## **Risk Environment And Society Ongoing Debates Current Issues And Future Prospects:**

*Risk, Environment, and Society* Piet Strydom, 2002 How and why have the closed expert debates of past decades become an open public discourse about nuclear environmental and biotechnological risks What can a cultural and institutional analysis reveal about risks and their social construction Is it possible to develop a new critical theory of the risk society This book offers an overview and analysis of nuclear global environmental and biotechnological dangers threats and hazards in the context of public debates about risk from the 1950s to the present It considers what impact these risks and debates are having on society transforming underlying cultural assumptions for example about nature but also public communication social institutions and even the way society is organized Piet Strydom reconstructs public debates and social scientific theories to provide a fresh approach to the risk society From this comes a new theoretical perspective for studying the emerging social conditions of the twenty first century The result is a penetrating and essential text for students and researchers across a range of areas including sociology environmental studies politics and cultural and communications studies

**Education and the Risk Society** Steven Bialostok, Robert Whitman, William Bradley, 2012-12-23 Sociological and anthropological literature has examined how contemporary western society has become a risk society Education and the Risk Society is the first volume to explore this seminal concept through the lens of education Drawing on a theoretical literature that has great potential as a lens to view changes in neoliberal discourses of global capitalism from both critical and generative perspectives Education and the Risk Society presents situated empirical studies investigating an uncertain world as people practice it on the ground through language and activity within educational settings

*Social Theories of Risk and Uncertainty* Jens O. Zinn, 2009-01-22 Written by leading experts in the field Social Theories of Risk and Uncertainty is an introduction to mainstream theorizing on risk and uncertainty in sociology Provides an overview of the historical developments and conceptual aspects of risk Identifies why theorizing on risk is necessary and highlights specific sociological contributions to this field of research Explores key topics including risk society and reflexive modernization culture and risk governmentality and risk systems theory and risk and edgework and voluntary risk taking Offers a comprehensive look at the promises pitfalls and perspectives of risk theorizing

*Society, Culture and Technology at the Dawn of the 21st Century* Katarzyna Leszczyńska, Janusz Mucha, 2010-04-16 The articles in this collection analyse methodological aspects of today's hard sciences and humanities and of applied research in the field of high technology The authors explore structural and cultural contexts of scientific research relations between information technologies and our everyday life as well as relations between innovation and business culture

[Risk in The New York Times \(1987-2014\)](#) Jens O. Zinn, Daniel McDonald, 2017-11-09 This book investigates to what extent claims of common social science risk theories such as risk society governmentality risk and culture risk colonisation and culture of fear are reflected in linguistic changes in print news media The authors provide a corpus based investigation of risk words in The New York Times 1987 2014 and a case study of

the health domain The book presents results from an interdisciplinary enterprise which combines sociological risk theories with a systematic functional theory of language to conduct an empirical analysis of linguistic patterns and social change It will be of interest to students and scholars interested in corpus linguistics and digital humanities and social scientists looking for new research strategies to examine long term social change      **Nature, Environment and Society** Philip

Sutton,2017-03-14 How have sociologists responded to the emergence of environmentalism What has sociology to offer the study of environmental problems This uniquely comprehensive guide traces the origins and development of environmental movements and environmental issues providing a critical review of the most significant debates in the new field of environmental sociology It covers environmental ideas environmental movements social constructionism critical realism ecocentric theory environmental identities risk society theory sustainable development Green consumerism ecological modernization and debates around modernity and post modernity Philip Sutton adopts a long term view which focuses on the relationship between ideas of nature and environment ecological identities and social change providing a framework for future research Bringing environmental issues into contact with sociological theories Nature Environment and Society provides an up to date introduction to this important new field It will be essential reading for all students of sociology environmental studies and anyone interested in understanding environmental problems      **Routledge International**

**Handbook of Contemporary Social and Political Theory** Gerard Delanty,Stephen P. Turner,2011-03-23 The Handbook will address a range of issues that have emerged out of recent social and political theory It will focus on key themes as opposed to schools of thought or major theorists Each chapter is an emerging cutting edge topic that is of interest both to social theory and to political theory Most topics will have a clear and substantive focus on social or political problems

