exploration of nineteenth century popular science and magic to the Hollywood science fiction cinema of our time Special Effects examines the history advancements and connoisseurship of special effects asking what makes certain types of cinematic effects special why this matters and for whom Michele Pierson shows how popular science magazines genre filmzines and computer lifestyle magazines have articulated an aesthetic criticism of this emerging art form and have helped shape how these hugely popular on screen technological wonders have been viewed by moviegoers **Magic** Albert Allis Hopkins,2020-07 The present work occupies a unique field in the extensive literature of magic Little attention had been given at the time to the expos of stage illusions which are of great interest as they are so largely based on ingenious applications of scientific principles There is always a great charm about the stage and the methods of producing the effects which give realism to the drama Optics mechanics sound and electricity have all been pressed into service by the prestidigitateur In the present work great attention has been paid to elaborate tricks of this nature and in many cases the expos s have been obtained from the prestidigitateurs themselves Many of the best illusions of Robert Houdin Dr Lynn Professor Pepper Bautier de Kolta Heller Herrmann Maskelyne and Cooke and Kellar are clearly explained The introduction by Henry Evans contains a brief but remarkably complete history of magic art from the earliest times to the late 19th century with special attention being given to amusing incidents in the careers of celebrated necromancers Reprint of the 1897 edition the work has been converted and retouched for maximum quality however some imperfections are to be expected **Magic and Illusion in the Movies** George Higham,2024-11-13 From top hats to top secrets this book is a celebration of illusion technology and mechanisms of trickery through a genre crossing selection of films Heroes villains spies con men and madmen magicians all have utilized complex constructs and trickery in thrilling cinematic adventures from the earliest days of cinema to the present Current blockbusters such as Spider Man Far from Home and the Mission Impossible series feature amazing acts of deception often appearing far fetched that are in fact surprisingly close to today s technology Along with the James Bond saga classics such as The Wizard of Oz Nightmare Alley and The Sting are joined by a host of other movies superficially seeming to be very different yet proving there is more than meets the eye *Medical Meddlers Mediums & Magician* Keith Souter,2011-11-30 The Victorians had a thirst for knowledge This drove them to explore the unchartered corners of the world plumb the unfathomable depths of science discover evolution and create some of the engineering and architectural marvels of the world Yet this open mindedness also at times made them utterly gullible Because of their closeness to disease and the ever present threat of their own mortality it was inevitable that they would be open to the claims of quacks who promised all kinds of panaceas and to mediums who offered a means of communicating with the dead So too did it make them eager for diversion and entertainment by the conjurers and illusionists of the great music halls Strangely it was through the magic making skill of the conjurers that the activities of many of the tricksters and fraudulent mediums finally came to be exposed Medical Meddlers Mediums Magicians is a box of delights for all students of Victoriana **Card Manipulations** Jean

development of virtual aesthetics through nineteenth century writings from the novels of George Eliot and Charles Dickens to popular science writing and imperial travelogues Seeing Things recovers a formative period of technological and literary innovation to explain how optical media not only anticipated cinema but became a paradigmatic media aesthetic of western modernity *Ghost Images* Tom Ruffles,2015-03-07 The possibility of life after death is a significant theme in cinema in which ghosts return to the world of the living to wrap up unfinished business console their survivors visit lovers or just enjoy a well wreaked scaring This work focuses on film depictions of survival after death from meetings with the ghost of Elvis to AIDS related ghosts apparitions hauntings mediumship representations of heaven angels near death experiences possession poltergeists and all the other ways in which the living interact with the dead on screen The work opens with a historical perspective which outlines the development of pre cinematic technology for projecting phantoms and discusses the use of these skills in early ghost cinema English language sound films are then examined thematically with topics ranging from the expiation of sins to hungry ghosts Six of the most significant films Dead of Night A Matter of Life and Death The Innocents The Haunting The Shining and Jacob s Ladder are given a detailed analysis A conclusion filmography and bibliography follow
