural views that provide meaning to the individual Written by the best specialists and ethics scholars from around the world including palliative care practitioners and end of life scholars from countries where assisted dying practices are legalized and from those where it isn't The Patient's Wish to Die Research Ethics and Palliative Care will prove essential reading for all those working or studying in the field of palliative care
