Routledge Handbook of Water Economics and Institutions Kimberly Burnett,Richard Howitt,James A. Roumasset,Christopher A. Wada,2014-12-05 Growing scarcity of freshwater worldwide brings to light the need for sound water resource modeling and policy analysis While a solid foundation has been established for many specific water management problems combining those methods and principles in a unified framework remains an ongoing challenge This Handbook aims to expand the scope of efficient water use to include allocation of sources and quantities across uses and time as well as integrating demand management with supply side substitutes Socially efficient water use does not generally coincide with private decisions in the real world however Examples of mechanisms designed to incentivize efficient behavior are drawn from agricultural water use municipal water regulation and externalities linked to water resources Water management is further complicated when information is costly and or imperfect Standard optimization frameworks are extended to allow for coordination costs games and cooperation and risk allocation When operating efficiently water markets are often viewed as a desirable means of allocation because a market price incentivizes users to move resources from low to high value activities However early attempts at water trading have run into many obstacles Case studies from the United States Australia Europe and Canada highlight the successes and remaining challenges of establishing efficient water markets

Representative Government and Environmental Management Edwin T. Haefele,2013-11-26 First Published in 2011 Mr Haefele is a thoroughly modern eighteenth century man in that he brings to bear new techniques of political analysis with an undisguised preference for making the government of the American Republic as contemplated by the founding fathers really work for the benefit of the people Focusing on the question of environmental management Haefele carefully examines how we make social choices today and how the Constitution says we should and presents compelling arguments for bringing the two processes back into congruence The papers in this volume have been brought together from several earlier ones published in professional journals and some rewritten *Managing Natural Wealth* Jeffrey R. Vincent,Rozali Mohamed Ali,2010-09-30 The remarkably rich natural environment of Malaysia attracts the interest of both industry and the environmental community Managing Natural Wealth analyzes major natural resource and environmental policy issues in the country during the 1970s and 1980s a period of profound socioeconomic change rapid depletion of natural resources and the emergence of serious problems with pollution Managing Natural Wealth is an important up date to Environment and Development in a Resource Rich Economy Malaysia under the New Economic Policy First published in hardcover in 1997 this pathbreaking book emphasized economics as a source for analyzing the issues involved in environmental and natural resource management in developing countries The access that Jeffrey Vincent and Rozali Mohamed Ali and the contributing authors had to unpublished data and key decisionmakers made their account an essential reference for policymakers and researchers in Malaysia and throughout the globe Managing Natural Wealth includes a review of key developments since the 1990s by S Robert Aiken and Colin H Leigh two geographers with a long standing interest in environmental change in Malaysia and an understanding of the institutional context of its environmental policy that is unmatched in the scholarly community *Hearings, Reports and Prints of the Joint Economic Committee* United States.
