Gender and Drone Warfare Lindsay Clark, 2019-06-20 This book investigates how drone warfare is deeply gendered and how this can be explored through the methodological framework of Haunting Utilising original interview data from British Reaper drone crews the book analyses the way killing by drones complicates traditional understandings of masculinity and femininity in warfare As their role does not include physical risk drone crews have been critiqued for failing to meet the masculine requirements necessary to be considered warriors and have been derided for feminising war However this book argues that drone warfare and the experiences of the crews exceeds the traditional masculine feminine binary and suggests a new approach to explore this issue The framework of Haunting presented here draws on the insights of Jacques Derrida Avery Gordon and others to highlight four key themes complex personhood in hyper visibility disturbed temporality and power as frames through which the intersection of gender and drone warfare can be examined This book argues that Haunting provides a framework for both revealing and destabilising gendered binaries of use for feminist security studies and

International Relations scholars as well as shedding light on British drone warfare This book will be of interest to students of gender studies sociology war studies and critical security studies
