The Process Genre Salomé Aguilera Skvirsky, 2020-03-20 From IKEA assembly guides and hands and pans cooking videos on social media to Mister Rogers's classic factory tours representations of the step by step fabrication of objects and food are ubiquitous in popular media In *The Process Genre* Salomé Aguilera Skvirsky introduces and theorizes the process genre a heretofore unacknowledged and untheorized transmedial genre characterized by its representation of chronologically ordered steps in which some form of labor results in a finished product Originating in the fifteenth century with machine drawings and now including everything from cookbooks to instructional videos and art cinema the process genre achieves its most powerful affective and ideological results in film By visualizing technique and absorbing viewers into the actions of social actors and machines industrial educational ethnographic and other process films stake out diverse ideological positions on the meaning of labor and on a society's level of technological development In systematically theorizing a genre familiar to anyone with access to a screen Skvirsky opens up new

possibilities for film theory The Crisis of Democratic Theory Edward A. Purcell Jr., 2014-04-23 Widely acclaimed for its originality and penetration this award winning study of American thought in the twentieth century examines the ways in which the spread of pragmatism and scientific naturalism affected developments in philosophy social science and law and traces the effects of these developments on traditional assumptions of democratic theory *Exotic Visions in Marketing Theory and Practice* Alf H. Walle, 2001-12-30 An anthropologist folklorist and literary critic besides being a marketing professor Alf H Walle takes a refreshingly interdisciplinary look at the impact of modern social thought upon marketing and social research Tracing key ideas back to their intellectual roots Walle shows how the evolution of social theory and the controversies it has engendered can and should transform the way marketers approach consumers He provides a theoretic underpinning for qualitative consumer research and presents a lucid theoretical and methodological overview for qualitative methods in marketing research that parallels what others such as Shelby Hunt have provided for scientific methods in marketing His book is a provocative thoughtful and probing study of qualitative social theory and its important contributions to marketing and consumer research It is of value to both practitioners and academics Arguing that the social structural methods have been largely ignored Walle rehabilitates this general method and compares it to poststructural alternatives Walle shows that to understand the evolution of modern social theory one must come to grips with the work of three towering pioneers Immanuel Kant Friedrich Hegel and Karl Marx and that researchers must understand and appreciate the contributions and influence of pioneers in order to avoid the myopic vision of our own time Praising Hegel s metaphor of cultures as living organisms and his forging of the concept we now call National Character Walle points to Hegel as the pioneering social structuralist and as the man who as a negative example inspired the poststructuralists to action Walle ends with a well reasoned analysis of poststructural thought in marketing consumer research and suggests that conflict theory an alternative to poststructural methods that evolved from social structural roots is often more appropriate than poststructural analysis in marketing and consumer research Relating both conflict theory and poststructural analysis to the actual needs of marketing consumer researchers *Exotic Visions in Marketing Theory and Practice* provides unique practical insights for those who teach market research as well as practitioners who pursue it for a living Theories of Culture in Postmodern Times Marvin Harris, 1999 In this book Marvin Harris presents his current views on the nature of culture addressing such issues as the mental behavioral debate emics and etics and anthropological holism , Inventing the Immigration Problem Katherine Benton-Cohen, 2018-05-07 The Dillingham Commission created by Congress in 1907 to collect data on a perceived immigration problem remains the largest U S immigration study ever conducted Katherine Benton Cohen shows that its Progressive formulation and recommendations endure in almost every component of immigration policy control and enforcement a century later **Violence over the Land** Ned BLACKHAWK, 2009-06-30 American Indians remain familiar as icons yet poorly understood as historical agents In this ambitious book that ranges across Utah Nevada New Mexico

