Maya Codices Historians and scholars began the slow process of deciphering the Maya past Great effort was expended and the reality of their lives culture kings wars and daily practice began to emerge And the world was astounded by the emerging picture Perhaps a first in the world was their mathematical calculation with zero a phenomenal achievement Interestingly the glyph of the zero depicted a woman what mathematical genius was she to use zero in calculations Their astronomy of the heavenly spheres was astoundingly precise as was their knowledge of geometry and trigonometry Their religion however included human sacrifices following the practice of other nearby civilizations such as the Aztecs the Inca in South America and others The Spaniards stopped such worship and offerings and now subjugated these people into serfdom called *encomiendas* or enforced working for the conquistadors and their descendants Independence from Spain came in 1821 but the Mayan living conditions did not change The country became divided between the Spanish descendants now known as the *Criollos* the middle class known as *Ladinos* not to be confused with Jews in 9th century Castilian Spain and the Maya and other indigenous The social distance from the upper to lower classes was immense And that distance came forward during Guatemala's Civil War from 1960 to 1996 The violence and massacres during this period was so evil the president of the country Rios Montt was charged and convicted of Genocide the first time a country charged its own leader with this crime At a previous age and time the face of Guatemala presented immense achievements Today violence crime and cultural penury is self evident Guatemala is a third world country where the majority of its people live in great poverty while the upper class has the land its abundance and vast wealth
