Risc Heroic Heroes:

Risc! David Usher Emerson, 1999-12-01 Being the seventh child of parents who were in the printing business my life was formed in four stages at a very early age My father who was in the printing business died when I was about a year and a half old Leaving my sainted mother with seven children to raise The oldest being less than fourteen Naturally in order to feed her family she had to run the business which meant housekeepers At 4 years old I was playing down at Allens woods where they had been logging The ground was covered with sawdust which felt good to my bare feet All of a sudden the ground gave way and my foot plunged into a red hot underground fire I screamed at the top of my lungs And continued to scream all the way up the hill and into my house where I raced for the bathroom turned on the water in the tub and plunged my foot into the cold water still screaming I heard our housekeeper screaming at the top of her lungs Drown him Drown him Drown him At 5 years old another housekeeper had to take me to her home and take care of me until my mother could pick me up She lived on a houseboat She and her husband who filed saws for a living were keeping me entertained All of a sudden a man carrying a bottle of moonshine entered the house When they explained to him about me he suggested they send me out to swim They then informed him that I couldnt swim The Man then suggest that the best way a child could learn to swim was to throw him in As you can imagine the alarms went off in my head I made a beeline for the bathroom locked the door and told them that I would not come out until the moon shiner had left At six years old I was put in a play at school I dont remember the name of the play but my part was to dance the two step with a girl while singing Ill take you home again Cathleen My mother and my sister dressed me in a costume that consisted of black paten leather buckle shoes knee high white stockings black velvet short pants a long sleeved heavily laced white shirt While all this was going My mother and my sister dressed me in a costume that consisted of black paten leather buckle shoes knee high white stockings black velvet short pants a long sleeved heavily laced white shirt on my brothers teased and teased with sissy sissy sissy or Little Lord Fauntleroy never letting up You can imagine how I felt while walking to the church auditorium room where the play was to take place As I reached for the door to enter In my mind I could still hear my brothers hollering sissy sissy Little Lord Fauntleroy I just could not bring myself to open that Door I turned and went back home To me this was the cruelest thing I had ever done to anyone in my life Let alone a little girl who missed the play because of me I have never forgotten it and I never will These stories have had a lasting effect about people including myself Probably one reason why Im self educated along with being extremely independent David Usher Emerson *Isle of the Beast* J. An Open-Source Research Platform for Heterogeneous Systems on Chip Andreas Dominic Kurth, 2022-10-05 Heterogeneous systems on chip HeSoCs combine general purpose feature rich multi core host processors with domain specific programmable many core accelerators PMCAs to unite versatility with energy efficiency and peak performance By virtue of their heterogeneity HeSoCs hold the promise of increasing performance and energy efficiency compared to homogeneous multiprocessors because applications can be

executed on hardware that is designed for them. However, this heterogeneity also increases system complexity substantially. This thesis presents the first research platform for HeSoCs where all components from accelerator cores to application programming interface are available under permissive open source licenses. We begin by identifying the hardware and software components that are required in HeSoCs and by designing a representative hardware and software architecture. We then design, implement, and evaluate four critical HeSoC components that have not been discussed in research at the level required for an open source implementation. First, we present a modular, topology-agnostic, high-performance on-chip communication platform which adheres to a state-of-the-art industry standard protocol. We show that the platform can be used to build high-bandwidth (e.g., 2.5 GHz and 1024-bit data width) end-to-end communication fabrics with high degrees of concurrency (e.g., up to 256 independent concurrent transactions). Second, we present a modular and efficient solution for implementing atomic memory operations in highly scalable many-core processors, which demonstrates near-optimal linear throughput scaling for various synthetic and real-world workloads and requires only 0.5 kGE per core. Third, we present a hardware-software solution for shared virtual memory that avoids the majority of translation lookaside buffer misses with prefetching, supports parallel burst transfers without additional buffers, and can be scaled with the workload and number of parallel processors. Our work improves accelerator performance for memory-intensive kernels by up to 4x. Fourth, we present a software toolchain for mixed data model heterogeneous compilation and OpenMP offloading. Our work enables transparent memory sharing between a 64-bit host processor and a 32-bit accelerator at overheads below 0.7% compared to 32-bit only execution. Finally, we combine our contributions to a research platform for state-of-the-art HeSoCs and demonstrate its performance and flexibility.

A magisterial work of social history, *Life After Death* illuminates the many different ways ancient civilizations grappled with the question of what exactly happens to us after we die. In a masterful exploration of how Western civilizations have defined the afterlife, Alan F. Segal weaves together biblical and literary scholarship, sociology, history, and philosophy. A renowned scholar, Segal examines the maps of the afterlife found in Western religious texts and reveals not only what various cultures believed but how their notions reflected their societies' realities and ideals and why those beliefs changed over time. He maintains that the afterlife is the mirror in which a society arranges its concept of the self. The composition process for Judaism, Christianity, and Islam begins in grief and ends in the victory of the self over death. Arguing that in every religious tradition the afterlife represents the ultimate reward for the good, Segal combines historical and anthropological data with insights gleaned from religious and philosophical writings to explain the following mysteries: why the Egyptians insisted on an afterlife in heaven while the body was embalmed in a tomb on earth; why the Babylonians viewed the dead as living in underground prisons; why the Hebrews remained silent about life after death during the period of the

First Temple yet embraced it in the Second Temple period 534 B C E 70 C E and why Christianity placed the afterlife in the center of its belief system He discusses the inner dialogues and arguments within Judaism and Christianity showing the underlying dynamic behind them as well as the ideas that mark the differences between the two religions In a thoughtful examination of the influence of biblical views of heaven and martyrdom on Islamic beliefs he offers a fascinating perspective on the current troubling rise of Islamic fundamentalism In tracing the organic historical relationships between sacred texts and communities of belief and comparing the visions of life after death that have emerged throughout history Segal sheds a bright revealing light on the intimate connections between notions of the afterlife the societies that produced them and the individual s search for the ultimate meaning of life on earth **EDN** ,1992 [A Concise Anglo-Saxon Dictionary](#) John R.