**Risk and Hyperconnectivity** Andrew Hoskins,John Tulloch,2016-05-02 Risk and Hyperconnectivity brings together for the first time three paradigms new risk theory neoliberalization theory and connectivity theory to illuminate how the kaleidoscope of risk events in the opening years of the new century has recharged a neoliberal battlespace of media economy and security Hoskins and Tulloch argue that hyperconnectivity is both a conduit of risk and a form of risk in itself and that it alters the ways in which we experience events and remember them Through interdisciplinary dialogue and case study analysis they offer original perspectives on the key questions of risk of our age including What is the path to a balance between individual privacy and state or corporate security Is hyperconnectivity itself a new risk condition of our time How do remembering and forgetting shape citizen insecurity and cultures of risk and legitimize neoliberal governance How do journalists operate as public intellectuals of risk Through probing a series of risk events that have already scarred the twenty first century Hoskins and Tulloch show how both established and emergent media are central in shaping past present and future horizons of neoliberalism while also propelling wide pressure for its alternatives on those ranging from economics students worldwide to potential political leaders cultivated by austerity policies      **New Medicalism and the Mental**

**Health Act** John Fanning, 2018-08-09 Ten years have passed since the Mental Health Act MHA 2007 came into force in England. An amending statute the Act reformed the MHA 1983 and reshaped the law governing the compulsory care and treatment of people suffering from mental disorders. Primarily driven by concerns about risk it sought to remove legalistic obstacles to civil commitment and extend the law's coercive reach into the community. At the time of its introduction the 2007 Act was written off as a retrograde step and a missed opportunity for radical rights focused reform. Despite this little attention has been paid to its impact in the years since. Published to coincide with the tenth anniversary of the 2007 Act this book offers a timely evaluation of mental health law and policy in England. It argues that the current MHA defies easy categorisation within any of the descriptive models which have customarily narrated the mechanics of civil commitment namely legalism, new legalism and medicalism. It therefore makes the case for a new model, new medicalism to account for the 2007 Act's enhancement of the discretion of mental health professionals for the express purposes of facilitating the management of situations of risk. In doing so the book critically examines the problems inherent in civil commitment frameworks organised around the concept of risk, explores the theoretical foundations of new medicalism, considers the challenges facing proponents of future reform in the era of the UN Convention on the Rights of Persons with Disabilities and reflects on the 2007 Act's practical impact.

The Dáil in the 21st Century Anthony O'Halloran, 2010 Much of the public commentary dismisses the Dáil as an irrelevant or peripheral political institution but The Dáil in the 21st Century argues that the position of the Dáil is far from declining; has actually been enhanced particularly since the mid 1980s. The Dáil's position in Irish politics has improved significantly over time. Coming from a weak base since its establishment it has acquired a strong institutional identity with improved resources and staff giving it a stronger voice. This book suggests a future role for the Lower House extending its democratic reach to areas such as social partnership, an area coming under increased attention in these troubled economic times. Texts on the Dáil are rare; particularly work which examines the Dáil in the context of the fundamental shifts which have occurred in contemporary Irish politics and this book offers a unique and fresh perspective on the Dáil and its operations.

World at Risk Ulrich Beck, 2013-10-29 Twenty years ago Ulrich Beck published Risk Society, a book that called our attention to the dangers of environmental catastrophes and changed the way we think about contemporary societies. During the last two decades the dangers highlighted by Beck have taken on new forms and assumed ever greater significance. Terrorism has shifted to a global arena, financial crises have produced worldwide consequences that are difficult to control and politicians have been forced to accept that climate change is not idle speculation. In short we have come to see that today we live in a world at risk. A new feature of our world, risk society, is that risk is produced for political gain. This political use of risk means that fear creeps into modern life. A need for security encroaches on our liberty and our view of equality. However Beck is anything but an alarmist and believes that the anticipation of catastrophe can fundamentally change global politics. We have the opportunity today to reconfigure power in

terms of what Beck calls a cosmopolitan material politics World at Risk is a timely and far reaching analysis of the structural dynamics of the modern world the global nature of risk and the future of global politics by one of the most original and exciting social thinkers writing today

