The Right to Strike under the European Court of Human Rights Charalampos Stylogiannis, 2017-01-09 Master's Thesis from the year 2016 in the subject Politics Topic Public International Law and Human Rights grade 70% University College London course LLM language English abstract This paper seeks to examine from a human rights perspective the degree of protection of the right to strike under Article 11 ECHR Chapter One examines whether Article 11 ECHR offers any possibility for reading into its provisions a general right to strike It will scrutinise the initial reluctance of the ECtHR to proceed to such an interpretation and thus to adequately safeguard the right at issue Chapter Two discusses the course

through which the initial despair preceded the subsequent hope of the Demir and Baykara judgement while considering the case's impacts on the protection of the right to strike Chapter Three critically examines the decision in the RMT v UK case in which the ECtHR appeared to misplace any optimism its previous jurisprudence had generated It will focus on the UK's problematic pre industrial notices which are necessary for the workers in escaping tortious liability and on the classification by the Court of a secondary action as an accessory rather than a core aspect of trade unions activity Chapter Four at first refers to the importance of the right to strike as a human right It is argued that its enhanced protection can result in the promotion of human rights for both those taking part in the industrial action and those who are not formally engaged in the dispute Finally it discusses why the ECHR constitutes the safest route through which individuals and trade unions can challenge breaches vis a vis the right to strike **Documents** Council of Europe: Parliamentary Assembly, 2006-06-08

The Idea of Labour Law Guy Davidov, Brian Langille, 2011-06-02 Labour law is widely considered to be in crisis by scholars of the field This crisis has an obvious external dimension labour law is attacked for impeding efficiency flexibility and development vilified for reducing employment and for favouring already well placed employees over less fortunate ones and discredited for failing to cover the most vulnerable workers and workers in the informal sector These are just some of the external challenges to labour law There is also an internal challenge as labour lawyers themselves increasingly question whether their discipline is conceptually coherent relevant to the new empirical realities of the world of work and normatively salient in the world as we now know it This book responds to such fundamental challenges by asking the most fundamental questions What is labour law for How can it be justified And what are the normative premises on which reforms should be based There has been growing interest in such questions in recent years In this volume the contributors seek to take this body of scholarship seriously and also to move it forward Its aim is to provide if not answers which satisfy everyone intellectually nourishing food for thought for those interested in understanding explaining and interpreting labour laws whether they are scholars practitioners judges policy makers or workers and employers *Perspectives on Labour Law* A. C. L. Davies, 2004-09-16 An accessible but thought provoking introduction to labour law