Colorado and eastern California a region known as the Great Basin Ned Blackhawk places Native peoples squarely at the center of a dynamic and complex story as he chronicles two centuries of Indian and imperial history that profoundly shaped the American West On the distant margins of empire Great Basin Indians increasingly found themselves engulfed in the chaotic storms of European expansion and responded in ways that refashioned themselves and those around them Focusing on Ute Paiute and Shoshone Indians Blackhawk illuminates this history through a lens of violence excavating the myriad impacts of colonial expansion Brutal networks of trade and slavery forged the Spanish borderlands and the use of violence became for many Indians a necessary survival strategy particularly after Mexican Independence when many became raiders and slave traffickers Throughout such violent processes these Native communities struggled to adapt to their changing environments sometimes scoring remarkable political ends while suffering immense reprisals Violence over the Land is a passionate reminder of the high costs that the making of American history occasioned for many indigenous peoples written from the vantage point of an Indian scholar whose own family history is intimately bound up in its enduring legacies The Theory Primer Mark A. Schneider, 2006-04-13 The Theory Primer A Sociological Guide is both a classical theory text and a practical guide to theorizing making it ideal for sociology majors or graduate students new to the field Schneider presents theories drawn from Marx Weber Durkheim and Mead among others offering rigorous evaluations that examine the research traditions that arose from them and the paradigms that continue to produce theories today The book's goal is to align the study of theory with the skills orientation of methods and statistics courses because the ability to theorize is of great use not only in sociology but in occupational and public life **The Tangled Wing** Melvin Konner, 2003-02 A vital updating of a seminal work of science First published to great acclaim twenty years ago The Tangled Wing has become required reading for anyone interested in the biological roots of human behavior Since then revolutions have taken place in genetics molecular biology and neuroscience All of these innovations have been brought into account in this greatly expanded edition of a book originally called an overwhelming achievement by The Times Literary Supplement A masterful synthesis of biology psychology anthropology and philosophy The Tangled Wing reveals human identity and activity to be an intricately woven fabric of innumerable factors Melvin Konner's sensitive and straightforward discussion ranges across topics such as the roots of aggression the basis of attachment and desire the differences between the sexes and the foundations of mental illness

Claude Levi-Strauss David Pace, 2015-07-03 L vi Strauss is one of the intellectual giants of the twentieth century yet he is a very private and isolated figure who has been reticent about himself This book first published in 1983 provides a fascinating insight into his character through a careful reading of the more speculative passages of his books and interviews His personal existential and psychological orientation is explored through a structural analysis of Tristes Tropiques his most personal book and his writings on art nature and civilization and through a consideration of his debt to Rousseau Dr Pace examines in depth L vi Strauss's critique of cultural evolutionism and his attack on the notion of world history He assesses

the political implications of Levi Strauss's own interpretation of human progress through an examination of his debates with Sartre and other Marxists in the 1950s and 1960s and his subsequent movement to the right. The author's concern throughout is to place the world view of this great French anthropologist in the context of twentieth century intellectuals' struggle to come to grips with cultural relativism and the problem of the primitive.

The Transformation of the Southeastern Indians, 1540-1760 Robbie Ethridge, Charles Hudson, 2010-12-01 With essays by Stephen Davis, Penelope Drooker, Patricia K. Galloway, Steven Hahn, Charles Hudson, Marvin Jeter, Paul Kelton, Timothy Pertulla, Christopher Rodning, Helen Rountree, Marvin T. Smith, and John Worth. The first two hundred years of Western civilization in the Americas was a time when fundamental and sometimes catastrophic changes occurred in Native American communities in the South. In *The Transformation of the Southeastern Indians 1540-1760*, historians, anthropologists, and archaeologists provide perspectives on how this era shaped American Indian society for later generations and how it even affects these communities today. This collection of essays presents the most current scholarship on the social history of the South, identifying and examining the historical forces, trends, and events that were attendant to the formation of the Indians of the colonial South. The essayists discuss how Southeastern Indian culture and society evolved. They focus on such aspects as the introduction of European diseases to the New World, long distance migration and relocation, the influences of the Spanish mission system, the effects of the English plantation system, the northern fur trade of the English and the French, Dutch and English trade of Indian slaves and deerskins in the South. This book covers the full geographic and social scope of the Southeast, including the indigenous peoples of Florida, Virginia, Maryland, the Appalachian Mountains, the Carolina Piedmont, the Ohio Valley, and the Central and Lower Mississippi Valleys.

The Building of British Social Anthropology K. Langham, 2012-12-06 The nature of that transition to maturity, a transition involving the acquisition of the sort of paradigm that identifies challenging puzzles, supplies clues to their solution, and guarantees that the truly clever practitioner will succeed, deserves fuller discussion than it has received in this book, particularly from those concerned with the development of the contemporary social sciences.