**Anthropology and Risk** Asa Boholm, 2015-04-24 Drawing on theory from anthropology sociology organisation studies and philosophy this book addresses how the perception communication and management of risk is shaped by culturally informed and socially embedded knowledge and experience It provides an account of how interpretations of risk in society are conditioned by knowledge claims and cultural assumptions and by the orientation of actors based on roles norms expectations identities trust and practical rationality within a lived social world By focusing on agency social complexity and the production and interpretation of meaning the book offers a comprehensive and holistic theoretical perspective on risk based on empirical case studies and ethnographic enquiry As a selection of Asa Boholm's publications throughout her career along with a newly written introduction overviewing the field this book provides a unified perspective on risk as a construct shaped by social and cultural contexts This collection should be of interest to students and scholars of risk communication risk management environmental planning environmental management and environmental and applied anthropology

**A Time of Disastrous Anticipations** Reidar Staupe, Monika Gabriela Bartoszewicz, 2025-06-11 This book explores the pervasive anticipation of catastrophe in contemporary society examining how temporal expectations shape personal and collective experiences and influence our perspectives and responses A Time of Disastrous Anticipations highlights the role of anticipation in shaping societal narratives exploring strategies for redefining responses to catastrophic imaginaries Through a combination of theoretical insights with practical examples it offers a comprehensive view of anticipation's impact in contemporary society The vista of disastrous anticipations reveals that catastrophe is not so much a matter out of place but primarily a matter out of time Targeted at scholars students and professionals in sociology disaster studies and public policy this book is also valuable for policymakers and practitioners interested in understanding the societal dimension of disaster anticipation

*Medicine, Risk, Discourse and Power* John Martyn Chamberlain, 2015-11-19 This book critically explores from a comparative international perspective the role medicine plays in constructing and managing natural and social risks including those belonging to modern medical technology and expertise Drawing together chapters written by professional practitioners and social scientists from the UK South America Australia and Europe the book offers readers an insightful and thought provoking analysis of how modern medicine has transformed our understanding of both ourselves and the world around us but in so doing has arguably failed to fully recognize and account for its unintended and negative effects This is an essential read for social scientists practitioners and policymakers who want to better understand how they can develop new ways of thinking about how modern medicine can promote social goods and enhance public health

**The Environment** Philip W. Sutton, 2013-04-29 How are human societies changing the global environment Is sustainable development really possible Can environmental risks be avoided Is

our experience of nature changing This book shows how questions about the environment cannot be properly answered without taking a sociological approach It provides a comprehensive guide to the ways in which sociologists have responded to the challenge of environmental issues as diverse as global warming ozone depletion biodiversity loss and marine pollution It also covers sociological ideas such as risk interpretations of nature environmental realism ecological modernization and globalization Environmentalism and green politics are also introduced Unlike many other texts in the field the book takes a long term view locating environmental dilemmas within the context of social development and globalization The Environment A Sociological Introduction is unique in presenting environmental issues at an introductory level that assumes no specialist knowledge on the part of readers The book is written in a remarkably clear and accessible style and uses a rich range of empirical examples from across the globe to illustrate key debates A carefully assembled glossary and annotated further reading suggestions also help to bring ideas to life The book will be a valuable resource for students in a range of disciplines including sociology geography and the environmental sciences but also for anyone who wants to get to grips with contemporary environmental debates

**Real Sex Films** John Tulloch, Belinda Middleweek, 2017-10-03 Real Sex Films explores one of the most controversial movements in international cinema through an innovative interdisciplinary combination of theories of globalization and embodiment Risk sociology feminist film theory and critical feminist mapping theory are brought together with concepts of production narrative genre authorship stardom spectatorship and social audience as several lenses of understanding and extension in ways of seeing real sex cinema Notions of personal subjectivity and critical distance disciplinary co operation and critique and cinematic perceptions of the utopia and dystopia of love within risk modernity are the tensions exposed reflexively and in parallel as each chapter focuses different lenses communicating intimacy desire risk and transgression This book substantively methodologically and theoretically embraces and engages in its consideration of the images ethics double standards and embodiments of brutal cinema Crossing the boundaries of film studies media and cultural studies the ethnographic turn risk sociology feminist psychoanalytical and geopolitical studies this is a book for students academics as well as general and professional audiences