Thomas S. Kuhn, 1969 *Postscript to The Structure of Scientific Revolutions* The first two or three decades of the twentieth century represents a shadowy period in the history of science. For most contemporary scientists, the period is a little too far away to be the subject of a first-hand oral tradition, while at the same time it is not sufficiently remote to have acquired the epic and oversimplified contour of history which has been transformed into mythology. Historians of science, by contrast, who want to free themselves from the mythology which is used to legitimize the present state of the discipline, are interested in discovering what really happened and how it was regarded at the time. For them, the nature of science in the early twentieth century is obscured by what they regard as its proximity in time, and they are disturbed by a general lack of depth in scholarly work in the area, which makes it difficult to see the period in proper perspective.

Relations of Production David Seddon, 2012-11-12 First Published in 1978 This book seeks to fill the gap of works in English that systematically deal with

social and economic life in primitive tribal and peasant societies the main object of economic anthropology as of any branch of anthropology from a Marxist theoretical standpoint Using such relevant texts as Marx himself the *Pre Capitalist Economic Formations* which appeared in English in 1964 with an introduction by Eric Hobsbawm and that of Engels of which *The Origin of the Family Private Property and the State* *The White Man's Indian* Robert F. Berkhofer, 2011-08-03 Columbus called them Indians because his geography was faulty But that name and more importantly the images it has come to suggest have endured for five centuries not only obscuring the true identity of the original Americans but serving as an ideological weapon in their subjugation Now in this brilliant and deeply disturbing reinterpretation of the American past Robert Berkhofer has written an impressively documented account of the self serving stereotypes Europeans and white Americans have concocted about the Indian Noble Savage or bloodthirsty redskin he was deemed inferior in the light of western Christian civilization and manipulated to its benefit A thought provoking and revelatory study of the absolute seemingly ineradicable pervasiveness of white racism *The White Man's Indian* is a truly important book which penetrates to the very heart of our understanding of ourselves A splendid inquiry into and analysis of the process whereby white adventurers and the white middle class fabricated the Indian to their own advantage It deserves a wide and thoughtful readership *Chronicle of Higher Education* A compelling and definitive history of racist preconceptions in white behavior toward native Americans Leo Marx *The New York Times Book Review* *The Evolutionary History of Witch-hunting* Steije Hofhuis, 2024-12-06 Why did early modern Europeans hunt for witches Were these persecutions a shrewd tool to oppress women or the poor or were they just a way of making money Or were witch hunters primarily driven by a genuine belief in witchcraft The witches sabbath the diabolical pact and the nightly flight were elements in the early modern concept of witchcraft that seem to have been intelligently designed to trigger persistent witch persecutions But in contrast to what many past historical scholars presumed witch hunts were not based on intelligent design So how to explain them This book proposes a new model Darwinian cultural evolution It contends that witch hunting's apparent design emerged from a hidden evolutionary process in which cultural variants which accidentally unleashed larger persecutions were cumulatively preserved Witch hunting did not so much evolve to serve human interests but to ensure its own selfish reproduction Historians have often compared witch persecutions to the outbreaks of contagious disease but only as a figure of speech But shouldn't we take the similarities more seriously This book argues that witch hunting was a cultural virus that spread at the expense of its human hosts and thus bridges the gap between qualitative history and the burgeoning field of Darwinian cultural evolution **Studying Societies and Cultures** Lawrence A. Kuznar, Stephen K. Sanderson, 2015-12-03 A thought provoking stimulating volume on the past present and future of cultural materialism that is both laudatory of Harris research strategy and critical of it Paul Shankman University of Colorado One of the most important anthropologists of all time Marvin Harris was influential worldwide as the founder of cultural materialism This book accessibly analyzes Harris's theories and their important legacies today *The*

chapters explore cultural materialism's epistemology and its relation to rational choice theory Darwinian social science and population pressures The authors assess recent attempts to extend and reformulate cultural materialism and highlight cross cultural archaeological and ethnographic applications of cultural materialism today
